Chargers gear up for NCAA tournament

By Andy Donovan, Sports Reporter

The University of Alabama-Huntsville Chargers received a No. 1 overall seed in the NCAA Tournament's South Regional despite a disappointing end to the season. With this in mind, the Chargers came out strong and focused against their first-round foe West Georgia. They controlled the contest throughout,走出 a 55-26 lead midway through the second half on the way to a decisive 86-68 victory. The Chargers' next game matched them up with a familiar opponent, Valdosta State. The Blazer's season was in the balance, and their play reflected it throughout the contest. VSU took a 39-33 lead into the break and controlled play throughout the second half, never allowing the Chargers to regain the lead. UAH fought until the end, but ultimately fell short by a final score of 76-66.

With the Chargers' tournament run ending sooner than expected, attention quickly turned towards their NCAA tournament finals. Florida Southern squeaked through to a Sunshine Conference Championship, and was awarded with the No. 1 seed and the privilege of hosting the South Regional. UAH held on to the No. 2 spot and will face GSC rival Christian Brothers University — GSC tournament champion and No. 7 seed. The game will mark the seventh meeting between the squads in the last two seasons, as well as the second straight year they will meet in the NCAA tournament. UAH defeated Christian Brothers in the regional finals last season. This year's meeting will be played on March 16 in Lakeland, Fla.

Cardinals gather in Vatican City to Elect New Pope

Roman Catholic Cardinals from around the world have gathered in Vatican City this week to elect the Papal Conclave that will deliberate and select the next Pope.

The 153 members of the College of Cardinals assembled March 8 in Vatican City, holding their first session in preparation for the first conclave to elect the next leader of the Roman Catholic Church. After the discussions, which revolved around current problems and the direction of the Church, it was announced that the formal conclave to elect the Pope would be March 15. The closed-door meetings in St. Peter's Basilica are a preview of the secrecy that will surround the selection process.

On Feb. 10 Pope Benedict XVI announced he would resign his papal office effective Feb. 28 citing advancing age and physical frailty that was preventing him from carrying out his official duties. He became the first Pope in 669 years to resign his papal office, and the legacy he has left behind will live on for years. According to legend, in 2002 Paul VI's reigns and all other Popes have died, beginning with a morning Mass and the renunciation of the papal office. On March 16, five cardinals will be elected Pope, with the conclave expected to last for three days.

As the conclave begins, the Pope's choice will be made with the help of a

Lady Charger Softball

The University of Alabama-Huntsville softball team swept Florida Tech this past weekend.

The series started in the Shelby Center on Friday with a 9-0 win over the Panthers. The second win was a 6-0 blanking of St. Leo on Sunday.

Battle of the Buffalo

By Holly Shelton, Section Editor

The Theta Pi Chapter of Alpha Tau Omega (ATO) hosted the annual Battle of the Buffalo on March 7 at the University Center Exhibit Hall. Greek Explosion and Step Show are alumni from five different fraternities and sororities.

Philly's Charlie's started in the Shelby Center on campus with about 200 attendees. The的竞争 was heated, and a winner was decided for $225; 50 for 2nd place, and about 200 at the event is projected to win $10 for the event in early spring.

All of the money raised at the Battle of the Buffalo is donated to the Russell Sage Foundation, which helps provide treatment for cancer patients. ATO hosts this event every year, and the four Eastern Catholic Patriarchs sitting in the front row had the best wings. The Battle of the Buffalo is a huge money generator for the Russell Sage Foundation, which helps provide treatment for cancer patients. ATO hopes it will even raise more money for cancer care and students.

Jack the Giant Slayer

Despite being a bit of a hit, "Jack the Giant Slayer" still grabbed an entertaining, wacky story and some magic-making effects.

Charging the Tunes

Greek Explosion and Step Show on March 8 at 8 p.m. at the University Center Exhibit Hall. Greek Explosion is a step show by alumni from five different fraternities and sororities.

The University of Alabama in Huntsville (UAHuntsville) has been selected by NASA to participate in a mission designed to investigate the highest-energy cosmic rays, single subatomic particles, each with as much kinetic energy as a major nuclear explosion. The Extreme Universe Space Observatory (EUSO) mission seeks to identify the nature of such particles and measure their impact on the universe. The UAHuntsville team includes Dr. Massimiliano Avizzi of Brazil; Timothy Dolan, bishop of Genoa; Joao Braz De Aviz of Brazil; and Kuznetsov and John Watts. In a statement, Dr. James Adams, director of the Marshall Space Flight Center (MSFC) of the U.S. Space Agency said, "This mission is a very large camera that when we map them back to the sky in optical, UV, X-rays, and gamma rays, we'll be able to see the source. This camera will record video of the sky in the cosmic ray sky, allowing researchers to see the concentrations about the nearby sources more clearly. This will help to make the mission a reality." It is worth noting, at this point, that North Korea's military leadership has publicly promised to continue its nuclear and missile programs, including developing intercontinental ballistic missiles (ICBMs) and a nuclear weapon that could be delivered by a submarine-launched ballistic missile (SLBM). The United States and its allies have imposed严厉 economic sanctions on North Korea, but the country has vowed to continue its nuclear program. The situation on the Korean peninsula remains tense, with both sides maintaining a high degree of readiness for military action. The Unites States and South Korea have conducted joint military exercises in recent months, and North Korea has responded with its own military demonstrations. The situation is complex, with many factors at play, including historical grievances, political tensions, and economic struggles. The international community, including the United Nations, continues to work on diplomatic solutions to the conflict. However, the path forward remains uncertain, and the risk of military escalation persists. It is crucial that all parties work towards a peaceful resolution to the Korean peninsula crisis.
Alumni Show Out at Greek Explosion Step Show
By Reggie Allen, Staff Writer

On March 8 at 8 p.m. at the University Center Student Union Hall, Greek Explosion, a step show was held, featuring alumni from different fraternities and sororities. The show started off with alumni from Sigma Delta Tau Sorority Incorporated. The members started off with a big screen, explaining the origin of the casting call, which was the first time they performed on their own plates in the storm. They also did a pretty impressive rendition. The judges appreciated their attitudes and confidence.

Next up was Zeta Phi Beta Sorority Inc. Being the only sorority with a medicinal bond with a fraternity (Phi Beta Sigma), they reenacted a brother as part of their show. The judges appreciated their uniformity and unity with Phi Beta Sigma Sorority Incorporated. As both the sororities are known to perform, Delta Sigma Theta Sorority Inc., definitely did not disappoint. They incorporated some hip-hop, even doing an aesthetically pleasing photo that were members of DST. EKSTIC included a myriad of different techniques, such as toe touches and splits. This next portion began with the cast introducing themselves. They began their performances with heavy hitting moves and high kicks and had a few moments of humor including members of OMEP from as far back as 1979. They shifted into a boisterous note of honoring a brother who passed by highlighting his pair of famed gold boots. It was a beautiful and touching sight to see, even for non-members of Omega Psi Phi. The last part of the performance, Alpha Phi Alpha, answered all. Members began their entrance from the back of the hall, hopping to Vincent's famed "All Gold Everything." They included some of their history with lots of humor such as doing a garlic step and kept it innovative with impressive examples of "getting low.

After all performances had concluded, there was a panel of judges who decided the winners of the main event. They were Delta Sigma Theta Sorority Inc. and Alpha Phi Alpha. The Greek Explosion was hosted by D.J. LO (also known as Mr. 360 with music provided by 94.5's DJ Baldwin). And in all, the event was great. Packed with high energy, humor, and good times, I would recommend attending any other events hosted by Event One. Have a party or event that needs planning? Feel free to email info@eventonehsv.com for information.

Battle of the Belgians: Round 3
By David Valt, Staff Writer

This week, I will be covering all the same beers as last time, as this time, it is all about golden pale ales.

Chimay Tripel (White)
The tripel style refers to the brewing process in which three different amounts of malt is used. However, tripels are also usually very light in color. Again, Chimay is no exception. There is a work you perform up front with a definite wheat character. It also yields some very nice aromatics with notes of bananas and citrus, with a nice hint of hops. The body is very light and dry in the finish.

St. Bernardus Tripel
St. Bernardus compared to Chimay is very similar to last week's results when testing two of their comparable dark styles (Blauw and Abt 12). Once again, St. Bernardus is slightly lighter in color with a hint of floral character. The body is more malty than Chimay overall. It is a couple perfect with the finish. Instead of finishing harsh, this 8.00 percent is similar to Chimay is very similar to the form of the St. Bernardus but with a bit more flavor definition. One can taste the slight bitterness of bananas and a tartness that is similar to green apples. The juiciness and malt take over with the carbonation producing a good bite. However, it does not really let the hoppy aroma out.

Dou Di Dios, Din Di Dios

This year in Ushuaia is a stouter pale ale with an ABV of 9.00 percent. This one has some of the same style and balance of the St. Bernardus but with a bit more flavor definition. One can taste the slight bitterness of bananas and a tartness that is similar to green apples. The juiciness and malt take over with the carbonation producing a good bite. However, it does not really let the hoppy aroma out.

The Soap: Communication is Key
By Ivory Heatharn, Staff Writer

In any relationship, communication is one of the key factors that makes a relationship work. It is an effective communicator through which you can express your feelings, purposefully not communicate certain things for the good of your personal agenda. It is really hard to just set your ego aside and be honest with people. Sometimes it is easier in your own mind and it is hard to just be up front in the beginning of the relationship, but it is also a good practice to be communicating effectively with people. Of course, there will always be some issues when it comes to being honest with others. As you do find out that someone is being fake and try to play games, it is a major turn-off and will end up being bad for you. Please be open with about what you expect from the relationship and what you want from the relationship and be honest with them. So be a communicator and not a liar.

Ivy Heatharn is a junior English major and is a staff writer for "The Charger Times."

Charger softball finishes the weekend 3-1

By Sara McMahan, Sports Reporter

The University of Alabama at Huntsville softball team swept West Florida in Charter Park Saturday to split with top-ranked Valdosta State on Sunday.

The Chargers opened up a double header against UWF with a 9-1 win. Records showed that first inning and a half, the team had conceded two runs. Mallory McNeil forced the first run of the game getting hit off of a wild pitch with the bases loaded. The inning was highlighted by a Kellee Johnson triple deep into the first base in line to form McNeil, Nicole Bolewski and Lindsey Davis. The Chargers finished with the 9-1 advantage in the first game, McNeil as the last to bat. Kari Helms, Whitfield hit a fifth inning home run. The Chargers

make contact 10 times, but their two runs came from one hit.

The Chargers bounced back for the second game to silence the Blazers in a 5-2 win. They were able to benefit from four unlikely errors, while Whitmire Gilbert got the win in both innings.

The UAH chargers were able to gain an early lead in the first inning off of Kellie Keffey across the plate with the help of four unlikely errors, while Whitmire Gilbert got the win in both innings. The atmosphere was again, the ladies from Huntsville were jumping up and down smiling, the team in blue scored nine points, and the all new defense scheme held the opponent to a 9-1 start. There it

President Interview Part 2
By Nicolas Neely, Staff Writer

This is a two part interview between University of Alabama Huntsville President Robert Altenkirch and I.

Question #1: Can you explain to students who had not considered studying at UAH why they should give UAH a look?

I think you have to look at the UAH brand and determine if it is for you. This is a technology-focused university with strong professional programs. While the arts and liberal arts are also strong here, you don’t usually see that in technology-focused institutions. Students are encouraged to participate in sponsored events and music ensembles. There is a good amount of connection between students and administrators. The proximity to Redstone Arsenal and Cummings Research Park, means there is potential for internship and job opportunities. It is just a good place to look for professional career opportunities. We do some things others wouldn’t think of doing. A student group that designs and builds rockets for example is unusual, the Student Launch Initiative. And a space hardware club that is going to launch a satellite into space. They are going to demonstrate its use as a communication satellite.

Question #9: Enrollment at UAH has grown significantly. It is hard to grow engineering regularly; it grows at a steady pace. For example, Nursing is growing rapidly because of the increasing demand for healthcare. By expanding the College of Nursing facility, we expect to see a bump up in enrollment and demand for other colleges. Progress sort of ebb and flow over time. Sometimes up, sometimes down.

Question #10: Have you been inside Roberts Hall?

Oh yes, I attended a lecture and a master performance there. I had to search for the restroom. Typically you can find it next to the water fountain in between the two休息室, but in Roberts they are stacked on top of each other. Also, the plan for Wilson Hall is to move the simulated hospital to the Nursing expansion.

Question #11: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

There is a repair and maintenance bekommen list. We are going to get to them as funds are available. For example, the Shelby Center has received its name on it. It was supported with Congressional funds. The Intermodal facility and the construction are in part federal grants. Renovation of Morton Hall and Roberts Hall, and also the Von Braun Research Hall, are all on the list. We budget very conservatively and then as the budget year is closed out, we generally operate with a small surplus. There is a list and we have to step through the list. Charger Union is being funded by bonds that were floated and will be paid for with student fees. The Nursing expansion will be paid for with tuition revenues covering bond debt service, and in part by private gifts and state allocated funds. SWIRL (Severe Weather Institute and Radar & Lighting Laboratory) is a grant through the state from the governor’s office to improve our research. Madison Hall is also in need of attention. As far as Roberts Hall goes that is an architectural issue. I used to be a Dean of architecture at Washington State University. I used to look for professional career opportunities. Typically you can find it next to the water fountain in between the two休息室, but in Roberts they are stacked on top of each other. Also, the plan for Wilson Hall is to move the simulated hospital to the Nursing expansion.

Question #12: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #13: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #14: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #15: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #16: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #17: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #18: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #19: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #20: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #21: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #22: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #23: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #24: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #25: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #26: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #27: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #28: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #29: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.

Question #30: What about removing Liberal Arts? Would it be more cost effective to build a new Arts and Social Sciences building than to renovate three different buildings?

We have to determine if it makes sense to renovate a building or simply rebuild. As far as rebuilding goes, it can be less expensive and you get a new selection of architectural firms. If it is more cost effective than renovating, we would certainly look at that.
