Lady Chargers Are Winners

by Virginia Letson

Congratulations are in order for the great season put in by the UAH Lady Chargers basketball team. Although they did not win the national championship, they deserve applause for winning the runner-up trophy in the third annual NAIA Women's National Basketball Tournament. They put their best effort into winning but lost to the Lady Bulldogs 80-68, which gave them second place—still quite an honor. This is the first time the Lady Chargers have played in the national tournament and they performed superbly.

They won their opening round game with Campbellsville, Ky., 76-66 by turning around a 40-32 half-time deficit. The Lady Chargers came to the Campbellsville tournament with an eight-game winning streak. UAH defeated No. 6, nationally ranked Central Arkansas 85-80 in overtime in the first round of the Area 5 tournament at home.

The next evening, UAH won 67-63 over No. 2 Berry College.

The Lady Chargers then advanced to the finals of the third annual NAIA Women's Basketball Tournament, with a victory over the University of Portland. This was their tenth win in a row.

UAH coach Donna Caldwell is a former UAH player. She still holds the school single-game and season rebounding records.

Last year's coach, Dennis Killips, coached the team to a 22-8 record. Killips is now UAH athletic director. Starting line-up at the Campbellsville game included: seniors Lib Crutchler and Sarina Toney; sophomores, Susan Rollins and Dawn Miles and either freshman Annette Fletcher or Bonita Scott; sophomores, Ernestine Carter, Leslie Turner and Pam Smith; also freshman Julie Grace.

SGA Spring Elections

by E.A. Urbans

The political office you've dreamed about is waiting for you! Declare your candidacy between April 1 and April 8 at noon, Student Union, Room 201, for SGA Spring Elections. Perhaps executive power is your desire. The SGA President is in charge of developing the overall SGA budget of approximately $150,000 which is collected from all activity fees; oversees the Student Program Council, serves on the Student Affairs Advisory Board, Publications Board, Elections Board, and has signature authorization over all SGA accounts. As the Student Representative, you influence the funding of programs you think UAH students want.

If your aspirations are not quite so lofty, there is the position of SGA Vice President. As liaison between all students and the SGA Legislature, you coordinate bringing campus organization budget requests before the Legislature. You also reside over SGA meetings and serve on the SGA Affairs Advisory Board and Executive Committee.

You say that there is a bit of the scrivener in you? As SGA Legislative Secretary, you would be responsible for recording SGA minutes and handling SGA correspondence. Also, you would serve on the Executive Cabinet.

Grassroots folks might enjoy serving as SGA Legislators. The biggest responsibilities are allocating funds and setting policy for campus organizations.

Welton Wilson, current SGA President and former Legislative Secretary, says, "I don't think you have to have experience. Sometimes people say that they are afraid to run, but if you know what people like, what the average student likes, that is what is most important. I think being Legislator is most fun because you get to vote on everything."

So run for Legislators and have a direct say in campus affairs. Maybe you are one who likes to give advice. The Student Affairs Advisory Board needs positions filled. The Board's purpose is to advise and make recommendations to the Vice President for Student Affairs on all relevant aspects of student life, according to the SGA Constitution. This is an opportunity to work with faculty, as well as students, and to represent the student body in the administrative workings of the university.

Or if you are looking to exercise your journalism or public relations talents, perhaps the Publications Board or Exponent Editor is where you can serve. The board sets the policy and regulates what is published on campus.

Do you have accountant tendencies? The Midas Touch? If so, the SGA could flourish under your reign as Finance Officer as you oversee all SGA accounts.

Finally, for those of you with good judgement, there are positions on two student judicial boards, the Hearing Board and the Appeals Board. Members of these boards make decisions on disciplinary issues, charges and appeals brought before them. Their purpose is "to ensure that the rights of students are protected and the standards of conduct for students are upheld," the Constitution says.

LETTER TO THE EDITOR

To the Editor:

Your article “Commencement Nears; Caps, Gowns Here” in the March 16 exponent may cause some concern among students, since it notes a reservation deadline of March 15 for caps and gowns. The article is the text of a memorandum to UAH faculty and staff and is not relevant to students.

Student gowns are available in the Book Nook four weeks before the May 28 graduation ceremony, do not need to be ordered or reserved, and do not have to be returned to the University after commencement. Bachelor cap and gown prices ($14.95) are the same for gowns purchased as the prices paid by faculty for rental items.

I will be glad to provide any additional information you need regarding commencement items.

Michael Boyd
Bookstore General Manager

Editor’s Note: Although the word libel is used in the following letter, no legal action has been taken to our knowledge.

To The Editor:

This is in reply to Mr. George Cunningham’s Letter to the Editor in the March 16, 1983 issue of the exponent. Normally, I would let this one slide because when one assumes a position of authority such as mine, criticism becomes part of the job. However, Mr. Cunningham not only stretched the truth concerning my programming efforts, he also libeled me. He should consider himself lucky that I have no interest in pursuing this from a legal standpoint, because I can assure him that I have a case.

How, you may ask, did he libel me? Quite simply, his statement about film selection is not the most pints of blood. The club or organisation that wins will receive an engraved plaque.

I would like this blood drive to be the most successful that UAH has ever held because the Red Cross needs our help. Last fall, the blood drive was not very successful and local high schools have had greater participation than UAH.

Please come out and support the American Red Cross by giving blood. Encourage your friends to give blood, also.

Mark Chandler
Director of Student Services

---

Letters

To all UAH Students:

The SGA in conjunction with the American Red Cross is sponsoring a blood drive to be held on April 11 in the Student Union Building from 10 a.m. until 4 p.m. There will be a contest for all clubs and organisations. The winner will be whoever gives the most pints of blood. The club or organisation that wins will receive an engraved plaque.

I would like this blood drive to be the most successful that UAH has ever held because the Red Cross needs our help.

Last fall, the blood drive was not very successful and local high schools have had greater participation than UAH.

Please come out and support the American Red Cross by giving blood. Encourage your friends to give blood, also.

Involvement - Includes Everyone

--- Nancy A. Parker
exponent staff writer

Involvement.

That seems to be the key word on campus nowadays. I hear it everywhere I go. Everyone needs to get involved, but as we have always said about the weather--"No one does anything about it."

This editorial started out to be a poll, not an editorial staff. It started out as an article with quotes from hundreds of students around campus with their ideas about what the exponent should print. We, the staff of the exponent, even ran a nice page 2 on Wednesday, Jan. 30, 1983, asking for comments to be sent to the exponent by Feb. 9.

Do you know that out of approximately 6,000 students, including graduate and undergraduates enrolled at UAH, and nearly 600 faculty and staff members of Film Makers Co-op, there were not one word came to our exponent door critcizing or offering comments about what the exponent should print. We, the staff of the exponent, even ran a nice little article on page 2 on Wednesday, Jan. 30, 1983, asking for comments to be sent to the exponent by Feb. 9.

Do you know that out of approximately 6,000 students, including graduate and undergraduates enrolled at UAH, and nearly 600 faculty and staff members of Film Makers Co-op, there were not one word came to our exponent door critcizing or offering comments about what the exponent should print. We, the staff of the exponent, even ran a nice little article on page 2 on Wednesday, Jan. 30, 1983, asking for comments to be sent to the exponent by Feb. 9.

As far as the poll is concerned, students who were asked questions either gave an evasive answer, or turned an unconsidered shoulder to our queries.

What gives out there, people? Don't you care about what goes on at your Alma Mater?

The exponent average 10 to 12 pages each week of publication. A lot of work goes into the paper from students who have other full-time or part-time jobs. They are UAH students taking one course or full load. The paper is run by people with responsibilities other than work and school, such as family and community work. We give the exponent a lot of our time. We need to know that that time is not wasted and that our words don't fall on blind ears or deaf ears.

In my years at UAH (I am a part time student), I have heard ugly comments against the exponent. Questions have been asked: "Why don't you print this?" "Why don't they print that?" I have seen students reading the exponent, later casting it onto the ground with an air of diagreement.

We gave you the opportunity to speak, to get involved. Why didn't you?

Not only does the lack of concern at UAH bother me, but I know well that the exponent could be an outstanding newspaper if more people were involved.

You don't have to be on the staff, you don't have to be a reporter or a photographer or a copy boy to become involved. Be a concerned citizen of the UAH community and show some spunk and get involved.

How? Simply this. We need information for the exponent. We need new and interesting ideas. Our limited staff can not be everywhere, but you are.

We want to know about meetings, interviews, awards, successes. We want to know about outstanding students and dedicated UAH faculty and staff members. We want to know anything that will be of interest to any member of the UAH community.

We don't believe that garbage such as gossip or defamation of character is good news or worthwhile information. But a letter to the editor might invoke a "look-see," on which we could build a story, if other sources can be found to back up an investigation or a contro- versial item. Again, it would be up to you to be willing to become involved as a source.

Who knows what UAH is going to become in the future and what fraternities are here at UAH? Who knows about the preschool? Who knows anything about student fees and tuitions? Who knows what UAH is here for?

We, the exponent, are not here to tear down. We are here however, to be the information vehicle for the University.

The exponent is located on the second floor of the Student Union Building. Our telephone number is 895-6000. Call or come by.

A scrap of notebook paper with an idea or bit of factual information to us would be most helpful. Something useful written on a brown paper sack would be delightful to see. After all, Ernest Hemingway wrote his editors that way.

The exponent represents a university that is fast becoming a highly recognized school in the academic world. UAH is growing. The campus newspaper needs to grow with it.

I realize that UAH is quite different from a high school, and with 7,000 people milling around from one class to another on all hours six days a week, it is virtually impossible to know everyone and everything that is going on. That is why we need an outstanding newspaper. That is why we need involvement.

Involvement, on students, faculty, staff, and the UAH community is there. You are university students. You can read and write. We can't move until you do.

There is a world around your space. Open your eyes and ears and GET INVOLVED!
Richard S. Moore - UAH English Professor

by Charles F. Blakely
exponent staff writer

"Take an interest in American literature, mountain-climbing, film, American and interdisciplinary studies, combine them with a genuine concern for education, and you will have a microcosmic view of Richard S. Moore, Associate Professor of English at UAH.

He earned his B.A. from Brown University and his M.A. and Ph.D. at Duke University before coming to UAH in 1975.

Dr. Moore is a specialist in American literature of the 19th century primarily, and secondarily in film, film theory, American studies and epistemology (the theory of perception and the acquisition of knowledge).

He teaches the American studies minor in conjunction with Dr. Shields of the History Department. The American studies minor is a hybrid pursuit. It is a collection of elective options which bring the various disciplines of history, political theory, and The Arts to focus upon one subject: American culture.

Dr. Moore has also presented a sequence of film classes on American film and international film and theory. This spring, his focus will be Masterpieces of International Film. Among the films studied will be "Ugetsu," "The Bicycle Thief," "Hiroshima, Passenger," "Autumn in the Swiss Alps," "La Strada," "The Bicycle Thief," "Hiroshima," "Mon Amour," and "Alexander Nevsky."

He has recently published a book entitled "That Cunning Nezvsky." This work covers epistemology, aesthetics, painting, theory of Nature, the relation of science to literature and other matters.

Concerning Melville, Dr. Moore relates, "Melville is a major area of scholarship and will continue to be so. Only Faulkner rivals him in the quantity of dissertations produced. My interests are now changing to develop studies in 19th-century intellectual history, including Melville, but not focusing upon him."

Dr. Moore is also interested in William James, Soren Kierkegaard, and Henry Adams, who "wrote at the juncture between the 19th century and Modernist culture. That juncture interests me now," Dr. Moore says.

Melville, Dr. Moore elaborates: "Melville maps out the collapse of Romanticism-a complex of romanticisms. These include Romantic political theory, psychology and aesthetics. I think that is why he compels and attracts so much interest. There is a certaincrudeness and power to his genius that makes him peculiarly American."

Concerning UAH, Dr. Moore says that it was fortunate that UAH, being a young school, had not the time to dismantle its general education requirements during a time when the focus on specialization encouraged many universities to relax their requirements. He is in favor of maintaining and strengthening these requirements, because it is important for a student to be able to write proficiently, as well as to solve mathematical problems. Students should be well-rounded, not knowledgeable only in their major field and ignorant in the rest. This focus on specialization creates interdisciplinary jargons which separate disciplines from each other.

Concerning UAH students, he adds, "We are contending at UAH with problems of time, compensation, scholarly resources, etc., but we haven't a problem with the student body. There are students here who can match those at the very best institutions in the nation. I taught as a graduate assistant at Duke and I prefer the UAH students to those at Duke."

Dr. Moore concludes, "I believe in public education all the way through the graduate level. I believe in the cultivation of talent and intelligence against barriers of class and privilege. UAH faculty expend more energy in their teaching than any other institution that I have been exposed to. I think the teaching profession is the most draining and the most fascinating, but finally the best profession there is."

GUINNESS BOOK OF WORLD RECORDS
The brand new edition!
New Engineering Building

by Scott Turner
exponent staff writer

UAH engineering students should have their own building very soon, according to Dr. Joseph Dowdle, Vice President for Administration.

The $4.5 million project could be completed as early as December of 1984. This means the building would be ready for the winter quarter of the 84-85 academic year.

A major problem facing UAH now is teachers. Will there be enough teachers for the new building?

In the past, college faculties have been partially dependent on subsidized programs which allowed graduate students, while pursuing their advanced degrees, to teach classes, or serve as teaching assistants to help with their expenses.

Now, however, job opportunities for people with bachelor’s degrees in engineering are so attractive that there is no incentive to stay in school. Those who do stay often do so as part-time students while they work at other jobs.

Dr. Dowdle does not think this will be a problem by the time the building is completed.

He says, “they’re recruiting and employing teachers right now,” and there should be plenty of teachers by December of 1984.

Under the current plan, the university will lease the space for the building to a public educational authority, which will then issue bonds for construction and lease the building to a contractor. The contractor will then sublease the building back to the university. The advantage to UAH is the lower payments that will result.

The $4.5 million cost of the new engineering building includes: $3.8 million for construction costs and $.7 million for furnishing and architectural fees. The building will contain 60,000 gross square feet and about 40,000 square feet of classroom, laboratory, and office space.

There will also be an additional parking lot with a capacity of about 400 cars.

The building will be built in the area just north of the Research Building. Construction is slated to start in October of this year.

Industrial Engineering Conference

Dr. Jack R. Walker, faculty advisor for IIE Student Chapter No. 901, along with President Jackie Ceci and other IIE members Mark Hoffman, Shirley Veal, and Karen Sullivan journeyed to Mississippi State University to attend the 1983 IIE Region VII Student Paper Competition Conference on March 4, 1983, where Shirley Veal and Karen Sullivan presented a paper entitled, “Analysis of GNC Bag Dump Operation.” They received first prize for their paper, which was a monetary award and a certificate.

Their winning paper will represent the Region VII area in national competition at the 1983 Annual Industrial Engineering Conference to be held at Louisville, Ky. on May 30. It was also presented at the SMC Bag Dump Operation held at Louisville, Ky. on May 25, 1983.

UAH Co-op Program

by Virginia Letson

“It’s economics, the law of supply and demand, that determines the needs of an employer,” stated George Turnmeyer, Director of the UAH Co-op Program, speaking about projects for UAH students who desire to co-op.

He went on to explain that the primary needs of companies in Huntsville are for engineering students. Turnmeyer said that the demand is for engineers in the Co-op Program at this time.

The Co-op Program at UAH is valuable to both employer and employee, Turnmeyer said. It is a source, for the businessman and industry, of highly qualified and professional employees. It is an opportunity for science and engineering co-op students to work with qualified people in technology, since UAH is in an area which is one of the country’s leading technology centers.

Co-op opportunities are also made available outside the Huntsville area, in cities throughout the Tennessee Valley.

Classroom learning is combined with on-the-job training. Also, most co-op students enjoy continuing employment with the company after graduation and are better prepared for the responsibilities of full-time employment.

President Wright stated, in a report to the Board of Trustees in 1982, "In a report addressed to General George Turnmeyer, Director of the Cooperative Education Program, and former Commanding General of Redstone Arsenal, the evaluator said: This is the best managed small cooperative program the evaluator has ever had the experience to review."

Turnmeyer visits local companies periodically and presents the qualifications of his students to business and company heads. He literally sells the employer on the idea of hiring his applicants.

In September, Turnmeyer added the latest program, one for nursing students. Eighteen nursing students are now at Crestwood and Medical Center hospitals.

**Fund Raising Campaign**

The Annual Fund-Raising Drive of the University of Alabama in Huntsville is aiming to raise $200,000, primarily to be used for scholarships, according to Loretta Spencer, chairman of this year's campaign. Mrs. Spencer is being aided in her efforts, which will continue through the first week in April, by Bill Brooks, chairman of business and industry solicitation; Carol Ann Samples, chairman of the "Friends of UAH Campaign" and approximately 50 other volunteers from the community.

The UAH Annual Fund seeks contributions from private sources to support priority programs and projects for which other funds are not available. Contributions are not used for general operating expenses. Rather, they are used to enhance and enrich the educational, research and public service missions of the university.

Most of the funds will be used for scholarships, but gifts can also be earmarked for student loans, laboratory equipment and departmental support.

To discuss any aspect of contributing to UAH, interested persons can contact the Office of University Development at 895-6500.

---

**Charger Basketball**

by Virginia Letson

At the end of another season of basketball, congratulations are in order to the Chargers for a successful win.

At the end of this season, UAH had a field goal percentage of 37.6 and hit 14 of 16 free throws.

"It was nervousness," Ricky Oates, UAH senior center said about the tournament loss. There was a lot of pressure on us playing the No. 1 team."

Coach Willis said, "They're a good ballclub, but I don't think they're as good as we made them look in the first half. I don't think they have as good a ballclub as we had here two years ago. And that's not sour grapes. We had a seasoned team with six seniors."

---

**Photo I.D. Validations**

All students must have a valid Photo I.D. for the Spring Term in order to use the Library, to participate in student elections, athletic events and all functions for which a student may be entitled to special privileges.

Students should retain their current paper Activity Card. The Activity Card is used in conjunction with your Photo I.D.'s to secure tickets for special events sponsored by the S.G.A. and the university (i.e. play, concert, etc. costs, etc.). The Activity Card is punched when you receive these tickets, and, therefore, it is very important to keep it with your Photo I.D. for future use.

New Photo I.D.'s can be made and old Photo I.D.'s validated, on March 30 (today which the last day) from 9 a.m. until 5 p.m. in Room 106, University Union Building. Please bring driver's license and current activity card to verify identity.

Additional information may be obtained by calling 895-6445.
Lancers Nominations

Following tradition, each year outstanding students are chosen for their leadership achievements to serve as one member for this prestigious position. Or, any student interested in being considered for membership can submit an application. Applications are available in the Office of Student Life in the University Union, the President’s Office in Madison Hall, and the Information Booth in Morton Hall. They should be completed and returned to the Office of Student Life or the Information Booth by 5 p.m. on Thursday, March 31. Initial interviews for selecting the 1983-84 Lancers will be held April 7. Final selection will be held April 14 at a reception at Echols Hill. If you should have further questions, please call Carol Martin at 895-6127.

public relations representatives for our University. The Lancers greet and introduce the University to many visitors and play an important role in helping major events on and off campus run more smoothly. Students are selected each year to serve a one-year term. Nominations for the 1983-84 Lancers are now being accepted. Organizations are being encouraged to nominate

Uriah D. Coors invents the first Coors Beer beer can just in time for spring break.

The fresh, clean taste of Coors Premium and Coors Light is rewriting history.
Have you noticed a new, little something in the Student Union this term? The UAH Photography Club has installed a display cabinet of photos taken by club members for our enjoyment and their exposure in the Union this past week.

A new group, organized in the fall of 1982 by Gene Garrett, the Photography Club is eager to recruit members. "The Photography Club is for anyone interested in photography, or anyone who enjoys looking at photographs, or even if you just want your picture shot," says Garrett. "This is a way to enter the medium," says Woody Hein, club president. So experience is not a prerequisite, only interest, he adds. Meetings are held on the first and third Tuesdays each month at 8:15 p.m., in Morton Hall, Room 129. One meeting each month is a program on photography presented by professionals in art or photography, illustrating their approach to the medium. The programs are varied from basic to complex levels of difficulty, so all members can learn new techniques.

The other monthly meeting is devoted to a photographic competition among members. These photos are then displayed in the Student Union. Another important activity is the "shoot-out." The group makes an outing to a location, such as Old Stone Fort State Park in Tennessee, and spends the day shooting pictures. In this way, members share photographic techniques and tips.

As Garrett says, "You can learn everything about your camera in a couple of hours and then spend the rest of your life learning how to take pictures."

The club would also like to offer its photographic services to all UAH groups and organizations for only the cost of materials. If you need pictures taken, this is an economical way to get it done. And if you like the photos in the display cabinet, you may be interested in the photo exhibition at the UAH Art Gallery, April 4 through April 7. There will be 25 to 30 prints and a continuous slide show.

Anyone interested in UAH Photography Club membership or services should contact Woody Hein, at 895-6222 or 830-4641, or just come to the meetings.
Leadership Through The 1980's

by Nancy A. Parker
exponent staff writer

"He who hesitates is lost." That axiom is buried in antiquity, but the philosophy is perhaps more true today that ever before. To be an effective leader in today's dynamic society, you cannot hesitate. You must be able to move with the changing world.

"Leadership Through the 1980's" was the topic of a symposium sponsored by the University of Alabama in Huntsville chapter of Omicron Delta Kappa Honorary Society, held March 23 at UAH.

The National ODK was founded in 1914 and promotes leadership.

"The ability to adapt to changing situations is the key to effective leadership," said Clark Roundtree, vice president of the local ODK, in his introductory remarks. Leaders in judicial, business, media, government and educational fields throughout Alabama were on the dais to give their thoughts on leadership and its effects during the present decade.

Madison County District Judge Jeri Blankenship spoke about the serious problems facing the court systems and solutions that can be effected on the coming decade. Blankenship cited a recent poll that stated that "most citizens view street crime as the most serious of problems."

"They expect us to reduce it, and the inability to do that is one of the toughest problems facing the judicial system," said Blankenship. She spoke further about tougher sentencing and the resulting overcrowding of jails and prisons.

Blankenship explained different sentencing procedures, progress in rehabilitation programs and neighborhood justice centers.

In closing, she told the large crowd gathered in the Music Recital Hall in the UAH Campus, "Alabama is rated one in the nation in our judicial system. People don't know this. I think they should.

Joseph Moquin, president of Telesyne Brown Engineering of Huntsville, expressed concern for all levels of people in the business world. "There are no good definitions of management," he started in his opening comments.

The gist of Moquin's ideas about business is its responsibility to the stockholders, employees, consumers and the community.

He expressed a great concern for the safety of employees, their morale and the quality of productivity. Reterring the responsibility of business, Moquin closed by stating that business "must stand firm in the marketplace."

Cindy Sexton, producer, reporter and anchorperson of WHNT, Channel 19 News in Huntsville, echoed the statements of Moquin.

"We have to be concerned for our viewers. We have to maintain integrity in the medium of television," said Sexton, as she spoke of the local station and its concern for the community.

"It's incredible what has changed over the past five years. Video tape was not used in the local market," she explained. "A five o'clock news story can be on the six o'clock news because of video tape. That was impossible when we used film. Ninety percent of the newscasts in the next 10 years will be live," predicted Sexton. "Programming is the key to the future. "We only survive by changing," she continued. "The key is that the viewer will benefit from it. Our viewers are getting more and more sophisticated. "All three stations here in Huntsville give good quality television. Competition lends to the fact that each of us do our best. The viewers are aware that we do our best. We can't let up for even one day. If we do, you viewers will change channels.

"If you are considering this field, look at the leaders who are already there, learn about the field, start out at the bottom and work your way up," Sexton advised in her closing comments.

Of State Donald Siegelman's speech was in the same vein as his predecessors' on the podium in indicating a concern for the people. "A politician lives and dies by the public," he said.

Seigelman's main concern was for Alabama's election process. He emphasized the importance of registering and voting.

"Our state constitution has not been updated since 1901. Since 1901, our philosophies have changed, the times have changed, but our laws have not kept pace. "I think that all have a responsibility for good government and I think we can build a better Alabama," he predicted. "Regardless of where your place is in the scheme of things, you are still beamheaded to sign the social contract. "I am seeing a great awakening of a participation in the overall happening of our country," he said. "I think that we all have a responsibility for good government and I think we can build a better Alabama."

Mrs. Martha H. Simms, member of the board of trustees for the University of Alabama system, and a UAH alumna, spoke on the crisis of education in Alabama. The most critical educational problem is political. Of course, the political side of it has been discouraging, too," she hastened to add. She pointed out that the governor's economic development task force and the Council of 21's dedicating themselves to giving the future of Alabama's education No. 1 priority are two positive steps that are being taken, Alabama's present educational system's inability to meet the needs of residents into the 21st century, and the lack of adequate educational funds were cited by Simms as two serious and urgent problems facing the state today. Simms touched upon the need for a better understanding of math, philosophy and history.

"Some may think those courses are an extravagance, but tomorrow's leaders need training in logical thinking. And, a knowledge of foreign languages is most necessary," she said. She was very critical of the "market approach" to education. Simms indicated that, under this approach, universities would become nothing more than trade or technical schools. As the symposium came to an end with a question-and-answer period, it was quite clear that those in the audience were also concerned about a well-rounded education and the leaders of tomorrow.

Kawanis Club Scholarship

by Nancy A. Parker

A Kiwanis Club Scholarship will be awarded on or before May 1, 1983. Residents attending college outside Madison County are also eligible. But, eligible persons must also excel in scholarship. Financial need shall not be a criterion. However, in the event that two or more candidates exhibit approximately the same outstanding characteristics in scholarship and character, the award may be made to the one with the greatest financial need. The scholarship candidate must be of exemplary character.

The recipient of this award shall apply it to the study of communications disabilities. Communications disabilities are disabilities related to speech, hearing, or sight. The recipient may choose to study at any accredited institution.

The Major Emphasis Committee of the Huntsville Kiwanis Club shall be responsible for selecting the winner. High school principals of Huntsville and Madison County, Alabama, will also be asked to make recommendations.

College and university students who apply must then forward applications accompanied by a letter of recommendation from their Dean or other school official having knowledge of their scholastic record.

Selection shall be primarily on the basis of scholastic record. Interviews may be held, but shall not be a primary selection technique. For more information, contact the Financial Aid Office, 895-6241.

Space And Rocket Center's - SPACE DOME

by Bill Savage
exponent staff writer

The newest attraction at Huntsville's Space and Rocket Center is a 67-foot (diameter) movie theater called the "Spacedome."

The Spacedome utilizes a unique projection system, the Omnimax rolling-loop projector. This system is one of 10 if its type in existence.

The projector, uses 70 millimeter film, giving a picture nine times larger than the conventional 35 mm film.

A 180-degree "fish-eye" lens is used to project an image onto a screen tilted 30 degrees to surround the audience. The effect achieved when viewing a film in the theater is that one is immersed into the action...that one is where the film takes him.

Two films currently showing at the Spacedome are "Hail Columbia," a film about the first launch of the Space Shuttle, and "To Fly!" a history of man's will to fly that has been showing at the Smithsonian Institute in Washington, D.C. since 1976.

Both films are enjoyable, if not for content, for the fact that one actually "experiences" the film.

The Omnimax projection system was designed by the Inex Corporation in Toronto, Canada. According to Dick Thriss, assistant projectionist at the Spacedome, the Omnimax projector is "the best system you can find."

Thriss was first trained on the projection system at the World's Fair in Knoxville, a system similar to that in the Spacedome was used. Thriss's most unique experience with the system occurred there, where he "dropped a 200-pound roll of film" on one of his fingers.

It is remarkable to note that there were over 60 financial contributors to the Spacedome including state and county as well as support from the city of Huntsville.

The Spacedome is an interesting attraction, unique to the southeast region. It is an adventure in state-of-the-art cinema projection that one should experience at least once.

Alpha Lambda Delta
Honor Society

Alpha Lambda Delta, a freshman honor society, is currently in the process of notifying qualified freshmen of their eligibility for membership. In the past, the unintentional overlooking of eligible people has always been inescapable.

So, if you are a freshman and have earned a 2.5 grade-point average during one quarter and happen to get overlooked, or if you made this grade point average one quarter when you were a freshman and got overlooked, let us know.

To do so, drop a note at the English Department office by April 5 with your name, address, phone number and the quarter you qualified; please address it to Dr. P.E. Davis.

This Weekend The SGA Film Series Presents

STAR TREK II
THE WRATH OF KHAN

March 31, April 1 & 2
Thursday 8:15 pm Friday 7 & 9:30 pm Saturday 7 & 9:30 pm

UAH Students Admitted FREE. Other Students: 1.00. General Public: 1.50

The HP-41 can help land the Space Shuttle.

And land you a $125 module, free.

The HP-41 handheld computer was chosen by NASA as a regular member of the Space Shuttle team. If need be, it can help land the Space Shuttle without the help of Mission Control.

And until April 30, it can land you any one of five modules absolutely free.

Here's the offer:

- Get any one of these modules absolutely free:
  - HP-41 (Interface Module) $125
  - Quad Memory $75
  - Extended Functions (Program Enhancement Functions) $75
  - Extended Memory (Up to 1.7K bytes) $75
  - Time (Stopwatch, Alarm, Appointments, Comm) $75

To get your free module, send dated, original proof-of-purchase, and the coupon available at your HP dealer to: Hewlett-Packard Co., Dept. CHOICE-400, 1000 N.E. Circle Blvd., Corvallis, Oregon 97330.

The HP-41 is an extraordinarily powerful handheld computer all by itself. When combined with peripherals, it becomes the heart of a complete personal computing system. Both the HP-41C and the HP-41CV (with a larger resident memory) have recently been reduced.

HEWLETT
PACKARD
FILM MAKER'S CO-OP

Upcoming shows at the Alabama Film-Makers Co-op include: "Birth of a Nation," April 1; "Clowna," April 8; and "Sleeper," April 15 at the Arts Center, 201 White St.

The three directors of these great films are honored this month at the film co-op: D.W. Griffith, who gave us an American classic; Federico Fellini, from the foreign scene and Woody Allen who is fast creating the new American classic.

"Birth of a Nation," the grand spectacle of Reconstruction South, elevated cinema to art-form status. It has been showered with critical acclaim since its original release in 1915. Griffith's direction was never better. He developed or refined many techniques such as the close-up, cross-cutting, rapid editing and impressionistic lighting. The story focuses on the interaction between two families, one Northern and one Southern, showing the heartbreak of the Civil War in personal as well as ideological terms. The film is accompanied by a musical and sound-effects score.

In "Clowna," Fellini playfully explores his fascination with the circus drawn as a source of imagery, passion, melodrama, comedy and pathos. It is a film that examinations both the world of the circus and the circus of the world—a gorgeous riddle! "Sleeper," written and directed by and starring Woody Allen, is hilarious. In his movie Allen turns his wit toward the future and, while creating a totally unique version of what lies ahead, manages to throw some sharp blows at our society today. Woody plays Miles Monroe, a health food proprietor who goes into the hospital in 1973 for an ulcer and wakes up 200 years later. Also included in the cast are Diane Keaton and John Beck.

All films begin at 8 p.m. For more information, call the Film Co-op at 534-347. See you at the movies!

HUNTSVILLE CHAMBER ORCHESTRA

The Huntsville Chamber Music Guild Presents Davis String Quartet

The Huntsville Chamber Music Guild is bringing an extra event to Huntsville and North Alabama on its 1983-84 season. The Davis String Quartet will be appearing at 8:15 p.m., Thursday, March 31 in the UAH Humanities Building Recital Hall.

The Davis String Quartet, four young men who established themselves with their prize-winning performances in the 1981 Cleoman Chamber Music Auditions in Pasadena, Calif., has thus far had a very active career, performing extensively throughout the United States. The quartet, consisting of violinists Michael Davis and Peter deVries, violist James Davis and cellist Anthony Ross, was formed in 1979 at Indiana University, where each reached a performance degree on their respective instruments.

Various members of the group have played in Carnegie Hall and have been winners in prestigious events such as the Tchaikovsky Competition in Moscow and the G.B. Dealey Awards in Dallas, Texas. The quartet had been asked to premiere several works of young composers in recent years.

Tickets are available at A.B. Stephens Music Company and from members of the Huntsville Youth Orchestra. General Admission $4; Students, Senior Citizens and HCMG season ticket holders, $2.

TOASTMASTER'S CLUB TO BEGIN SOON

An organizational meeting for a new Toastmasters Club in Huntsville will be held at 5 p.m., Wednesday, March 30, in Room 316 of Morton Hall on the UAH campus. The session will include a brief demonstration of a Toastmasters program and an orientation for prospective members.

"Toastmasters is a terrific way to gain valuable skills that can benefit a person in his or her career," Hyche said. "And the cost of membership is nominal."

Hyche said all interested persons are welcome to attend the organizational meeting. Reservations are not required. For more information, contact a Huntsville area Toastmaster at one of the following numbers: 957-5013, 852-0617 or 539-3291.

Dan Fogelberg In Concert

Dan Fogelberg comes to the Von Braun Civic Center, as part of his 1983 Tour, on Friday, April 8, for one 8 p.m. show.

Monday, March 21 at the Von Braun Civic Center Box Office, Belk Hudson’s (Haysland Square) and Sears (Decatur). For mail orders, send a self-addressed/stamped envelope to: Dan Fogelberg, Von Braun Civic Center, 700 Monroe Street, Huntsville, Ala. 35801. Add 50¢ handling charge per order. For phone charges on MasterCard or VISA, call 533-1953.

This performance will mark Fogelberg’s first-ever Huntsville concert. It will feature him in an acoustical setting, with the artist accompanying himself on both guitar and piano.

Fogelberg recently released his “Greatest Hits” LP, which showcases his tremendous ability as a songwriter and performer. Material for this LP was drawn from his five platinum and two gold albums and includes such hits as “Longer,” “Hard To Say,” “Leader Of The Band” and “Same Ole Lang Syne.”

Tickets ($12.50 and $10.50 reserved) went on sale

Psi Chi Honor Society Guest Speaker

Dr. Paul Overman of the American Institute of Psychotherapy will be the guest speaker at the upcoming meeting of the Psi Chi Psychology Honor Society. AIP is a “free-standing” School of Professional Psychology in Huntsville, authorized by the state to grant the Doctor of Psychology Degree.

Dr. Overman will provide general information about the school and address the issue of enhancing community life for students and students. The first luncheon for this quarter will occur Tuesday, April 12, at 12:15 at Trinity Presbyterian Church (east of On-Campus Housing on Holmes) with a 5 donation requested.

Campus Ministry Association Plans Upcoming Events

The Campus Ministry Association is making plans for several upcoming programs open to the University community. The association is helping the Huntsville-Vanderbilt Study Forum sponsor its Spring Lecture Series, “Living This Side of the Promised Land: Help form Theology and Psychology.” The series will feature lecturer Peggy Way, pastoral theologian, minister and nationally known speaker and author in pastoral care. Dr. Way will discuss the themes of grace and judgment in human experience. The lectures will occur on consecutive Monday evenings from 7 to 9 p.m., April 4, May 16 at First Christian Church.

CMA began hosting monthly campus-wide luncheons this fall (specifically on the second Tuesday of each month) for the purpose of enhancing community life for any of these events, call CMA at 837-2483.
