Recommended Citation

This Book is brought to you for free and open access by the University Advancement at LOUIS. It has been accepted for inclusion in Bulletin Board by an authorized administrator of LOUIS.
UP IN THE AIR . . . IT'S A PLANE • • • IT'S CHARGER ONE! . . . A sleek four-seater 1979 Beechcraft Sundowner 180 valued at $38,750 has been donated to The UAH Foundation by Mr. and Mrs. Thomas E. Rast of Birmingham. Rast is a member of the UA Board of Trustees whose philanthropy has also extended to the other UA campuses.

The Foundation has the option of leasing the plane, selling it or using it in any way felt to be of greatest benefit to the university. Immediate plans are to lease the plane to Huntsville Aviation and to offer courses leading to pilot certification through the Division of Continuing Education and the Health, Physical Education and Recreation Program. The airplane, which will be painted in UAH colors and will bear UAH insignia, is the largest gift ever received by The Foundation from a donor outside the Huntsville area.

The plane was accepted on behalf of The Foundation by Charles Shaver, UAH Foundation president, and Dr. Wright.

Dr. Wright and Charles Shaver (right), president of the UAH Foundation, pose in front of "Charger One", the four-seater airplane donated to the Foundation for UAH use by Mr. and Mrs. Tom Rast of Birmingham. Rast is one of the newest members of the University of Alabama Board of Trustees.
KEEP THE FUZZY SUCKERS WARM . . . Leonard Adcock, engineer in charge of the Johnson Environmental and Energy Center's project to obtain methane gas from chicken litter, was quoted as saying the process would "keep the fuzzy suckers warm." The study, partially funded by a grant from the Alabama Poultry and Egg Association (APEA), will determine the feasibility of using methane gas obtained from this process to heat broiler houses in the winter and provide the electricity for cooling-fans in the summer.

Poultry grower Loy Hendrix said members of the industry are enthusiastic over the UAH involvement in research to alleviate the problem of high energy costs. Poultry growers operate on a low profit margin, he said, and when energy rates rise the growers' profits decline in proportion. The bottom line, Francis Riley, president of the APEA pointed out, is the higher cost to consumers at the supermarket.

While extracting methane gas from poultry manure is not new, the JEEC study is unique in that it will address the problem of separating wood chips from the poultry litter, according to David Carter, executive vice president of APEA.

Poultry and Egg Association's Laboratory and Research Committee. Looking on are, left to right: State Senator Hinton Mitchem; Francis Riley, president of the APEA; (Dr. Wright and Whitmire); Loy Hendrix, Madison County poultry grower; and George Thomas, poultry specialist with the Morgan County Extension Service.

*****

UAH ART SERIES KICKS OFF NEW SEASON (cont.) . . .

Dr. John Conover, assistant professor of English, speech and communications, and a member of the Art Series committee, outlined the six events scheduled for the new season. They are:

- October 30-31: Ballet Repertory Theatre; different programs each night.
- November 10: Gregg Smith Singers; mixed chorus of contemporary and rarely-done older music.
- January 22: Waverly Consort "Las Cantigas de Santa Maria"; music and verse of the medieval court of King Alfonso "The Wise."
- February 14: Alabama Symphony Orchestra.
- March 28: Bolcom & Morris; songs from the 1800s to today.
- April 30: Tedd Joselson, pianist.

All events will be at 8:15 p.m. in the VBCC Concert Hall. The season of six events is offered this year for less than the price of five last year, with an additional discount for UAH faculty and staff as a special bargain. UAH personnel may purchase season tickets for $25 reserved seating and $15 unreserved. With discount, UAH faculty and staff may obtain single admission tickets for $5 and $3 for reserved and unreserved seats respectively. Tickets will be available in September at the VBCC Box Office and from the Music Department on campus.
FACULTY ORIENTATION . . . The more than 40 "freshman" faculty members comprise approximately 20% of the total UAH faculty, Dr. Elmer Anderson, vice president for academic affairs, said at the Faculty Orientation Sept. 3. He told the new members that they have "an opportunity to make a significant impact on the university," and he invited them to bring their own zeal and enthusiasm to the campus. Dr. Anderson said that while many universities throughout the nation are struggling for survival and are losing both students and faculty, UAH is on a growth curve. This is partially due, he conceded, to being located in the developing region of the Tennessee Valley where a large number of industries and government installations are located. He said this fact means beneficial spinoffs for the high technology areas of the campus, but added that the management and liberal arts components of UAH will grow along with science, technology and engineering.

Dr. Wright introduced the executive committee: Dr. Colin Campbell, dean of the School of Primary Medical Care; Dr. Jeanne Fisher, vice president for student affairs; Jim Simpson, director of development and university relations; and Dr. Joe Dowdle, vice president for administration.

Dr. Wright addressed the Faculty Orientation to acquaint teachers with their new campus.

FACULTY CONVOCATION . . . The more than 40 new faculty members swelling the teaching ranks of the Schools of Science and Engineering, Humanities and Behavioral Sciences, Nursing, and Administrative Science were introduced at a Faculty Convocation Sept. 3 by the school deans: Dr. George T. Dimopoulos, dean of Science and Engineering; Jeff Bayer, chairman of the Art Department standing in for Dean Jon Rogers of the School of Humanities and Behavioral Sciences; Dr. Etta Hincker, dean of the School of Nursing; and Dr. William Ledbetter, acting dean of the School of Administrative Science. The deans were introduced to the audience by Dr. Elmer Anderson, vice president for academic affairs.

A highlight of the convocation was the presentation of a scroll to Dr. Jafar Hoomani by Dr. John Wright, UAH president, denoting the progress made by the School of Science and Engineering under Dr. Hoomani's guidance. He served as dean of S&E from August 1972 until August 1980 when he elected to return to classroom teaching.

Dr. Wright told the congregated faculty that UAH can expect continued growth, and that state funds will follow increased enrollment. "We can also expect federal encouragement of research efforts," he said.
Eugene Carter, research associate in the State Climatic Office at JEEC, prepared a final report under a Department of Energy contract detailing solar-oriented meetings in Atlanta, San Francisco, Chicago and Boston during July 1978. The meetings were all arranged by UAH. The report has been made available through the U.S. Government Printing Office under the title "Proceedings of the Department of Energy's Solar Update: Four Regional Conferences Highlighting the Objectives, Plans and Experience of the National Commercial Solar Heating and Cooling Demonstration Program and the National Solar Data Program."

Michael Crouse and Dr. Carol Wenzel were both welcomed into the Art Department September 1. Crouse came to UAH from Illinois College in Jacksonville where he taught art history, printmaking, painting and drawing. He received his MFA from the University of Michigan, Ann Arbor, in 1979. As assistant professor of art, he will be responsible for the development of the printmaking curriculum. Dr. Wenzel, who joins the faculty as assistant professor of art history, was an instructor in art history, Historical Studies Program at Stockton State College, New Jersey. She received her Ph.D. from the University of Pennsylvania in 1979. In addition to her responsibilities to the Art History Program, Dr. Wenzel will serve as director of the UAH Gallery of Art.

Florette Haisten, director of governmental relations and community affairs, is on a leave of absence from UAH until the end of October to work out of the Birmingham and Huntsville staff offices of the Carter/Mondale reelection campaign as coordinator of the campaign for North Alabama. She has been active in politics since she was 13 years old and counted paper ballot votes in Pike County where her father was the returning officer — the election official who carries the vote box to the courthouse. Her family lived 23 miles out of town in the country, and if the roads were bad or night riders were out making the dark hours dangerous, Haisten recalls sleeping with the box under her bed for next-day delivery. She became involved with politics at the presidential level six years ago.

Leonard Iseldyke has joined the Division of Continuing Education as associate director of management studies. Prior to coming to UAH, he was the business and industry representative for the Baltimore County Community College, Dundalk campus. He also taught and was an administrator for the business division. In other professional experience, he spent eight years as a personnel executive and two years in systems and finance.

Edgar King, Jr. is an August appointee in the Office of Contracts and Grants where he will deal with UAH proposals and contracts involving subcontracts and consultants, as well as TVA Task Assignments to the university. He is a recent retiree from the Marshall Space Flight Center who spent a year "travelling over the world hunting, fishing and playing golf" after 30 years experience with NASA in program control and program management of contracts and grants.

Dr. Dieter Nowak, senior research associate in transportation research at JEEC's Auto Check, has been awarded a $14,467 contract by the Argonne National Laboratory. Dr. Nowak's project is the study of the various options available to install an improved near-term lead acid battery into a present-technology-available electric vehicle and to judge the performance when it is equipped first with conventional batteries and then with an improved near-term lead acid battery.

Stephanie R. Patty has been awarded a fellowship grant for the 1980-81 calendar year under the NASA Graduate Student Research Program, with the grant renewable for two additional years. Under this program, about 40 graduate students nationwide are given the opportunity to conduct their research at a NASA center. Selection is based on the quality of the proposed research program, need for NASA facilities, relevance to NASA interests, and the academic qualifications of the students. She will do her dissertation research at MSFC in the area of Solar Physics. Her UAH advisor is Dr. S.T. Wu.

Carolyn White has been named director of the Academic Advisement and Information Center, succeeding Dr. Francis Roberts who retired August 31.
Dr. S.T. Wu, professor of mechanical engineering, has had an event-filled and rewarding summer. He received a Group Achievement Award from NASA in recognition of his participation on the Skylab project, and the significant contributions to the X-Ray Telescope experiment which contributed to an increased understanding of the sun. The American Geophysical Union cited work done at UAH by Dr. R.S. Steinolfson, senior research associate in mechanical engineering, and Professor Wu as laying fundamental ground for the understanding of links between sunspots and magnetic storms. Professor Wu was also selected by the National Academy of Sciences as a member of the American Delegation to attend the 23rd Plenary Meeting of COSPAR (Committee on Space Research) in Budapest, Hungary, where he presented a paper entitled "A Transient MHD Model Applicable for the Source of Solar Cosmic Ray Acceleration." Following the COSPAR meeting, Professor Wu traveled to Smolenice, Czechoslovakia, to give an invited review on the subject of "Numerical Simulation of Propagation of MHD Shocks in the Corona." Returning to Washington, D.C., he attended the 156th American Astronomical Society Annual Meeting (AASAM).

The following papers were presented by members of the Mechanical Engineering Department at the AASAM:

1. Dr. Steinolfson spoke on "Dynamic Simulation of Coronal Mass Ejection."
2. Dr. K.R. Krall presented "Analysis of Change in Photospheric Magnetic Fields Within a Flare-Productive Active Region."
3. Dr. S.M. Han spoke on "Further Development of Numerical MHD Model of Coronal Dynamics."

SENATOR HEFLIN VISITS CAMPUS ... U.S. Sen. Howell Heflin (D-AL) spent about an hour and a half at UAH August 29 to become familiar with the campus, its administrators, problems and plans. Dr. and Mrs. Wright gave a coffee in his honor at Echols Hill in the morning before his visit to campus.

OPEN SEASON AT THE ART GALLERY ... A collection of sculpture by Birmingham artist Sara Armstrong entitled Structure/Space/Sound opened the fall season at the UAH Art Gallery. The exhibition combines sculpture with sound to recreate the gallery space into a unique physical environment. A series of geometric and parabolic wooden structures house speakers emitting continuously replayed musical sequences of piano and percussion instruments. The display is designed to make the spectator an active participant as he or she moves through the gallery. Structure/Space/Sound will remain at the gallery until Oct. 3. The gallery will be open from 11:30 a.m. until 6 p.m., Monday through Thursday.
FACULTY AND STAFF PUBLICATIONS TO BE LISTED . . . The School of Graduate Studies will publish the fourth volume of the annual bulletin listing the publications and creative works of the faculty and staff. Dr. N.F. Audeh, dean of the School of Graduate Studies, emphasizes that you are invited to list original works which appeared (not submitted only) in the period from September 1, 1979 through August 31, 1980, and those works that were not included in the previous reporting period. Special forms have been made available in each departmental office. Dr. Audeh requests that the guidelines listed on the form be followed, free of abbreviations. Forms must be typed as they will go directly to the compositor. The deadline for submission is October 31. For additional forms, call 895-6002.

Dr. Audeh said he invites participation whether or not your department or unit administers a graduate degree program. The bulletin will include published and judged works of all faculty and staff.

RESEARCH PROPOSALS REMINDER . . . Dr. N.F. Audeh, chairman of the Research Grants Committee, reminds faculty members that the next deadline for submission of research project proposals to the Research Grants Committee is Friday, October 24. All interested faculty members, especially new members, are encouraged to apply for grants.

Each department has been sent a copy of the Research Grants Committee Manual, and answers to most questions can be found there. Application forms may be obtained by calling 895-6002. Applicants are requested to send two copies of each proposal to Dr. Audeh in Madison Hall 203.

STAFF JOBS . . . Persons interested in the following jobs should contact the Personnel Office at 895-6545 for additional information. New listings are updated weekly and posted on campus bulletin boards. UAH is an affirmative action/equal opportunity employer.

Machinist-Instrument Maker
Test Engineer
Medical Record Transcriptionist (temp on call)
General Maintenance Worker I
Electrician II
Secretary I (2 full time, 1 part time)
Sr. Custodial Worker
Library Assistant
Medical Social Worker II
R.N.
Electrical Test Technician (temp)
Mechanical Test Technician (temp)
Campus Security Officer
SECURITY CHECK . . . The campus police want to put university personnel on notice that recently there has been a campus-wide rash of incidents involving the theft of purses and/or wallets from unlocked and unattended offices. They strongly recommend that no one leave items of any value or wallets and purses containing credit cards in unlocked and unattended areas. "If you must leave your office, even for just a few moments, either take your valuables with you or lock them in your desk or secure them in some other manner," a directive from the campus police reads. You are also reminded to never leave cash in an unlocked desk.

IT'S A FACT . . . The first UAH Fact Book is slated for release on Monday, September 22. Using data currently available, the Fact Book is a compilation of information concerning university finances, faculty and staff, physical plant, students, sponsored research and general information. Due to prohibitive publishing costs, the Fact Book will be distributed only to deans, directors and chairmen. However, students, faculty and staff are encouraged to make use of the information contained in the Fact Book that will be kept on reserve in the UAH Library.

A WELL-TRAVELED ENVELOPE . . . This story comes to us from Thalia Haak, coordinator for curriculum and communication in the School of Primary Medical Care, who sent an interdepartmental manila envelope that had visited more places than many of us get to in a year. It testifies to the frugality and ingenuity of UAH employees. It all started simply enough with persons completing the regular "to" and "from" blanks. Then, an enterprising individual began pasting address labels over the completed sections for another round. By that time, someone decided to use the back side and the envelope traveled to seven more places when another enterprising individual decided to paste a blank sheet of typing paper over the used sections and begin again. In all, the envelope has gone to 28 departments so far and is still traveling around the university. Thanks, Thalia, for sharing this idea with us. We've put a red and black border around the envelope with a note to return it to News and Publications when it's about to wear out. We'll keep you advised on its travels (no betting allowed).

WHAT'S AN OFFICIAL NEWSLETTER? . . . For awhile now Bulletin Board has been carrying in its masthead the wording that it is the official monthly newsletter for UAH faculty, staff and administrators. What that means is this publication carries official university information, such as changes in the holiday schedule, retirement benefits, and the range of communication that needs to be made to employees. Using Bulletin Board for official information means a cost savings in fewer individual memos that have to be sent.

Bulletin Board is mailed to the deans and directors list and distributed on the Exponent stands each month. The deadline for submissions is the first of the month for publication the fifteenth. We welcome your comments and hope that you find reading Bulletin Board both entertaining and informative. If you have suggestions on stories or information to include, please let us hear about them in 234 Madison Hall.

The Bulletin Board Staff:

Patti Duncan, graphics, typesetting and pasteup
Gregg Geis, university photographer
Marilyn McClure, director of news and publications
Beth Russler, university news coordinator
NO MOSS GROWING ON UAH ALUMNI ASSOCIATION . . . "We're getting involved in 'political action' at the grassroots level," said Don Blaise, director of alumni affairs. While the university can not legally become involved in the machinations of political campaigns, the Alumni Association can legally spend 20% of its gross annually in the pursuit of "political action" for the benefit of the university. The $1,500 invested this year in political activism is the biggest single category for AA expenditures, and an accurate accounting of every dollar spent is filed with the federal government detailing where and how it was used.

For a first-time effort, the association shows promise of shaping up a first-class network of enthusiastic workers. A UAH alumnus living in each of the major counties of North Alabama served by UAH has been appointed as chairman for his or her area. That representative works with a committee of alumni aides to make personal contact with state legislators from that county and apprise them of the needs of the area in general and UAH in particular. This "contact campaign" was begun last year when the legislature was in session, and the busiest time of every year for these workers will be when the legislature sits. Blaise said that if necessary, the AA plans to send a delegation to Montgomery to serve as lobbyists for UAH concerns. There is much to be gained by being on the scene to buttonhole the lawmakers as opposed to trying to catch them on the phone, or hoping they will open their mail and telegrams in time to act on proposals, Blaise said.

Although the UAH Alumni Association is one of the youngest in the state, and the grassroots political action is less than a year old, the clout of its very active members is already being realized. The alums feel that their endeavors, combined with those of university administrators and other spokesmen, were an asset in gaining the first increase in state appropriations received by UAH in two years when the 1979-80 allocation came to $12 million instead of the $10 million previously announced.

CPA COURSE TAUGHT HIGH SCHOOL SENIORS . . . Accumulation, a highly accelerated course in computer programming and accounting, was taught by UAH business faculty members in August for 40 "exceptionally sharp students who will be high school seniors in the fall," according to their evaluation by Jack Fay, CPA and Ph.D. who coordinated the program. Dr. Fay is an assistant professor in business administration and economics. A cooperative project of the Alabama Society of Certified Public Accountants (AICPA) and UAH, the program has graduated about 350 students since its beginning in 1971. Dr. Fay said that many students who have taken the summer accumulation course in the nine years it has been taught have elected to enroll at UAH after graduation from high school, and some have decided to enter the field of accountancy. The non-credit course was offered free to the students, all of whom were drawn from the top 20% of their classes, as the cost of the program was picked up by the AICPA and large accounting firms.

UAH speakers assisting Dr. Fay in the program were Eugene Bryson, Ph.D., Sonja Osterman and Gary Billions, all of the accounting faculty; George Turnmeyer, director of the Co-Op Program; James Gibson, financial aid director; and Frank Hrabe, assistant director of admissions. Off-campus personnel participating in the program's presentation were Larry Boyles, vice president of finance at First Alabama Bank; Ron Burleson, controller, Huntsville Public School System; Behn Taylor, retired government accountant; and Gary Smith, a UAH graduate who passed all of the CPA exams at one sitting and who is currently employed by Touche Ross in Birmingham.

LOST AND FOUND . . . A Softriter pen was found in room 100 of the Nursing Building immediately following the Faculty Orientation Sept. 3. It can be claimed by calling and describing it to Barbara Jump, academic affairs assistant, at 895-6337.
ART AT 55 MPH (REMEMBER THE BURMA SHAVE SIGNS?) ... The Baltimore-Washington Turnpike is about to become an art gallery, and it will be unique. "Imagine sculpture designed to be seen while driving 55 mph. It imposes a whole new approach to art that considers speed, angle of view and length of time available for viewing," said Jeff Bayer, chairman of the UAH Art Department, who's in charge of the project. "It's kind of reminiscent of the old Burma Shave signs that presented information in a time sequence," he added in a recent interview. "Previously, there has been some sculpture designed for rest stops on turnpikes, but it has been very rare and nothing has been created collectively to be viewed at 55 mph."

Bayer was chosen by the National Park Service and the International Sculpture Center to develop the project. The works themselves could be anything from light and lasers to sculpting the landscape itself, Bayer said. He figures it will take four years to finish the project. In the meantime, he has also been asked by the Department of Transportation to work on similar projects elsewhere. Art in public places is one of Bayer's special interests, as can be seen on campus in the three large pieces near the Humanities Building. The pieces are valued at $100,000 in the art market, with all the materials and services garnered by Bayer from the local area and as far away as Birmingham. No UAH or state appropriated monies were used.

He still creates and exhibits his own work, but says more and more of his time is going into accepting speaking engagements throughout the U.S. and putting together conferences. He was the chief program and planning consultant for the 10th International Sculpture Conference in Toronto in 1978, and served as the director of the National Sculpture Conference in 1975, 1977 and 1979. The 1975 conference was held at UAH. He served as program consultant and a member of the planning committee for the 11th National Sculpture Conference in Washington last June and presented a demonstration on the Mall of his innovative spraying of molten metal onto sculpted pieces. He was one of about thirty persons invited to Vice President Walter Mondale's home.

Bayer came to UAH in 1967 and began the sculpture studio. "I wanted to explore and adapt industrial technologies to art, and go beyond working just in clay and wood to working in plastics, metals and the materials the Huntsville area has developed as a result of the space era," he said. His community interests include having served as vice president and a board member of the Historic Huntsville Foundation, developing art programs for the city schools, and serving on the planning boards for the Huntsville Museum of Art.

As for the future, Bayer is trying to put together a special humanities course that would take students to the Southwest to learn, not only about art, but other aspects of the region. "I believe education should be an adventure. Imagine standing in the ruts of the Santa Fe Trail, looking around, and not seeing anything man-made for miles and miles. It makes you realize what people went through to settle our country." His vision is a mini-university on the road that cuts across academic disciplines. In the past he has taken classes to New York City and Chicago to study the architecture. He also runs the Visiting Artist Series at UAH.

Art Department Chairman Jeff Bayer wraps a sculpture on its way to the Alabama Invitational Sculpture Show. Bayer submitted slides of three of his works and all were accepted in the juried show of 20 artists from throughout the state.

Bulletin Board would like to carry more in-depth faculty profiles in the future. If you would like to suggest someone, please send a note to 234 Madison Hall.
Wednesday, October 1, 1980
All Day: Exponent published—Available in all buildings
12:25 p.m. BSU Wednesday Lunch—BSU
5:00 p.m. Deadline for news to Bulletin Board for October 15 issue—MDH 234

Thursday, October 2, 1980
8:15 p.m. BSU Meeting, “Monday Night Live”—BSU
12:15 p.m. BSU International Lunch—BSU

Friday, October 3, 1980
12:00 noon Deadline for news to Exponent for October 8 issue—UBB 211
12:30 p.m. BSU International Lunch—BSU
5:00 p.m. Art Show Closing: Sara Armstrong—UAG
5:00 p.m. UAH Soccer vs Vanderbilt University—Away
6:00 p.m. UAH Business Club Meeting—NI
8:15 p.m. Chanson Music Guild “Allard String”—HB

Saturday, October 4, 1980
1:00 p.m. UAH Soccer vs Southwestern at Memphis—Away

Sunday, October 5, 1980
12:20 to 6:00 p.m. Intramural Football—MBSH
2:00 p.m. Society of Women Engineers’ Meeting—Mandos—Jordan Lawn

Monday, October 6, 1980
8:15 p.m. BSU Meeting, “Monday Night Live”—BSU
8:15 p.m. Circle K Meeting—UBB 204

Tuesday, October 7, 1980
6:00 to 8:00 p.m. Tuesday Night Toughies (volleyball)—MBSH
8:15 p.m. BSU Bible Study—BSU

Wednesday, October 8, 1980
All Day: Exponent published—Available in all buildings
All Day: Entry Deadline for Intramural Volleyball—MBSH
12:15 p.m. BSU Wednesday Lunch—BSU
7:30 p.m. UAH Soccer vs Alabama A&M University—Home

Thursday, October 9, 1980
All Day: Early registration for winter term starts—MHS
5:30 p.m. UAH Soccer vs Southwestern at Memphis—Home

Friday, October 10, 1980
All Day: BSU State Convention, October 16–18—Auburn
12:00 noon Deadline for news to Exponent for October 15 issue—UBB 211
5:00 to 7:00 p.m. UAH Academic Association T.G.L.F. Party—NI

Saturday, October 11, 1980
8:30 a.m. LSAT Test—Alabama A&M

Sunday, October 12, 1980
12:30 to 6:00 p.m. Intramural Football—MBSH

2:00 p.m. UAH Soccer vs Belhaven—Home
1:00 p.m. Health Professions Jazz Workshop—HB
8:15 p.m. UAH Arts Series: Heath Brothers Jazz—HB

Monday, October 13, 1980
