$2,465,000 Gift To UAH

Governor Fob James announced today that $2.465 million in oil lease money has been appropriated to the University of Alabama in Huntsville for the construction of an engineering building.

According to University officials, the $2.465 million will go toward the first phase of the building. Construction and equipment cost of the entire facility will be $8 million.

Dr. John Wright, University President, said that, while happy with the $3 million, he and other UAH officials are now studying the problem of how best to apply the funds in meeting the total project needs of $8 million.

The engineering facility, when completed, will include 90,000 square feet. It will provide teaching laboratories, classrooms, offices and related instructional support facilities.

Dr. Wright said the new structure will include space designed to serve the specialized needs of individual programs and a general area to serve the common needs of all departments.

"The University's need for a new building to educate engineering and pre-engineering students is well recognized and supported by the industrial community, which relies on UAH to provide qualified graduates for technological needs," he added.

Dr. Wright said that, according to an overview of Huntsville's governmental/industrial complex, there is a current need for an additional 1,600 new engineers to enter the field.

"While the need for the new building is already critical, it is crucial that the total building be completed soon. The undergraduate enrollment has increased by 400 percent from 1974 to 1981, with no additional space provided by the program. In the winter term of 1981, additional students wishing to enroll had to be turned away at registration for lack of instructional space," Dr. Wright explained.

He said that University officials are discussing with financial experts ways of getting as much as they can for the amount of money appropriated.

"Nineteen architects have already submitted preliminary designs for the building," Dr. Wright said, adding that "some kind of leasing arrangements may best suit the University's needs."

Richard Griskey, Dean of the School of Engineering at UAH said, "The faculty, students and administration of the School of Engineering are pleased that a start has been made toward relieving the critical space situation for Alabama's fastest growing engineering school. The ultimate solution to the School of Engineering's facilities problems are still far off in the future."

"However, completion of the first phase will enable us to keep up our momentum so that the high technology needs so important to the economic well-being of Huntsville and Alabama can be met."

The proposed building site is between Madison Hall and Research Institute.

SGA Attendance - Poor

by E. A. Urbans

"I'm not afraid to ask anyone to resign," said Penny County, vice president of S.G.A., in an interview last week.

As vice president, it is Countis' position to call legislative meetings and presides over them.

However, since fall elections, there has been an attendance problem, and enough representatives have been present to get a quorum.

The S.G.A. constitution provides that a two-thirds majority vote is needed to pass bills and issues. So if the active legislature has 10 members and less than 11 can attend, little business can be accomplished.

"It embarrasses me when students don't show up," said Countis.

And it seems that it must be frustrating to set up an agenda and be unable to act on it—not only for the vice president, but for the legislators who do attend.

But Countis did not simply reprimand underclassmen. She has analyzed the problem and has taken measures to correct it.

"Each vice president can make-up the attendance policy, because the vice president controls what's an excused absence and what's an unexcused," Countis said.

The constitution allows three consecutive unexcused absences, and then the legislator can be asked to resign.

But an excuse from Countis will be difficult to get in the future, obtainable only if "deathly ill, or there is a death in the family." Work or studying will not be considered valid excuses. She feels that people can plan their time.

Countis has decided that she must be strict about absenteeism in order to have a working legislature.

Also instead of the former biweekly meetings, Countis has designated Monday nights at 8:00 for legislative business. This way, members will have a definite time to plan around.

She also asked those who absolutely could not make that time to resign or to take a leave of absence.

Countis has a proposal before the Elections Board that requires students running for elected office to sign a paper saying that they understand when the meetings are and that they have that time available. Perhaps this will avoid further confusion in the future, she hopes.

Countis attributes the large drop in attendance to the fall election, which is held in the middle of the quarter.

"We had a big turnover—seven out of the eight who ran were new, and they weren't used to the new schedule," she said.

It seems that when the new members took office on Nov. 1, they could not work out a meeting time that was suitable for all because everyone had previously established fall schedules. So the legislature was unable to meet the last two weeks of fall quarter.

But Countis did not believe any important business was jeopardized.

The S.G.A. is required by constitutional law to meet only five times during the quarter.

"And we had done that by the time the new members took office," said Countis.

Most business had been taken care of by them. But the legislature did have to postpone a proposal on purchasing a projector for the Film Series until a majority was present.

And there was a problem with paying the salaries of the Student Program Council (S.P.C.), but they were able to approve this without a quorum. It seemed unnecessary to hold up paychecks before Christmas.

A quorum was present at the Jan. 8 meeting, the first held after the Christmas break. Also, two members decided to take a leave of absence for the winter quarter because of schedule conflicts. But one legislator will be asked to resign because of three consecutive unexcused absences.

It seems as if Countis policies have been effective.

UAH Decals Have A Defect

UAH said, "The faculty, students and administration of the School of Engineering are pleased that a start has been made toward relieving the critical space situation for Alabama's fastest growing engineering school. The ultimate solution to the School of Engineering's facilities problems are still far off in the future."

"However, completion of the first phase will enable us to keep up our momentum so that the high technology needs so important to the economic well-being of Huntsville and Alabama can be met."

The proposed building site is between Madison Hall and Research Institute.
1982 - A Short Year

by E. A. Urbans

As I was ringing in the new year with some of my favorite drunks in my favorite lounge, it occurred to me that last year had gone by very quickly. Could it be that 1982 was a short year?

After all, we have had a storm of all the names, and matter-energy, jobs, money, peace among men of good will—perhaps time, also, is in short supply.

I put the question to some of my co-celebrators. Enlightened by the spirit of the evening, they were happy to share their wisdom.

One gentleman with a paper streamer dangling from his ear knew for sure that '82 was the shortest year in history. He was young, he said, "there wasn't so much thing as 'not enough time—only a job well-done. Now folks ain't got time to build things right. By the time I carry something home, it's broke."

A man and woman for-trotting to disco recalled how they used to have time to earn enough money to pay all the bills.

"But by December, we realized that there would be no more time to make the cash to cover all our expenses, and we'd be in the red. We were stressed."

Then I spoke to a student who was drooping over the bar. He heaved and said that he had definitely been shortchanged in 1982.

"Last year I never had time to study for finals or get those papers in on time. Something should be done," he said.

In fact, he is organizing a new protest group, Pulpil for Perpetuity.

"And the first rally will be held at the end of January, or maybe early February, but definitely by mid-march before, or after, term break. If we can't get something going by then, surely at fall quarter."

"I don't want to see this shortage happen again in '83," he went on. "The future is ours and is not to be trimmed down by Father Time, or my father, or anybody else's father for that matter."

I sympathized with him as he ordered another drink and draped himself over the bar.

Looking for more opinions, I spotted a big brailer who was kicked around by a dozen empty beer pitchers. Thugan had an 18-inch neck and fists as big as boxing gloves.

He said he was in construction work and politics. I knew his judgments would be invaluable to my informal survey.

"I started noticing shorter years in 1969," he grunted. "But it got real bad last year. It's a pity, too. Why, I bet if President Reagan had the old-fashioned length year, he could have made his old-fashioned policies come off, and the economy would be tip-top."

"Now it's looking like he'll never have time enough with those shorter years. Poor guy."

As a tear of sympathy, or regret, fell from his blousy, bloodshot eye, I wished for a Man-Steele Kleenex to hand him.

Rather than risk a deluge, I moved over to the table-top dancers, to ask what they thought. But judging by the fit of her costume, I felt she possessed little faculty for the perception of any dimension, and her opinions would sharply skew my survey results.

However, I did speak with a young soldier who was captured by her performance. He seemed to be an expert on dimensions.

He said that "the Army's out of time and out of men. A few good men go you know where, and Real Men become wealthy corporate executives, or major stockholders in conglomerates. Actually that's where the trenches and fox holes are anyway—Wall Street, business, money. It's too late for the Army."

So there it is.

My hunches confirmed, I understood why we aren't getting as much done any more. Well, why the human race seems to be running behind. Not because of some intrinsic flaw in our nature. No. But only because the years are getting shorter—we're running out of time.

Letters...Letters...Letters...Lette

To the Editor:

I have been made cognizant of the mediocrity dominating the atmosphere of what was once an imaginative campus community. In an effort to revitalize at least one minuscule aspect of your education, I was requested to make this small contribution to the exponent.

Before I returned to finish my education here, people told me I might find it difficult to communicate with the local campus frame. At first I said this could be attributed to the usual and expected generation gap, but they assured me it was primarily due to a quality decline among those coming out of high school. In diseases, I enrolled, only to discover, to my dismay, it was not only, but was further accounted by a lack of motivation to improve on the part of the students.

Evidently students, and possibly instructors, have forgotten what a college education means. Colleges and universities were originally founded to teach students to think, not merely to serve corporate America, or encourage students to regurgitate information parrot. If you leave having never questioned anything was required of you in class, you may have a degree, but not an education.

You seem to lack that self-doubt, that introverted inquisitiveness which is so vital to the learning process and the acquisition of knowledge. This is no where more evident than in the exponent office itself, with the possible exception of one woman who sits near the rear of the room. Enlightenment is virtually impossible when you are constantly met with "I don't need that. I don't want to know that."

Who would have believed such mental stagnation would ever be found on a college campus? It is the hallmark of our society to ask questions which leave nothing sacred. Yet, no one dares to do this.

None of this is meant to imply that I, myself, am an infinite reservoir of knowledge and wisdom. Far from it. It is not knew that the patient thereof, which is the essence of education, and at least and I hope I never learn it all. If you find this article to be insulting, so be it. After all else has failed, seems irritation is the most effective means to get through, albeit not the most desirable.

There is most in abundance to chew on for those daring enough to do so. To name a few: the erection of barriers separating church and state; the disturbing parallels to extreme conditions in the thirties; the dangers and benefits of allowing corporate mergers; who and what are the leaders of our nation? In society at all levels? the plight of the poor, the unemployed, the minorities today; the curious conditions surrounding the fact that over 80 percent of the nation's wealth is held by 1% of the population.

So You're Opposed Again

JOBS CAUSE INFECTION

AND THIS ADMINISTRATION IS KEEPING EMPLOYMENT UNDER CONTROL

So You're Opposed Again About the Deficit

We've Proved That Deficit Don't Cause Infection.

So You're Opposed Again

AND THIS ADMINISTRATION IS KEEPING EMPLOYMENT UNDER CONTROL.
by Nancy A. Parker

Is there hope for 1983? Reflecting on 1982, was it a good year? Was it a bad year? The answer depends on where you were, who you were, and what you were doing.

The whole world watched with bated breath as England bailed Argentina for the Falkland Islands. A sigh of relief was heard around the world when the conflict ended. Part of the world was happy about the outcome. And part of the world felt the agony of defeat.

Soon after their victory in the Falklands, the British got another grand prize—a baby. Tiny Prince William, future heir to the British throne, arrived without pomp and circumstance but was a welcome reprieve from what Great Britain had just gone through.

America quaked with both alarm and shock at the outcome of the Hinckley trial. However devastating the decision was, a few eyes may have been opened, and a challenge was revealed, concerning some of our decadent laws.

We have watched television for many years. A short while ago, Lee Majors was a hit as the bionic man, "Six Million Dollar Man." Seeing that show, many people stopped and thought that nothing like that would ever be really possible. However, 1982 brought America its first real bionic man. Doctor Barney Clark received an artificial heart. At this writing, Doctor Clark is still living proof of how far we have come in the medical and scientific fields. We now know that a bionic man is, indeed, possible.

Eastern involvement in 1982 caused mixed emotions. The Cold War continued to rage, and the world was on the brink of another major conflict.

The economy was in a state of flux, with high inflation and unemployment rates. People were out of work, and the future was uncertain.

In the political arena, the Watergate hearings dominated the news, and the scandal surrounding the administration of President Richard Nixon continued to unfold. The hearings were televised, and the public was able to follow the proceedings in real time.

The world was also dealt a blow in the form of the Jonestown mass suicide. Over 900 people, members of a cult led by Jim Jones, chose to end their lives together.

In sports, the Los Angeles Dodgers won their first World Series championship since 1965. The San Francisco Giants, under the leadership of manager John McVay, made a strong showing in the playoffs, but were ultimately defeated by the Dodgers.

The year 1982 was a time of great change and uncertainty. It was a year of both good and bad news, and it challenged us to look forward to the challenges of the future.
Assistance Provided To Locate A Summer Job

The UAH Career Planning and Placement Office offers assistance to those students seeking information on summer opportunities.

The CPAO, with assistance from the Recreation Department and SGA, is tentatively sponsoring a Summer Opportunities Fair for Feb. 24, 1983 to be held on campus. Further information is available by contacting David Howard, Placement Assistant.

The Southern Forest Experiment Station is accepting applications for temporary positions which are expected to be filled in 1983. Employment duration is from 1 to 3 years, depending upon the particular job and number of days worked per week. Included are biological, range, forestry, engineering, and physical science aid and several aid positions at GS-2 through GS-5. (In Alabama, the research stations site is located at Florence.) However, this announcement covers sites in eastern Texas, Arkansas, Louisiana, Mississippi, Tennessee, and Puerto Rico.

All Applications must be postmarked by Jan. 15, 1983. EARLY APPLICATIONS ARE ENCOURAGED!

U.S. Army Aberdeen Proving Ground in Maryland is announcing temporary summer employment opportunities (13 May 1983 through 29 Sept. 1983).

Summer positions include clerical jobs, GS 3/5; non-clerical jobs, GS 2/3/4 (engineering technician, engineering aid, mathematics aid, physical science aid, biological aid, and several aid positions in psychology, procurement, drafting, editing, and pathology); and professional jobs (GS 7/8/9 and above) which require a minimum of 4 years of college. These professional positions include engineering, technical, scientific, and professional work in science, math, education, computers, biology, and medicine.

The Health Careers Opportunity Program (HCOP) is part of a continuing national effort to increase the representation of minority and disadvantaged students in the health professions. Through the HCOP, the University of Tennessee Center for Health Sciences in Memphis is sponsoring an eight-week summer enrichment program for motivated students with a strong interest in medicine, dentistry, or pharmacy.

Students accepted into the program will receive free transportation, a per diem fee, books and supplies, and free tuition and fees.

The deadline for receipt of application materials is Feb. 1, 1983.

Applications for all above opportunities are available at Career Planning and Placement, 139 Continuing Education Building.

The Office of Naval Research has announced its 1983 Graduate Fellowship Program for study and research leading to doctoral degrees in the disciplines of electrical engineering, computer science, applied physics, and mechanical engineering. ONR will pay full tuition and fees. The application deadline is Feb. 15, 1983. For application forms and information, contact: ONR Graduate Fellowship, American Society for Engineering Education, 11 Dupont Circle, Suite 200, Washington, DC 20036.

Annual Casino Party

Ranger Corps Accepting Applications

by Nancy A. Parker

What does the Huntsville Police Department do? What are its problems? What are its goals? How do you become a Ranger and find out?

Chief Bal Vizzi has recently made an announcement that HPD is taking applications for the Ranger Corps program.

Young people interested in becoming aware of the problems and goals of the police department can take an active part in this program. "Students who are interested in law enforcement careers will find this program a very helpful asset," said Officer Ben Jennings, of the Crime Prevention Unit of the Huntsville Police Department.

"We are in hopes that we can get people interested," said Jennings, "and that the program will be a success. People from ages 16 to 20 may qualify for the Ranger Corps if they are in school either as full-time high school students or as full- or part-time college students. The program is open to all students with a "C" average or above," said Jennings.

Members of the Corps are considered an essential part of the police department's manpower force. Members work patrols, road races and other events which involve large numbers of people. Rangers can assist in radio rooms and other offices throughout the police department.

All jobs are voluntary. "The students will participate in some form or fashion in every phase of law enforcement," said Jennings. "Every aspect of police work is learned through the program."

"Our goal is to have young men portrait police, however. "We never intentionally expose the Rangers to a hazardous-type situation," said Jennings.

Call Officer Jennings at 532-7206 if you are interested in becoming a member of the Ranger Corps.

Employment Assistance

"Students' work experience during college," reports the Journal of College Placement (Fall 1982), "is becoming a vital part of career development...employers now expect (college) graduates to have work experience in addition to academic credentials. Many employers have corporate education and internships to provide a practical component to classroom theory."

However, summer employment should not be overlooked. Summer jobs can help students confirm their choice of major or consider alternative majors. Summer positions are available on a part-time or full-time basis.

Call or visit: Terri Brown, College Placement Office, 340 Foster Union, 289-4157.
Homecoming Queen - Qualifications

If your club or organization wishes to nominate a candidate for the 1983 UAH Homecoming Court, the following information will be helpful.

Nomination (maximum of one per organization, if applicable) may be made by UAH clubs and student organizations. Persons not belonging to a particular organization can and are encouraged to nominate candidates of their choice. For these individuals, nominating forms are available in Room 301 of the Union Building.

Minimum Qualifications for nominees are that they have at least an overall Q.P.A. of 1.0, that they have attended the University of Alabama in Huntsville for at least one academic year, that they must be a junior or senior, and that they are required to be a currently enrolled UAH student, taking six or more hours.

Application

For Graduation

This is just a gentle reminder to all UAH students who will be graduating in 1983, from Nan G. Hall, University Registrar.

Anyone who expects to complete requirements for graduation must complete an application for degree. Forms are available in the Office of Admissions and Records. There is a $15 fee required when the form is submitted.

Response time on application for the bachelor's degree varies from three weeks to two months (fortunately), depending on the department involved. So this is, essentially, a "last call." Please apply NOW.

We accept VISA and MASTERCARD

Wednesday, January 12, 1983, exponent 5

For each candidate, complete a "UAH Homecoming Queen Nomination Form" which is available through your club or organization or at the Department of Student Life, Room 301, Union Building. For additional assistance, or further information concerning UAH Homecoming Festivities, please call 895-6445.

Return the completed form to the Student Life Office in a sealed envelope no later than 4:00 p.m., Jan. 17, 1983.

Nominees will be asked to interview with the Selection Committee on the evening of Jan. 18, 1983.

After all interviews have been completed, the Selection Committee will narrow the field of candidates down to five women. These will become the 1983 UAH Homecoming Court.

Notification of those nominees selected for the Homecoming Court, as well as those not chosen, will be completed by Jan. 19, 1983. Photographs of the five finalists will be taken on Jan. 20 at 10 a.m.

Official announcement of the Court and the Queen will be made on the evening of Jan. 29, 1983, at the Homecoming Festivities at the Von Braun Civic Center.

If any organization wishes to participate in the "Free Standing Sign" competition for Homecoming, they must fill out an application at the Department of Student Life before 4 p.m., Jan. 18.

The contest theme is: Hockey - UAH (Chargers) vs. Tennessee Volunteers. Entries will be judged on their effectiveness in incorporating theme with art. Signs must be completed by noon on Jan. 24 in order to be eligible for judging.

Further information on materials, limits, awards and scoring may be obtained at Student Life.

New Members

fraternity house.

The high point of 1982 for ATO was the Sixth Annual Halloween Party. Nuke the Whales provided the rock and roll. Over 300 people attended, making it the most successful ATO Halloween party ever.

Considering how good 1982 was to ATO, 1983 looks even better.

As long-time member Roscoe E. Parrott says, "The fraternity is financially sound, the house never looked better and the fraternity is not on probation or anything like that."

Alpha Tau Omega -
FITZCARRALDO
Masterpiece of Imagery
by Bill Savage

"Fitzcarraldo," the latest epic by German film maker Werner Herzog, is a masterpiece of imagery.

The film is a story of a man named Fitzcarraldo (played by German film star Klaus Kinski) who dreams of bringing opera to the Amazonian jungle city of Iquitos.

Specifically, he wishes to build an opera house in the jungle so that his idol, Enrico Caruso, (the first opera performer ever to record) may sing there.

The only solution to his dream is to become a rubber baron in an already well-exploited jungle.

He does gain some financial assistance from his lover, Molly, (played by Claudia Cardinale) who just happens to run the local whorehouse.

"Fitzcarraldo"s dream is considered impossible by his associates, as the completed filming of "Fitzcarraldo" appeared impossible to Werner Herzog's film crew, actors and financial backers.

The entire film project took five years to complete, and encompassed financial setbacks, low actor morale and other disappointments extraordinary even for Herzog.

The talent and time Werner Herzog put into the making of "Fitzcarraldo" is apparent on screen. Each scene, each frame, is a beautiful image, so clear and so well defined it is hard to believe.

One of the images which some may find hard to believe is the climactic scene of the film where Fitzcarraldo attempts to pull (with the help of natives) a steamship up a 40 degree incline. The feat was one of the reasons for many of Herzog's frustrations with the film.

"Fitzcarraldo," indeed, is one of the best movies playing in town currently, and probably one of the few foreign films (there are subtitles) that will play in Huntsville this year.

History Forum

The UAH History Forum begins its lecture series, "The World After Darwin," on Thursday, Jan. 13. These programs will take place in Room 419 of the Humanities Building at 12:30 p.m.

The first lecture will be Dr. Nigel Barham of the Oakwood College History Department. He will discuss "England at the Time of Charles Darwin."

The second lecture will be Dr. Robert Lascow of the UAH Biology Department. He will describe "The Darwinian Contribution to the Development of Biological Sciences" on Jan. 27.

Dr. Donald Armentrout, of the School of Theology of University of the South, will present the third lecture, "Darwin and Theology in the U.S.," on Feb. 10.

On March 18, Dr. Johanna Shildes of the UAH History Department will give the fourth lecture, "The Impact of Darwinism on the Social Sciences in the U.S."

The last lecture will be given on March 24 by Dr. Nancy Lawton, a visiting scholar to the Biology Department at UAH. Her topic of discussion is "Darwinism and the Evolution of Moral Sense."

Although admission to the lectures is free, membership dues for the History Forum are two dollars for the year. The public is invited and encouraged to attend this year's History Forum.

New Year's Resolutions
by Scott Turner

New Year's Resolutions were "stupid," he thought. "New Year's resolutions are for people with faults. I have none!" he never really thought about it, or thought New Year's resolutions were just "stupid." Are New Year's resolutions just too personal, or is making a New Year's resolution really just "stupid?" When this reporter asked a few other people if they thought New Year's resolutions were "stupid," he received several answers as, "New Year's resolutions are only for people with faults. I have none!" "I never really thought about it. No one in my family has ever made one."

"New Year's resolutions went out with the 80's; and "New Year's resolutions are just for people who admit weakness that they will never break.'

There were a few people who were willing to voice their resolutions. But most did not want their names published. Of the six who admitted making a resolution, three wanted to cut down on their drinking, two said that they needed to have better study habits, and one said that he wanted to "speak better."

It seems that at the start of another year, people ought to think back on what they did the year before. While reflecting back on the past year, we see what we are proud of, and what we began so proud of. And whether we want to or not, we "resolve" what we want to do in the coming year.

Maybe people are just shy about making their New Year's resolutions public, or maybe we are just losing a tradition. Whatever the reason, I resolve this year to keep away from student opinion polls when at all possible.

Our Chargers Are Winners
by Karen Saunders

The Chargers began the New Year with a winning streak last week as they took each of their opponents with unquestioned ease.

U.A.H.'s first match against Lee College, Monday, Jan. 8, proved the Chargers to be on top as they defeated the Vikings by a 33-point lead, making the final score 91-56.

Montevallo could not get past U.A.H. either, as they fell to the Chargers the same week. Both the men and women's teams defeated their opponents in a double-header at Spragins Hall, Jan. 6.

The No. 10-ranked Lady Chargers came through once more as they defeated the Montevallo women's team 77-48. The Charger men's team did as well, with a 12-point victory, making the final score 70-58 over Montevallo.

Talent Show
This weekend...
The 3rd Annual UAH TALENT SHOW
Saturday,
IN THE UNION
January 15 9:30pm
JAMES STEELE AND GLENN WILLS' WARDROBE FURNISHED BY
BURCH AND HATFIELD

by E. A. Urbans

Come one, come all to the greatest show on earth as Cabaret presents their third annual UAH Talent Show! Mark your calendars for Saturday, Jan. 15, 9:30 p.m. to 12:30 a.m. If you want to enjoy entertainment performed by our own UAH students.

The show was conceived as an opportunity for students to share their talents and also as a chance for S.G.A. to scout for acts for Cabaret.

Students who want to test their talent before an audience can gain some publicity and exposure that perhaps may lead to opportunities, not only for performance in Cabaret, but for referral to Springfest Board or the All-American Collegiate Talent Search.

Applications are accepted up to a week before the show and limited to UAH students. If yours is not a solo act, at least one member of the group must be a UAH student. Auditions are held only if there are more applicants than can be staged in one evening.

If you are too late to be in this weekend, begin your plans for next year.

Talent Show

Alumni Phonathon
Any group or organization on campus is invited to participate in the third annual UAH Alumni Phonathon. The phonathon will be held on Jan. 15-20 and Jan. 30-Feb. 3 at the Nookie House.

The UAH Alumni Association is soliciting money from our alumni to support student scholarships and alumni association projects (Village Singers, UAH Hockey and Career Planning and Placement, etc.).

This year, participating groups will compete for a $20 scholarship to be awarded to the group that solicits the most money in pledges during the phonathon. The award may be made to any club member or members, according to any criteria you choose.

All participating groups will receive a scholarship of $150. Last year, Kappa Delta won the top award of a $500 scholarship.

Applications will be processed by SGA Pim Serw and the SA/PC. Applications must be turned in to the Office of Alumni Affairs at 866-6500 by Jan. 7 to reserve a date.
