WELCOME BACK — FALL 1989

Russell sees potential for Engineering

by Carol Ann Vaughn

It is very refreshing to find someone who is interested in making a career change that would enable him to spend more time with his wife and four young children. He feels that we are here to serve the student, and he believes that everyone is important.

Dr. Lynn Russell came to UAH in the fall of 1987 to serve as the Dean of Engineering for approximately 1800 students in that field of study. Not only is his technical and administrative qualifications impressive, his reputation for his interest in and rapport with individual students is noted and appreciated by all students whether or not they are in engineering. Dr. Russell sees tremendous potential for UAH engineering due to the unusual diversity of companies in Research Park, the caliber of prospective graduate students and undergraduates, and the steps being taken to add more full-time faculty members who will help lead the school toward greater national prominence. "We have the surroundings, resources, and students with which to achieve this," he says. "If you look at test scores, we match up with any of the top engineering schools that are state supported. I like the opportunity to see things grow."

ACE sponsoring FallFest

by Brian Collins

The University of Alabama in Huntsville will kick off the new school year this week with FallFest ’89.

FallFest is sponsored by the Association for Campus Entertainment, the College of Engineering, and the Office of Student Development Services and is the traditional welcome-back party at UAH. All events are free to the general public.

On Thursday, September 21 from 11 a.m. to 4 p.m., the grounds of the University Center will be covered with carnival games and prizes, while Russell Davis will be roaming the crowd, presenting a captivating display of napkin hand magic tricks. Star Trux recording studios can make you a star; you can sing along to your choice of songs and then take home a tape of your music debut. Hot-air balloon rides will take you to new heights (weather permitting) and a wet bar, featuring nonalcoholic drinks including beer, wine, and Bloody Marys, will also be available. Remember it all takes place on the grounds of the UAH University Center.

On Friday September 22 FallFest continues with comedian Alex Cole appearing at 7:30 p.m. in the University Center Exhibit Hall, followed by the band Trip to Argentina at approximately 8:30 p.m. Again, these events are free to everyone.

On Saturday September 23 contemporary singer Robin Greenstein will perform at the University Center Cafeteria at 7 p.m. At 9 p.m. and 11 p.m., Cash will open for The Rainmakers in the Exhibit Hall. There is no admission charge for any of the FallFest events.

Advice on Center to open

by Jane M. Dudley

If your report cards and transcripts label you "SEG," you are planning to enter the College of Engineering but are now in the College of Science. Now for SEGs, transfer students, entering freshmen and all others in pre-engineering limbo, an Engineering Advisement Center is being prepared and will soon open. The center is in the engineering building near the dean's office.

According to K.O. Thompson, Associate Dean of the College of Engineering, the records of students classified as SEG will be sent here. Thompson and Elizabeth Gitz, Coordinator of Minority Affairs for the College of Engineering, will be able to review a student's records easily on the computers in the center.

The University of Alabama in Huntsville

Wednesday, September 20, 1989
Conference to focus on infectious disease

"Infectious diseases and lung problems are still among the most common and serious health conditions in this country," according to Huntsville infectious disease specialist Dr. Lefroy Harris. Dr. Harris is clinical professor of internal medicine/infectious disease at the UAH School of Primary Medical Care and course director for a conference on infectious disease and pulmonary problems to be held on the weekend of September 30 — October 1. The School of Primary Medical Care, Crestwood Hospital, Humana Hospital-Huntsville, and Huntsville Hospital are co-sponsoring the conference, which will take place at the Huntsville Marriott.

The course is designed for primary care physicians, nurses, pharmacists, and other health professionals. Topics on Saturday, September 30, are "Antibiotic Update", Dr. Harris; "Sleep Disorders", Dr. Paul LeGrand; "Tuberculosis", Dr. Robert Serio; and "Community Acquired vs. Hospital Acquired Pneumonias", Dr. Robert H. Alford. Dr. LeGrand and Dr. Serio are clinical assistant professors of internal medicine/pulmonology at the School of Primary Medical Care. Dr. Alford, a frequent speaker at the school's conferences, is clinical professor of medicine/infectious disease at Vanderbilt University School of Medicine and medical director of Park View Medical Center in Nashville.

"The germs that cause pneumonia in patients already hospitalized are different from those causing pneumonia in the general population," according to Dr. Alford. "Before we even get the lab test back, we can tailor the treatment based on the probabilities existing in the two populations."

Dr. Alford will speak on Sunday, October 1, on "Infections in Diabetics." "Long-term diabetics who require insulin are much more at risk for certain types of infections than the general population, particularly infections of the foot and lower extremities. Gangrene in the extremities is five times more prevalent among chronic diabetics than it is among non-diabetics."

Other topics on October 1 will be "Septic Syndrome", Dr. Robert Humphrey, Huntsville pulmonologist, and "Rehabilitation for Chronic Pulmonary Disease", Dr. Luther F. Humphrey, Huntsville pulmonologist.

Spouses and guests of the conference participants are invited to a number of special events, beginning with a coffee on Saturday morning. Lunch for participants and their guests features a talk by the Rev. Dr. Walter G. Nunn, pastor of University Baptist Church in Huntsville, on "The Therapy of Humor in the Healing Process." Optional afternoon activities include golf and tennis tournaments and a tour of the Space and Rocket Center. On Sunday a brunch for participants and guests will feature a presentation on "Tax Tips for Medical Professionals" by Dolores Mohlere, CPA, IRS revenue agent in Huntsville.

The infectious disease/pulmonary conference has been approved for continuing medical education credit for physicians by both the American Academy of Family Physicians and the American Academy of Family Physicians (eight hours). Application is pending for continuing education credit for nurses and pharmacists.

For more information or to register for the conference, call us at 1 800 222-0300. AT&T The right choice.

Identification cards will be made Sept. 18--Oct. 6 by Marian Delaney Sampson news reporter

In a recent interview with The Exponent, Assistant Vice President for Enrollment Management Ron Koger said that photo ID cards will be made in the game room of the University Center. Students must present a current class schedule to have the cards made.

There is no charge for the first card, but there will be a $10 charge for replacing any cards.

Identification cards will be made from Sept. 18 until Oct. 6, from 9 a.m. until 9 p.m. on Mondays through Thursdays, and 9 a.m. until 5 p.m. on Fridays.

Students need the ID cards to use a number of university services including the UAH library. Students who have photo ID cards may have the cards validated for the current term by taking them to the Information Desk. A student must present a class schedule to get a validation sticker for the Fall 1989 term.

Koger said he would be very interested to know how students reacted to the prioritized registration. Written comments should be directed to him in care of UC Room 119.

Koger said that student photo ID cards are $100 for physicians and $60 for other health professionals. For spouses/guests the card fees and other information, please phone the School of Primary Medical Care continuing medical education office, 551-4980.

"Some long distance companies promise you the moon, but what you really want is dependable, high quality service. That's just what you'll get when you choose AT&T Long Distance Service, at a cost that's a lot less than you think. You can expect long distance rates, 24 hour operator assistance, clear connections and immediate credit for wrong numbers. And the assurance that virtually all of your calls will go through the first time. That's the genius of the AT&T Worldwide Intelligent Network."

When it's time to choose, forget the gimmicks and make the intelligent choice — AT&T.

"If you'd like to know more about our products or services, like International Calling and the AT&T Card, call us at 1 800 222-0300."
Quick appointed VP for finance and administration

by Rick Mould for The Exponent

Jerry Quick, associate vice chancellor for Business at Vanderbilt University, has been appointed to the post of vice president for Finance and Administration at UAH by President Louis Padulo. Quick's appointment will become effective Nov. 1, 1989, but he will be working with UAH as a consultant on several major projects in the interim. He has served as Vanderbilt's associate vice chancellor since 1985, supervision of a total staff of 300 employees and an annual sales/pur- chase/budgets of $80 million.

"We very much need Jerry Quick’s wide range of skills and experience at UAH," Padulo said. "He brings with him the kind of knowledge and talent necessary to run the business affairs of a complex and aggressive institution like UAH, where he will face organizational challenges in responsibility areas very similar to those he has managed at Vanderbilt. We are very fortunate to have convinced him that the next step in his very successful career should be at UAH."

In addition to his nearly five years at Vanderbilt, Quick's career has included employment at Central Michigan University as assistant vice president for Residences and Auxiliary Services (1976-1985), and as assistant and then associate director of financial operations at AmSouth Bancorporation AmSouth Bank N.A., a member of the FDIC.

Quick's accomplishments in his previous positions have ranged from departmental reorganizations and facility renovations to programming and operation of residence halls and computer system installations. He has served on a number of university administrative committees and as an officer in several professional organizations.

In addition, he has authored numerous publications and made several presentations in the fields of budget management, college housing, and personal computing. He was recognized by Vanderbilt University for exemplary effort in support of that university's affirmative action and equal opportunity efforts.

Quick received his bachelor's degree in Business and Physical Education from Indiana State University (1961) and a master's degree in Education Administration from Indiana University (1965), and has attended management seminars at Harvard University's Graduate Schools of Business and Education.

FINANCE OFFICER'S WORKSHOP

WHERE: University Center 131

DATES & TIME: September 27, 1989
11:30 a.m. - 1:30 p.m.

September 28, 1989
7:30 p.m. - 9:30 p.m.

Deadline for submitting club budget:
October 5, 1989 at 8:00 p.m.

AMNESTY COUPON

FACULTY AND STAFF

Jake forgives the faculty and staff for the "D" in math, the "F" in ethics, the rejected lab report, the academic probation, the recommendation for disciplinary action, and the six years it took to get to sophomore level.

Present this Amnesty Coupon and your UAH ID and receive one free draft beer with any food purchase.

VALID THRU OCTOBER 31, 1989

Why So Many Students Are Taking This Book To School.

It doesn't take a degree in economics to appreciate the benefits of Check-For-Less.

Benefits like the $2.00 a month service charge, free personalized checks and no minimum balance requirement. Locations that are convenient for students. Plus a free William Tellercard that gives you 24-hour access to more than 24,000 automated teller locations throughout the United States and Canada through the ALERT, HONOR, AVAIL and CIRRUS networks.

These benefits make Check-For-Less one of the smartest books you can carry to school.
President Padulo speaks to Accounting Club

by Marian Delaney Sampson
news reporter

UAH President Louis Padulo spoke to the Accounting Club Sept. 18, stressing the importance of writing and language skills for university students.

Other topics included professionalism and how the images of various professions had been improved by the people in the fields who banded together to improve their public relations.

"The main thing I want to convey to you is that you have a responsibility to this profession. It's not just something you get paid for," he said.

The president continued by saying that he had no fear that the students would be well trained but we'd like to think that you'll also be well educated." He concluded by telling students that they have an obligation to their professions and that when students begin fulfilling those obligations, "at that point you will become real colleagues with your professors."

Dr. Grover Porter introduced the accounting faculty to the students. He also expressed his appreciation to Padulo for speaking at the meeting and he presented the UAH president with a small gift he had picked up in Vail, CO.

Porter said it was a reminder of the small gift he had picked up in Vail, CO. Padulo explained that the first time he came to UAH, he had been recovering from a number of broken bones from a skiing accident. The gift Porter had presented him with was a small pin commemorating that event.

Attention students! Here's a checking account deal you can't refuse. Try Central Bank's Checker Account with NO FEE for a full year. That's a $22 savings on our already low-cost checking account.

It's a great deal any way you look at it. There's no minimum balance requirement. And you get unlimited checkwriting. Plus, if you open your Checker Account between now and September 30, there's no monthly service charge for a full year. After that, it's still a great deal at only $1.83 a month!

If you use ATMs, you can save even more with our HandyBank2 automatic teller card. For just a flat $16 a year, use it anytime you want at more than 400 Alertsm locations in Alabama. more than 4,000 ATMs in Florida and Georgia, and 21,000 PLUS System sm ATMs nationwide. Without ever paying a penny in per-transaction fees.

Summary: No monthly service charge for a whole year. Only $1.83 a month the next year. A great ATM card option. What more could you ask for — except maybe the convenience of Central's Saturday banking hours. And locations close to campus.

This special offer ends September 30th. So what are you waiting for? The money you save every month could come in handy during those middle-of-the-night pizza cravings. Think about it.

Accounting Club President Pat White gave gifts to last year's faculty advisor, Dr. Walt Batchelder, to Padulo, and to this year's advisor Herb Justinger. Treasurer John Ortiz encouraged students to come and participate in the Accounting Club, which is not restricted to accounting majors.

The next Accounting Club meeting will be Sept. 26 at 12:15 p.m. in Morton Hall, Room 200. Betty King will be the guest speaker.

Freshman class welcomed

September 15 UAH's entering freshman class members gathered to meet each other and some members of the administration. In the University Center some of the larger student organizations had set up tables to give information.

Besides the information, at least three petitions were circulating, one complaining that course listings often do not list the name of the professor teaching a certain section, only the notation "Staff." SGA Publicity Director Dennis Varner appeared in a fake goatee and greeted students as the famous "Dr. Staff."

In the Exhibit Hall Director of Student Development Services Gary Biller welcomed the freshmen and introduced SGA Vice President Mike McCracken. UAH President Louis Padulo invited students to take full advantage of the fact that UAH is a research institution by working with faculty members when possible.

The students went outside to have a class picture made for a planned yearbook, then to enjoy a barbeque. A local band, Driver, played, but unfortunately many of the freshmen left early to start their weekend.

Launch set for November 15

by Rick Mold
for The Exponent

The launch of a commercial suborbital rocket that will carry 12 microgravity experiments has been set for Nov. 15 by the UAH Consortium for Materials Development in Space (UAH CMDs).

The UAH consortium has contracted with Space Services Inc., Houston, Texas, to build the rocket. The launch will be conducted from the Naval Ordnance Missile Test Station at the U.S. Army's White Sands Missile Range in New Mexico. The rocket will carry the payload to an apogee of 200 miles and give the experiments between seven and eight minutes of microgravity or weightlessness.
Consortium to be headquartered at UAH

by Rick Mould
for The Exponent

A consortium led by UAH is one of 17 universities selected by the national Aeronautics and Space Administration for participation in its National Space Grant Fellowship Program.

The UAH selection was announced by U.S. Sen. Howell Heflin (D-Tuscaloosa). The Alabama Space Grant Consortium will be headquartered at UAH. The consortium includes Alabama A&M University, Auburn University, the University of Alabama at Birmingham and the University of Alabama at Tuscaloosa.

Consortium affiliates are the University of Tennessee Space Institute, the University of Mississippi, Mississippi State University, The Space and Rocket Center, The Boeing Company, Wyle Laboratories, and SCI Systems Inc.

The UAH selection was announced by U.S. Sen. Howell Heflin (D-Tuscaloosa). The Alabama Space Grant Consortium will be headquartered at UAH. The consortium includes Alabama A&M University, Auburn University, the University of Alabama at Birmingham and the University of Alabama at Tuscaloosa.

Consortium affiliates are the University of Tennessee Space Institute, the University of Mississippi, Mississippi State University, The Space and Rocket Center, The Boeing Company, Wyle Laboratories, and SCI Systems Inc.

Other affiliates may be added at a later date.

Dr. Harold Wilson, dean of the UAH College of Science, will serve as director of the Alabama Consortium.

"We are certainly pleased with our selection," said Dr. William Lucas, director of UAH's Space Initiative Program. "This will open the door for UAH to make even larger strides in the area of space-related education studies, research and public service."

UAH President Louis Padulo said, "We want to thank Sen. Heflin for his foresight and hard work on this legislation that established the program. As one of the original sponsors of the Space Grant University bill, he was instrumental in guiding the bill through Congress."

The NASA program is intended to promote partnerships and cooperation among universities, federal, state and local governments and aerospace industries. It also is intended to facilitate and encourage the application of multi-disciplinary university resources to aerospace and related fields and to promote a strong science, math and technology educational base from elementary through university levels.

For more than two years, UAH has been preparing for Space Grant University designation. In 1987, the UAH Space Initiative provided a...
“The tools you need...are understanding and...vocabulary.”
by Jane Dudley
editor

Classes have started and you are realizing how much work they will be. You have already forgotten the excitement (if you were going to have any) of the first week. Now is the time to ask yourself what advantage a college education will gain you.

The term “liberal arts” is a prerequisite for the job I want. “I want to make more money.” “I want to meet girls (or guys) and party.” These are not bad answers, but they are not complete. There are people who get good jobs, make money and party without having any degree.

So why go to school? It’s not the degree of importance you would think. There are some people who call this an obsession, and that is why they are, and should you submit yourself to studying in that “liberal arts core”? Because you live in one of the richest and most technologically advanced countries in the world. You may like or dislike riches and technology, but if you like them, you will want to help preserve and increase them and get your share of them. If you don’t like them, they will want to change their form or apply them in a different way. The catch is, you can’t do any of those things by yourself. As long as you live in the western world, and you do, as a fish lives in water, you will be dealing with people who, whether by university inculcation or not, have had their thinking shaped by that liberal arts core.

Look at it this way: suppose you know nothing about the way a car works and suppose your car is broken. You do not understand what isn’t working in it, so you certainly don’t have the tools you need to fix it. You must call in someone with insight, someone with the right education (in this case, you call a mechanic) to advise you. You feel uneasy. Does he know what he’s talking about? Does he know what you want him to do, so you entrust your car to him and he does what he thinks is best with it. You have little say.

If you read that paragraph again. For the car, substitute any complicated 20th-century problem in the news. The tools you need to work on it are understanding and a large vocabulary (both general and in regard to the problem). UAH will teach you to use them, if you are willing. If you are not willing, you will be leaving decisions and actions that affect your life to others. You will not know what happened, but you will sense it and you will resent it.

Now, two notes, the first to full-time students of traditional age. Often when something is expected of you at a given time, it’s easier to do it at that time than at some later time. This is your time to be College Students. Be sure to mess up now you have to do it then. Study hard, taking classes one by one and stealing time from spouse and babies to study. We all admire those who must study that way but who get good grades, but it is the easiest thing for Act like real students now while you have the means to do so full time.

The final note is to any student who is here to get some studying done — Those who are here to party do not have the right to impedance your studying with their partying. Complain. It’s your right.

“There was a time when UAH students weren’t concerned...”
by Gregory Casteel
columnist

Well, it’s Fall Term, and we here at The Exponent would like to welcome everyone back to Morton Hall. We would especially like to welcome our new students. For the benefit of our incoming transfer students, we would like to take this opportunity to explain a little about UAH, and the way we do things here. Now pay close attention, because this is a bit confusing.

You might think that UAH is just another average university. I’m sorry to disappoint you, but you are mistaken. UAH is a unique university. You will find this out before long. At any normal university there is something known as “campus life.” I’m certain that you all have heard about campus life. At all major universities the campuses are almost always abuzz with activity. Parties, concerts, sporting events, recreation, groups of people doing their own thing. But UAH is different. It is the more common semester system. Many members of the student body (as well as the faculty) are opposed to these changes, and the way in which the decision to bring about these changes was made. Both students and faculty have protested against Dr. Padulo’s decisions, but with little effect. It seems that these changes will be made despite opposition.

You see, UAH is a commuter university. That means that the students commute here from home, and when classes are done they commute right back home. Nobody seems to want to spend any more time on campus than they absolutely have to. Thus, UAH is a boring campus. Now that doesn’t mean that UAH is a bad university. Academically, there are few schools that measure up to UAH. But outside of the classroom, you’ve got to look long and hard to find anything interesting. But if you’re really looking for an extracurricular activity to occupy your time, I’ve got a couple of suggestions. There is something for everyone. If you want to fill good people to fill staff positions. We need writers, production people, ad salespeople, and assignment editors. If you’re interested, drop by the Exponent offices in the University Center.

Another activity you might be interested in is the Model United Nations club. Anyone interested in international relations is welcome to join. It is a fun and exciting organization. There is also the Political Science department in Morton Hall.

Admittedly, you are looking for a much more interesting place than it used to be. There was a time when UAH students weren’t concerned with what went on here. You lived in your dorm, played sports, and an absolutely wonderful campus newspaper; but if you expect to find the type of campus life here that you would find at Auburn or Tuscaloosa, you’re in for a major disappointment.

“I’ll admit that you have to look...”
by Lawrence Specker
guest columnist

UAH is a garden. There’s not much growing in it at the moment, but it has the potential to become a beautiful, busy, productive place. It has room for mystery, for discovery. I’m not talking about the physical appearance of our campus, which is no ivy-clad sculpture since, after all, it has existed for less than thirty years. Our campus is pleasant and good looking in its own modern, efficient way, and there is nothing at all wrong with that. No, I’m talking about that elusive quality known as "the college atmosphere." It is a trait many find lacking here. There is no school spirit, they say, there is no involvement.

I’d like to admit that you have to work hard to find the elusive “college atmosphere” here, but it’s not dead. It is the fruit of the garden, ready to burst to life when spring comes. This state of readiness is why, for all his faults, I continued to page 5

Letter Policy

The editorial board of The Exponent has established the following policies concerning letters to the editor for the 1989-90 year.

The Exponent welcomes concise letters to the editor from the UAH community. Letters will be given to the editor within 5 business days of receipt. Letters may be edited, shortened, or rearranged for space and clarity; any original handwritten letters will be accepted. Letters will not be corrected for spelling, grammar, or punctuation.

The Exponent will accept letters to the editor Friday, 5 p.m., before the following week’s newspaper. All letters will be verified as authentic before they are printed, and authors may request anonymity. All letters must contain an address and telephone number where the author can be reached. In the event that the author cannot be reached by Monday of the following week, the letter will not be published the following week. Names of authors will be withheld upon request. Letters not meeting these requirements will not be published.

The Exponent attempts to publish all letters to the editor. To give others an opportunity to present their own views, the Exponent reserves the right to place priority over recurring writers. Mass-produced or mass-copied letters will be published at the discretion of the Managing Editor. Letters not meeting these requirements will not be published.

The Exponent reserves the right to alter the content or meaning of a letter. The editorial board reserves the right to edit lengthily letters. All letters must be 500 words or less. The editor has final approval of all letters to be published.
"Education is (or should be) more than going to classes..."

by Marian Delaney Sampson
features editor

In the midst of all of the good advice you are getting from your parents, spouse, children, teachers, advisors, friends and enemies I would like to interject a few of my own thoughts. GET INVOLVED!

Education is (or should be) more than going to classes and grinding it out so you can get the union card to make big bucks. Education on a college campus is not preparation for the real world. This is the REAL WORLD folks. Every opportunity (which sometimes come disguised as problems) that you will face in the 'real world' exists right here on the UAH Campus.

"All well and good," you say, "but how do I get involved?"

There are a multitude of ways. On a semi-commuter campus such as ours maybe the most important thing to do is just show up. For example, FallFest will be occurring this week. In looking at the list of activities there should be at least one that you might like to try (FAIR WARNING: Do not try to cut in on me in line for the Hot Air Balloon).

Any one who does not attend at least one FallFest activity is practicing poor consumerism. The activities are advertised as 'free.' I feel that that is a little misleading to students. Most of the 'free activities' advertised at UAH, I think should be called PRE-PAID. Students who keep paying for activities that they are not going to enjoy need to take a few courses in economics.

There are a number of other ways to get more value out of your years at UAH. Since I've been practicing to be a student for a quarter of a century I feel eminently qualified to pass on what I've learned in the hopes that there is one student out there who can benefit from my errors. I spent a number of years taking classes and stick around for a little while. Guess what; else? I've learned a lot more from my extra-curricular involvement than from any of my classes (and I've learned a lot in my classes from some excellent professors).

I'd like to tell you a secret, if you promise not to let too many people in on it, okay? I even get paid for some of the things that I like to do. I can even figure how to get paid in the 'real world' for doing what I like to do I might get a degree.

"Treatment can help people...recover and rebuild their lives."* 

This letter comes at a time when drug and alcohol abuse together are-sapping the strength of our nation and ruining the lives of millions of people nationwide. In a televised address recently, President Bush outlined his proposed National Drug Control Strategy. One important provision announced was a proposed increase of $250 million for drug treatment services. The proposal represents a 13 percent increase in total national spending. On a national level, it is estimated that we are treating about 17 percent of the 6.5 million addicts who need treatment. The President's plan would raise this to 19 percent.

I will do everything in my power to ensure that Alabama continues to upgrade its treatment services and support the national trends for additional substance programs.
Circle K

Welcome back to school! The Circle K Club has kept busy this summer. We have been going to the Humane Society for at least once a month. Also, we recently had ten members attend the 34th annual Circle K International Convention which was held in Cincinnati, Ohio. Everyone had a great time.

For those of you wondering what Circle K is, let me briefly explain. We are the world's largest collegiate service organization with over 10,000 members on over 600 campuses worldwide. Our primary purpose is to provide service to our campus and community. We do this through various service projects such as holding a dance to benefit United Cerebral Palsy, dressing up on Halloween to visit children at a local hospital, and the list goes on.

If you are interested in learning more about Circle K, please come to any of our meetings. Meetings are held every Tuesday at 8:15 p.m in the University Center, Room 127. Also, we have an Open House the first Thursday of each month. Everyone is welcome.

SWE

The first meeting for Society of Women Engineers will be an ice cream social held in the Engineering Building, Room 123 this Thursday, Sept. 29 at 8:15 p.m. All engineering and computers majors are invited to attend. For more information about SWE, call Kate Leonard at 895-6564.

Model UN

The UAH Model United Nations club is a fun and exciting organization which allows students to discuss and debate important international issues with students from all around the United States. Model UN is a simulation of the proceedings of the actual United Nations. Students act as representatives from a particular country and they represent that country in the UN General Assembly, Security Council, and Economic and Social Council.

Model UN gives you the opportunity to take a UAH sponsored trip to a Model UN Conference. In the past we have gone to Auburn, Mobile, and St. Louis. Before a conference, the club meets regularly to plan the trip, discuss the policies of the country we are representing, and to hone our debating skills. Model UN can be hard work, but it's always fun.

The UAH Model United Nations club is open to all UAH students who are interested in international relations. If you would like to be a part of Model UN, stop by the Political Science Department in Morton Hall.

EMTs

A refresher course for all levels of emergency medical technicians (EMTs) will meet on Tuesdays and Thursdays from September 29 through November 29, 1989 in the UAH Clinical Science Center at Governors Drive and Gallaher Street.

The course meets the standards required by the National Registry of EMTs for EMTs to maintain National Registry status. It will serve as a review for EMTs who are preparing to take the National Registry exam.

The course will cover the six divisions and applicable skills of the National Standard Curriculum set by the U.S. Department of Transportation for the EMT Basic, Intermediate, and Paramedic levels. Classes will meet from 6 to 10 p.m., with 0.4 required CEU's awarded for each class attended. Basic and Intermediate refresher students will meet on a schedule adjusted for the appropriate level.

Tuition is $75 for the Paramedic and Intermediate levels and $50 for the Basic level. All tuition fees include the textbook, "The Paramedic Manual." For more information and registration procedures, phone the UAH Emergency Medicine Program at 855-4413.

Children invited to UAH program

Children age 3 to 11 are invited to UAH Saturday mornings at 10:30 for Children's Hour. Beginning Sept. 23, the fall term of Children's Hour will begin with Hodge Podge Day. The following Saturday, Sept. 30, will feature "Having Fun With Sounds." If you're interested, register by phone or in person at 895-6445.

Children's Hours will be held in October, beginning Oct. 7 with Nature Day. Art will be featured next, with Pudding Painting on Oct. 14 and Mosaic Art on Oct. 21. To celebrate the children's favorite day — Halloween — Ghosts and Goblins Day will be held Oct. 28.

All Children's Hours are scheduled for Nov. 4. No Children's Hour is scheduled for Nov. 11. Turkey Lurkey Day will be Nov. 15.

The final Children's Hour of 1989 will be Dec. 16 with Ho Ho Ho Holiday. All Children's Hour activities are free and will be held in the University Center. For more information, call 895-6445.

SOTA

Students Over Traditional Age (SOTA), a peer support network, will have a meeting Thursday, Sept. 21, at 12:15 p.m. in the University Center, Room 137. Come join us for lunch.

AIAA

Are you a student? Are you interested in aeronautics, astronautics, or related topics? If you answered "yes" to both of these questions, then the UAH student branch of the American Institute of Aeronautics and Astronautics is for you.

The AIAA is the nation's oldest and largest professional technical society in aeronautics and astronautics. As a student member you can become a part of the aerospace community in Huntsville. Members are also involved in projects such as Sub-Orbital Academic Research (SOAR) and the Human Powered Helicopter (HPI) project.

The UAH student branch of the AIAA will hold a meeting Thursday, September 21, 1989 at 8:15 p.m., in room 107 of the Engineering building.

Current projects and plans for the coming year will be discussed. Everyone is invited to attend.

For more information on AIAA and UAH, please call room 110A in the Engineering Building and pick up a registration form.

SAEA

Are you interested in seeking a career in education? If so, then we need for you to become a part of SAEA (Student Alabama Education Association). Our first meeting will be held in the teacher's material center located in Morton Hall on Thursday, September 28, at 12:15 p.m. We invite you to come and partake of the friendly association with those fellow students who are seeking the same goal in the field of teaching. Refreshments will be served. Please make a point to attend.

SEDS

There will be a meeting of the Students for the Exploration and Development of Space (SEDS) on Tuesday, September 26 at 8:15 p.m. in the University Center Room 126. Summer and Fall activities will be discussed. The club is open to any student with an interest in becoming a student member, come by room 110A in the Engineering Building and pick up a registration form.

A chapter of a national computer science honor society has been approved for top students at the University of Alabama in Huntsville's Computer Science Department. UAH has about 400 students majoring in computer science. The UAH chapter of Upsilon Pi Epsilon is only the third in Alabama and the 85th in the U.S. UpZip Pi Epsilon promotes scholarship and investigation in computer and information science.

Membership in UPE's Gamma Chapter of Alabama is open to UAH undergraduate and graduate students majoring in computer science, and to UAH computer science alumni. The faculty advisor, Dr. Ed Bosworth, has information about membership guidelines. For additional information, call Dr. Bosworth at 895-6614.
Biology club open to students in all fields

by Pat Neucorn
features reporter

Have you ever seen those academic clubs and thought they weren’t for you because you weren’t majoring in the field? Well, the Biology Club is one that encourages members from any discipline, according to club president Michele Gately, a senior and English major.
The club is for “anyone interested in life sciences, plants and animals,” says Gately, who is a liberal arts major and who got involved in the club through a sorority sister.
The club has many exciting field trips planned, including a trip to Dauphin Island for a marine biology tour. The club also plans to tour museums, go on nature hikes and do some camping. White-water rafting and canoeing to see alligators in their natural habitat are just a few possible field trips, says Gately.

One of the benefits of being a club member is getting a behind-the-scenes look at museums. “You get to see parts of museums that others don’t get to see,” says Gately. Last year the club went on a field trip to the Anniston Natural History Museum and was given a private tour. Club members met the people who run the museum and got to "poke around" in the attic of the museum.

An added benefit to being a club member is the close contact members have with facility members. "Students get to meet faculty members who might could give them good recommendations," says Gately.

Meeting professors on a social level strengthens ties between students and the professors, she says.

For Gately the club has had an added benefit — her current work as a research assistant at Essex, doing scientific editing and writing. "One main reason I got hired was because I was so interested in life science," she says.

Anyone interested in information on the club can contact Michele Gately at 881-3784 or Dr. Garstka in the biology department at 881-6200.

Robin Greenstein to perform on campus Sept. 23rd

Robin Greenstein will bring her emotionally charged lyrics and sharp observation to the University Center Cafeteria this Saturday, Sept. 23, at 7 p.m. in a free concert.

Consumente musicianship, soulful singing, and lyrical insights come together in her visions of modern times. Her lyrics offers observations about the ways in which communication between people often breaks down. Her descriptions of people in conflict are told with introspective, several joyous, but they have one thing in common; a way of reaching out to people and touching them deeply.

Greenstein’s heavily influenced by urban jazz, country blues, traditional folk music, and good old rock’n’roll. In a typical set, scattered among her own songs, you might hear an old Gershwin pop standard, a Rev. Gary Davis blues song, or an old-timey tune on the banjo.

An exciting singer, versatile and accomplished banjo player and guitarist, Greenstein is impressive to watch and hear. She has reached back into her musical roots while confronting the problems of the heart to create a sound that is uniquely personal and a lot of fun.

FALL TERM FILM SERIES

"EDDIE MURPHY RAW"
Wednesday, September 27 at 8:15 p.m. in the University Center Deli. Room 146.

COMING SOON:
"YOUNG FRANKENSTEIN"
An outdoor film on the lawn north of campus housing, building 700.
Free Hot Dogs and Marshmallows!
Friday, October 6 at 7:00 p.m.

Admission is free to all UAH Students, Staff, and Faculty.

Presented by the Association for Campus Entertainment.

The Exponent is now taking applications for the position of Proofreader. Job responsibilities include checking all copy for errors, setting all corrections, and pasting all corrections. Usually works Mondays and Tuesday only; occasionally on Sundays. $60.00 per month.

For more information, contact The Exponent office at 895-6090 or come by UC Room 104 and fill out an application.
"Kickboxer" adds little to familiar theme

by Lawrence F. Specker

Martial-arts fans will no doubt be pleased to hear about a new martial-arts movie. It's been awhile since the latest "Karate Kid" sequel came out, and no doubt the fans are getting a little itchy. "Kickboxer," the latest production in this vein, should be the answer to their prayers.

The biggest question, though, is whether or not the rest of us should pay to see "Kickboxer." It was made for "show them who's boss." Anyone who liked all three of those films has, in effect seen this one. Anyone who liked all three of those series shouldn't waste any time going to see "Kickboxer." It was made for them.

The story starts with two kickboxing brothers. The younger brother, Van Damme, is good, but his older brother is the U.S. champion. Having easily beaten everyone in this country, the champ decides to go to Thailand and "show them who's boss." He picks a fight with Tang Po, who is not only the best, but a psychopath as well. Van Damme tries to warn his brother, but to no avail. They fight, and his brother is confined to a wheelchair by an injury he receives in the fight.

Van Damme wants revenge. A crazed, ex-special-forces friend named Taylor takes him to a mysterious old man in the mountains who agrees to train him. Naturally, his training is the only original thought in the story. Anyone who has seen a Rocky movie, a Rambo movie, and a Karate Kid movie has, in effect seen this one. Anyone who liked all three of those series shouldn't waste any time going to see "Kickboxer." It was made for them.

As usual in Hollywood, any movie worth making is worth making twice. There is another movie coming soon, titled "Bloodfist." It will star some of the world's greatest kick-boxers, and they will be fighting in the Orient, where one of them was murdered. I think his brother will be trying to avenge him, but maybe I'm mistaken. Anyway, "Kickboxer" is a decent film, quite good as martial-arts movies go, but don't worry too much if you miss it.
Vocal Arts Ensemble to perform on campus

On Friday, September 29 the Vocal Arts Ensemble, composed of Charlotte Regni, soprano, Verlene Atkins, mezzo-soprano, R. Paul Crab, tenor, and D. Royce Boyer, baritone, with pianist Michael Dell, will present a recital sponsored by the UAH Department of Music this season.

Ms. Regni, Drs. Crab and Boyer are members of the UAH faculty, teaching voice and other music courses. Ms. Atkins is Director of the Vocal Arts Division at the High School for the Arts, and choral director at Lee High School. Mr. Dell is organist and music associate at the First Baptist Church in Huntsville.

The program will include a song cycle, "In a Persian Garden" by Liza Lehmann, a late 19th-century English composer and singer. The words are selected from the "Rubaiyat" of Omar Khayyam, using Fitzgerald's translation. The very romantic composition features mezzo-soprano, soprano, and tenor voices, accompanied by piano.

Also, with piano accompaniment, the vocal ensemble will perform part songs by 16th-century composer Josquin Desprez. Several unaccompanied canzonettes by English renaissance composer Thomas Morley will be programmed with a group of Victorian part songs by Sir Arthur Sullivan, John Hatton and Thomas Balmer.

The recital will begin at 7:30 p.m. in the Recital Hall, located in the Francis C. Roberts Hall at UAH. There is no admission charge.

Comedian Cole to visit UAH Friday, Sept. 22

If experience is the greatest teacher of all, Alex Cole is its greatest pupil. Into his twelfth year of touring, Cole's highly acclaimed performances have brought him to a plateau of excellence where the line separating comedian and audience completely disappears.

Cole will bring his comedy to UAH this Friday, Sept. 22, in the University Center Exhibit Hall at 7:30 p.m. Admission is free.

In the past two years alone, Cole's achievements have included appearances on national network and cable television, tours with Crystal Gayle, Eddie Rabbitt, and others; and being voted Comedy Entertainer of the Year by over 1000 colleges throughout the country.

These distinctions are no accident. Simply put, Alex Cole is one of the cleanest and funniest comics you'll ever experience. And any comedy maven will tell you, this is rare and unlikely combination.

"A children's show for adults," is how one reviewer put it. From the moment Alex steps on stage, he transforms all of us into kids. He has this air of playful mischief — most of which he's been taught at, just like the rest of us.

"Oh, man, I've done that!" is the common reaction as Cole explores his life in tom-foolery, hideous little things we've long since forgotten — or tried to forget. He finds the sensitive nerve and then tickles it. Said one student to a reviewer after Cole's performance, "He was so down to earth...I never realized how typical my childhood was!"

In performance, Cole is a dynamo — the stage disappears, and the entire room becomes his soapbox, along with every breathing soul within. The "performance" evolves quickly into a communal romp. He gets us in touch with our own fragile mortality and makes us laugh until it hurts.

It's refreshingly clean, hilarious catharsis filled with colorful characters we all know, from neighborhood bullies to killer wasps ("the Hell's Angels of insects") and everything in between. If you are among the deprived who haven't met Alex and taken the short course in Comedy 101, it's time you did.
Pulitzer Prize-winning editorial cartoonist Mike Peters began syndicating his zany comic strip MOTHER GOOSE & GRIMM in October 1984. Today it appears in more than 300 newspapers, has been collected into paperback books and has inspired a line of greeting cards, novelty items and T-shirts.

"MOTHER GOOSE & GRIMM has allowed me an outlet for all the crazy stuff I can’t use on the editorial page," Peters says. "I love the dog — he is me!"

Evidently readers love the unflappable Ms. Goose and the weird bull terrier too! Surveys find the strip ranked third overall in popularity in the St. Louis Post-Dispatch, second overall favorite in Kansas City and finished in the top ten reader favorites category in the Chicago Tribune and the Sacramento Bee.

Building may be open other hours for special events!

The First Lady of contemporary country music, Emmylou Harris, was born in Birmingham in 1949. She and the late Gram Parsons received much credit for stretching the boundaries of country music and helping make it acceptable to a wider audience. Emmylou, who has since moved on to establish herself as a singer of extraordinary versatility, is now featured heavily in country and pop charts.

Rainmakers to perform Saturday, September 23

The Rainmakers will perform in concert in the University Center Exhibit Hall at 8 p.m. on Saturday, Sept. 23, with Andrew Cash opening the show. Admission is free for both events.

On their first two albums, The Rainmakers built a reputation for songs that got to the heart of the matter. Now they've made an album, "The Good News and the Bad News," that gets to the heart of their music.

Bob Walkenhorst, the Kansas City quartet's lead singer and songwriter, said their third Mercury/PolyGram album "focuses on what we do best as a band: writing concise songs, using only the instruments that are essential, and playing our guts out. We wanted this record to really sound like us and to really get through to people." The analog recording captures the band at its best. Steve Phillips' scorching electric guitar delivers everything from a nervous, flickering hook on "Battle of The Roses" to dirty, thick rhythm and blues on "Knock On Wood," which Phillips wrote.

Walkenhorst's acoustic guitar provides a dusty counterpoint; Pat Timek on drums and Rich Ruth on bass are as solid as a missile silo and almost as ominous.

The vocals are simple and honest, and on "Dry Dry Land" the band gets an assist from PolyGram's Memphis rocker, Joanna Dean.

Walkenhorst — as always, part court jester and part Missouri mule — makes his lyrics witty and full of common sense. The duties and failing of those who head families and governments are made brutally clear on "Reckoning Day." "Spend It On Love," "We Walk The Levee," and "Horn A Plenty" get a free Budget laundry bag with every rental!

Affordable transportation for your dirty laundry.

Thanks to Budget Rent a Car, going home for the weekend won't cost you a fortune. Because, if you've got a major credit card in your own name and a license that shows you're 18 or older, all you have to do is show your student ID to receive 10% off our regular daily time and mileage rates. So call 772-9327 and make your reservations today. Then start packing.

Budget rent a car

Refueling, taxes and other options extra. Not valid in conjunction with other discounted rates or promotions. Normal rental restrictions apply. Cars must be returned to original renting location. Offer expires December 31, 1989.
The Exponent is now taking applications for the position of news reporter. One assignment per week, $40 per month after one month internship program.

For more information, call The Exponent at 895-6090 or come by the University Center, Room 104, and fill out an application.

There are two sides to becoming a nurse in the Army.

And they’re both represented by the insignia you wear as a member of the Army Nurse Corps. The caduceus on the left means you’re part of a health care system in which educational and career advancement are the rule, not the exception. The gold bar on the right means you command respect as an Army officer. If you’re earning a BSN, write: Army Nurse Opportunities, P.O. Box 7713, Clifton, NJ 07015.

Army Nurse Corps. Be all you can be.

TIE BREAKER
Predict the total points scored in the Alabama-Kentucky game:

NAME
ADDRESS
CITY/STATE/ZIP
PHONE

RULES
1) Select one winning team or a tie for each game listed. Two or no marks will result in a disqualification of the entry.
2) Estimate the combined points scored by both teams in the tie-breaker game.
3) Weekly winners will be determined by the most correct guesses selected. In case of a tie, the tie-breaker will be used to determine which contestant is closer to the combined scores of the two teams.
4) The decision of the judges is final.
5) Entries must be received at the UAH University Bookstore, ground floor of the University Center, by 5 p.m. Friday preceding the game day.
6) Only three (3) entries per contestant per week are permitted.
7) Employees of the University Bookstore and the University Center as well as The Exponent staff are ineligible.
8) Each weekly winner will be awarded a $10 gift certificate towards clothing and gifts from the University Bookstore, have their name announced as the weekly winner in The Exponent, and be eligible for the grand prize drawing.
9) Only weekly winners will be eligible for the Grand Prize drawing at the end of the season.
