CAMPUS WELCOMES NEW VICE PRESIDENT . . . Dr. Elmer Anderson, the new vice president for academic affairs at UAH, has been learning many new names since taking office July 2. He comes to UAH from the School of Science and Humanities at Indiana University-Purdue University at Fort Wayne where he has been dean since 1977.

In talking about the goals of education, Dr. Anderson said he saw three primary thrusts: "The first is to develop in students the ability to think critically and to express thoughts clearly. The second goal, as I see it, is to formulate a realistic scale of personal values and professional goals. In order to achieve happiness, each individual must live in harmony with himself, with society, and with his religious beliefs. The third primary goal of education is to master a certain body of knowledge in one or more academic fields or professions." In talking about the role of a university in helping students reach those goals, Dr. Anderson said he believed that an institution of higher education should be concerned with the person it graduates as well as with the academic major that person has.

ACCOUNTING WORKSHOP SCHEDULED . . . Students from 14 high schools in Madison and surrounding counties will attend an Accounting Workshop July 30-August 3 directed by Dr. Jack Fay. Sponsored by the Alabama Society of Certified Public Accountants, the workshop is used to attract students to UAH and to accounting. Guest speakers from government, industry, business and the IRS will instruct the students in the job opportunities, salaries, and responsibilities of accountants. Morning classes will be taught in Morton Hall, and in the afternoon Mrs. Ferne Leonard will give instruction in Computer Science. UAH is one of four institutions in Alabama to offer the workshop.

VON BRAUN LECTURE SERIES . . . The second von Braun Lecture will feature Dr. George Mueller, former director of the Apollo Program and a major promoter of the Space Shuttle, in an 8:30 p.m. address Wednesday, July 18, at the Sheraton Inn. His topic, "Manifest Destiny," will focus on the lunar landing project. The lecture is free and the public is invited. Dr. Mueller is currently president and chairman of the board of System Development Corporation in Santa Monica, California.

SUMMER ENROLLMENT . . . Registrar Nan Hall notes that summer enrollment advanced 5.2% over student figures for the same period last year, maintaining UAH's consistent rising enrollment trend.

WANTED . . . One faculty or staff member who is interested in working with fun-loving, service-oriented students. Job is not complicated and needs only a couple of hours each week. Salary won't increase your income; but, you will receive a ton of appreciation. Contact Millie Shofner at 895-6230 for this Circle K position.
PROGRESS FUND EXCEEDS GOAL . . . Don Blaise, director of the UAH Alumni Association, announced last week that the Progress Fund had topped $102,000, exceeding the original goal of $100,000. This amount includes the lease cost of a 1979 Ford Fairmont supplied for the use of the Alumni Association and the University Development Office. Good going, alums! That's real progress.

ALUMNI ASSOCIATION PICNIC . . . Faculty and staff members and their families are invited to join in the festivities August 18 when the Alumni Association holds its annual picnic. There will be cartoons and shows for children (adults may enjoy them too), and games for children as well as adults. Alumni Association Director Don Blaise says picnic planners are anticipating a bigger crowd than last year's good turnout. Details will be announced, but mark your calendar for the date.

RAISING THE ROOF . . . Bids to replace the roof on the Humanities Building were opened July 3 and the contract awarded to Willoughby Construction of Cullman at a low bid of $34,954, according to Dr. Joseph Dowdle, UAH vice president for administration. "Barring unforeseen difficulties, the work should be completed by the first of September," Dr. Dowdle said. The entire roof is being replaced due to general deterioration caused by the weather.

ALABAMA SOLAR ENERGY CENTER . . . The A.S.E.C. reminds campus personnel that six different types of solar heated water systems are on display. Anyone interested in installing a solar system can see what equipment is available in Alabama, and compare the cost and performance of the various systems. Tours of the Center's test facilities may be arranged by calling Florette Haisten at 895-6361.

CONTINUOUS EDUCATION WORKSHOPS . . . A workshop to instruct administrative assistants and executive secretaries in the managerial skills to plan, organize and implement programs will be held August 14-15 at the Carriage Inn. The instructor will be Herman Birnbrauer, president of the Institute for Business and Industry, Inc., of Cornwells Heights, Pa. Contact Jim Simpson at 895-6010 for more information.

Two workshops designed to aid women planning to re-enter the employment arena or to advance in their present jobs will be conducted by Mary Zimmeth, author of "The Women's Guide to Re-Entry Employment." The first session will be Tuesday and Wednesday, July 24-25, and the second will be Friday afternoon, July 27, all day Saturday July 28, and Sunday afternoon, July 29. All sessions will be at the Sheraton Inn. Contact Annaliese Dilworth at 895-6010 for more information.

Dr. Harry L. Van Trees, chief scientist of the Air Force, will be the director of a course in Detection, Estimation and Modulation Theory offered July 30-August 3 in 110 Madison Hall. Advance registration is required and must be received by July 16. Additional information may be obtained from Bob King at 895-6010.
TURN OF THE WHEEL . . . Contrary to what seems to be modern belief, the wheel was not invented for the automobile. Proof of this newly discovered fact lies in the increasing numbers of wheels attached in pairs to archaic modes of transportation that are being brought out from dusty corners of basements and garages all across the nation. UAH is a reflection of the times. Those poles growing out of the ground at building entrances are being put to use to anchor the bicycles of hardy faculty, staff and students who have discovered the merits of riding on two wheels instead of four.

In News and Publications alone, four staff members and two students are biking daily. Staffers Marilyn McClure, Blanche Irby, Prentiss Beatty and Gregg Gels form an impressive parade together with student assistants Liz Johnston and Jeff Chaffin.

Bicycles seemed the most popular alternative to the gasoline crunch. Athletic Director Dennis Killips is one of those who has taken to two wheels. Jane Gamble in Science and Engineering reports that the School has two bicycles for faculty and staff use between buildings, but says she's about the only one who rides them. Science and Engineering purchased the bicycles several years ago.

Thalia Haak, of course, preceded the energy crunch by several years. This iron butterfly walks to her job as coordinator of curriculum communications at the School of Primary Medical Care all summer, winter, spring and fall. Many students, residents and doctors at the SPMC are riding bicycles these days, so many that it's difficult to find a parking space. The racks outside the Clinical Science Center and the Ambulatory Care Center are often so full that a nearby tree is put to use.

There have been rumors of skateboards, unicycles, pogo sticks, hang gliders and oversized balloons bearing otherwise dignified University personnel to their appointed departments, but none have been confirmed. There is one confirmation of a Moped, though. Bonney Metts in pediatrics got one for her birthday recently and now is enjoying 100 miles to a gallon.

The Johnson Environmental and Energy Center is a beehive of gasoline-beating energy: Dr. Stuhlinger's sermons on the need for electric transportation in urban areas are falling on more and more receptive ears, and he is anticipating the arrival shortly of Auto Check's second electric passenger car, an AMC Pacer called "Change of Pace." Joe Peters and Carl Ziemke are also noting stepped-up interest in their gasohol research.

Some people, like Judy Gerber in Auditing, tried hitchhiking on a short-term basis when they found their tanks nearing empty and couldn't face those long lines at the pumps. Others finally joined a car pool, or felt good that they were already in one. Speaking of those long lines, Katherine Orr in the General Information Office holds the campus record for spending the longest time of anyone we know. She waited in a line with her husband from 2:30 in the morning to 7 a.m. when the station opened. "I never saw so much traffic on Whitesburg Drive at 2:30 in the morning," she said.

For those of you who found a different way of getting to work, congratulations on your ingenuity. If you have a novel way of beating the reliance on gasoline, let us hear from you.
HOLIDAY REMINDER . . . Those of you who worked on a University holiday and planned to take comp-time to make up for it, remember that if you don't use the time by August 31 you'll lose it.

PRE-SCHOOL CENTER MAY CLOSE . . . In a letter dated June 29, the University announced its intentions to close the Pre-School Learning Center. "The decision to terminate this University service is based on fiscal realities and on a consideration of University priorities in a time of necessary austerity within higher education in our state," said Dean of Students Charles T. Maples in a letter to parents. "These factors require that auxiliary student services be totally self-supporting. The University's resources must be focused on the principal mission of the institution--the academic programs related to instruction, research and public service."

Dean Maples will be meeting with parents at 7:30 p.m. Tuesday, July 17, in the Pre-School Center to talk about possible alternatives in providing child care. One of the alternatives being mentioned is for the University to lease the facilities to a parent run co-op that would manage the Center. If an alternative cannot be found, the Center will close August 31 and the 20 children already enrolled for the fall term will have to be placed elsewhere.

UAH STATIONERY CHANGE . . . Ted Bone in Reproduction Services has announced that, because of the expense, the University Seal paper has been discontinued by UAT that supplies all three campuses. UAH stationery will be printed in the future on Hammermill bond.

JOB OPENINGS . . . The following staff jobs are open at UAH. More information is available at Personnel Services in Madison Hall. New listings are updated weekly and posted on campus bulletin boards. Persons interested in the following positions should contact the Personnel Office at 895-6545 for additional information. UAH is an affirmative action/equal opportunity employer.

STAFF POSITIONS
Heating & A/C Technician (2)
Utility Worker
Electrician's Helper
General Maintenance Helper
Secretary I
Secretary II
Assistant Director of Admissions
Mag Card II Operator
Campus Security Officer
R.N. (temp. on-call)
Library Assistant (temp. p/t)
R.N.
Collections Assistant
Accounts and Credit Supervisor
STUDENT JOB OPENINGS . . . The following student jobs are available both on and off campus. For more information, please contact the Job Placement Office in 217 Morton Hall.

- Audio Visual Asst.
- Clerical Worker
- Babysitter
- Waiters
- Clerical Worker/Cashier
- Resident Advisor
- Typist
- Housekeeper
- Lifeguard
- Lifeguard/Swim Instructor
- Computer Technician
- Computer Terminal Operator
- Undergraduate Lab Asst.

SATURDAY CLASSES . . . Selected courses in the School of Humanities and Behavioral Sciences will be offered for the first time on Saturdays. UAH President John Wright explained that classes held from 8 a.m. to noon once a week instead of on the usual twice-weekly schedule will be a means of saving gasoline.

The classes, including general curriculum courses in history, English, administrative science and graduate level business, will be taught by regular UAH faculty through the Division of Continuous Education. Regular credits will apply.

Early registration will be July 12-25 in Morton Hall, 8:15 a.m. - 10 p.m.
For addition information, call Katherine Orr in the General Information Office, 895-6295.

NEW MEDICAL LIBRARY HOURS . . . New weekend hours went into effect July 1 for the medical component library. The library, located in the Clinical Science Center, is open on Saturday and Sunday from 2-5 p.m. Monday through Friday hours remain the same, 8:30 a.m.-9 p.m.
Tuesday, July 17
7:30 p.m. Pre-School Center. Meeting to discuss continued operation of the facility.

Wednesday, July 18
8:30 p.m. Sheraton Inn. Second von Braun Lecture: Dr. George Mueller, former director of the Apollo Program and a major promoter of the Space Shuttle, will speak on "Manifest Destiny" dealing with the lunar landing project. Free.

Wednesday, July 25
Deadline to submit research project proposals to the Research Grants Committee. All interested faculty, staff members and students should use new application forms available at 895-6002, School of Graduate Studies.

Thursday, July 26
11 a.m. - 1 p.m. Science Building 141. Alabama Air Pollution Control Commission, public meeting on air pollution control.

July 30 - August 3
Accounting Workshop for Alabama high school students sponsored by the Alabama Society of Certified Public Accountants. Morning classes in Morton Hall, afternoon sessions at Computer Science. Contact Dr. Jack Fay at 895-6680 for more information.

Thursday, August 2
8 a.m. - 3 p.m. Humanities Building 110. Entrance auditions for the Alabama School of Fine Arts.

Friday, August 10
5-7 p.m. Noojin House. TGIF, Alumni Association's monthly party for the University community.

Friday, August 10
7:30 p.m. Church of the Nativity. Annual Summer Concert and Ice Cream Social presented by the UAH Summer Chorus. Giovanni Battista Pergoleisi's "Magnificat", medley of Broadway show songs and folksongs. Free.

Tuesday, August 14
Application deadline for fall term.
