Students to vote on SGA Salary Issue

by David Rogers reporter

The UAH student body will be able to voice its opinion on the issue of salaries for Student Government Association legislators today and tomorrow.

A referendum asking students if they believe legislators should be paid for maintaining a minimum number of office hours per week has been placed on the Class Officers runoff elections ballot.

Legislator Tim Cobb has argued against legislative salaries since a house bill allowing them was passed just after the end of the 1990-91 legislative session.

Seven legislators voted for the bill, while only three voted against it (the one other legislator present abstained).

Cobb said he believes the legislature is shifting away from supporting salaries for its members.

“I believe several of them have (had a change in opinion) because of the amount of negative flack that we have received from it,” said the Student Relations Committee chairman.

Most students are still unaware of the price of paying legislators, according to Cobb.

“It’s costing us $9,900 (a year) just for the legislators. This doesn’t include the raises that also went into effect for the president, vice president and treasurer,” Cobb said.

Legislative salaries take up 13.9 percent of the total SGA budget, Cobb said.

First-term legislator Laura Price, a pre-med student, who voted for House Bill 9002, now opposes salaries for legislators.

“I wanted to (be a legislator) because I wanted to really know what is going on with SGA. And, right now, if we don’t get paid, that’s fine. I’m still going to serve my office hours and I’m still going to do my job,” said Price.

Price said the current $50 a month stipend for legislators ($75 for committee chairpersons) might serve to attract more people to SGA, but said those people may not have the right motives.

Another legislator, biology major Rebecca Conway, voted against HB 9002.

The bill, she said, “was brought to our attention, the new legislators, the very first meeting that we had. We knew nothing about (salaries) when we nominated ourselves to run; we knew nothing about getting paid.”

Conway also said there is currently no method of insuring that legislators who claim to complete their office hours at night are actually doing so.

“So it’s more or less an honor system,” Conway said.

Appropriations Committee Chairwoman Cheryl Williams said the salaries are a much-needed ‘carrot’ that will help the body attract students more likely to attend meetings and make strong contributions.

The SGA’s five-member Arbitration Board has released an opinion opposing salaries for legislators, according to Carol Ann Vaughn, an Arbitration Board member.

Cobb, Conway and Price told the Exponent that although they don’t feel legislators should be paid for their duties under the current financial conditions, they thought salaries for legislators is something that might be more appropriate in the future.

The legislative salary referendum on the Class Officer elections runoff ballot will not directly determine whether legislators are paid, but will give the legislature an idea of students’ opinion of the issue.

Students will be able to vote on the runoff ballot from 8:30 a.m. to 8:30 p.m. today and tomorrow in the University Center lobby.

Results are to be announced Friday afternoon.

Huntsville Food Bank

Do you have an extra can of food to make someone’s Thanksgiving Special? Bring non-perishable food to the University Center Lobby from Nov. 1-16. All donations will be given to Huntsville’s Food Bank.

“A Class of Hierarchical Stochastic Models”

“Dr. Donald Dawson, Department of Mathematics and Statistics at Carleton University, Canada will present “A Class of Hierarchical Stochastic Models” on Nov. 9 at 3:30 p.m. in Madison Hall, Room 202.

In recent years there has been a great deal of interest in stochastic models of interacting systems. Most models of this type turn out to be mathematically intractable. In applications there have been two traditional approaches-Monte Carlo simulation on the one hand and the mean field approximation on the other.

The simulation approach runs into difficulty in systems in which there metastable state or nearly critical parameters in that system take a very long time to reach the typical long term behavior. The mean field approximation yields simple analytical results but breaks down near critical points in many interesting cases.

The class of hierarchical models has been introduced to study this question. This can be applied to a wide variety of interactions and involved the study of deterministic nonlinear systems.

We will review the ideas of mean field and hierarchical models and give an example to show that the hierarchical model can preserve the subtle structures in the critical regime.

Our apologies

In case you have not noticed, the Exponent did not come out on the stands last week. It seems Murphy’s Law invaded the production room, meaning that none of the equipment worked at the same time! We are in the process of switching to another system which explains the appearance of the paper this week—if you were wondering. By the beginning of winter quarter we hope to have solved these problems.

Our Gratitude

Our sincere gratitude is extended to Joel Lonergan and his staff at University Relations for all their help during our recent crisis. Thank you!
Emundo Paz Soldan: Soccer player and published author

by Ranjit Pradhan
reporter

An often repeated complaint here on campus is that the demands of UAH place you firmly on a break-neck speed single track — either you’re on the study track or you’re not. You just can’t cruise both lanes at the same time. This widely held supposition has been upturned by Jose Edmundo Paz Soldan, full-time student, UAH soccer player, part-time Library assistant, and, now a writer with one published book under his belt.

Paz Soldan, a senior majoring in Political Science, has written a book of short stories in Spanish entitled, “Las Mascaras de la Nada” (The Masks of Nothingness) which was published about two months ago by Los Ambientes. Del Libro, in Cochabamba, Bolivia.

Paz Soldan, who is from Bolivia, came to UAH in ’88 when he was recruited for the soccer team by Coach Stropecky. He played for the UAH Chargers for two and a half years and has retired from the team only this past week. Although he has always been fond of soccer, writing he says is his true love. He has been writing for at least 14 years, and even wrote short stories that were published weekly by a cultural magazine back in Bolivia. However, he became seriously interested in writing about three years ago. The catalyst for his book was a contest held by the University of Miami for Spanish writers in the U.S. called “Letras de Oro.” He decided to enter this prestigious competition in Oct. ’89 with a compilation of 78 short stories written over a three-year period. In March ’90 he learned that he was one of the seven semi-finalists chosen from 421 entrants. And, as a result of this recognition he got an offer to have his book published in Bolivia. The stories which are in Spanish and have as yet not been translated, deal with a variety of themes ranging from the relationship between the sexes, loneliness of the human condition and various aspects of literature. A fondness for writing, and love and respect for literature were traits that were instilled in him early in childhood, said Soldan. Though neither of his parents are writers, his uncle was one of Bolivia’s foremost authors, and he comes from a family that holds men of letters in high esteem. Although all these factors made him want to become a writer, Soldan says he has no desire to become a professional who has to depend on his word to fill his stomach. With that in mind he has planned to continue graduate studies in Spanish literature at the University of Georgia or possibly Berkley.

Besides writing, Soldan has kept himself busy playing for the UAH Chargers, working at the library, and of course studying. According to Dr. John MacDougall, associate professor in political science, “He is a first-rate soccer player, a first-rate poet, and a first-rate essayist. He is also very knowledgeable of both the North American and South American cultures.” Presently, Soldan is busy trying to complete requirements for graduation. He has also entered a new novel for this year’s competition, which deals with a fictional 22 year old who leaves his country for five years and then returns to find himself; he comes to realize that he can understand himself by understanding his country. Another project Soldan has planned is possibly translating some of his stories now that he is more confident about his English.

When asked what inspires him to write, Soldan, quoting loosely from his favorite author Albert Camus said, “I think that I live in an absurd world and through my writings I am trying to make sense out of it even though I know probably I will never find the real truth of life but I want to keep trying to find it.”
UAH awarded grant from Alabama Humanities Foundation

The Board of Directors of the Alabama Humanities Foundation (AHF) recently awarded major grants to six nonprofit organizations statewide. UAH received $4047 to serve as a legated archive of the state's history and to produce a documentary on Carl Elliott, a member of the U.S. House of Representatives from 1964 to 1984, dealing with the topics of abortion, drugs, the environment, freedom of speech, and growing up at risk. The University of Alabama was awarded $25,000 to produce a documentary on the late 1940's and mid-fifties.

With a grant of $6369, the Alabama Public Library Service will develop "National Issues in Public Libraries," a pilot humanities project that is taking place at six public libraries - Scottsboro Public Library, Macon County-Tuskegee Public Library, Houston-Love Memorial Library in Dothan, Eufaula Carnegie Library, Hoover Public Library, and Monroe County Public Library. Living materials provided by the National Humanities Foundation, the state program of the National Endowment for the Humanities, awards grants on a competitive basis to nonprofit organizations in Alabama. The AHF sponsors programs in history, literature, philosophy, criticism and history of the arts, ethics and other humanities disciplines. More than $4 million have been awarded for humanities projects since the Foundation's beginning in 1974, serving over 100,000 Alabamians each year through public programs, and millions through its media projects and publications. Additionally, the AHF conducts its own projects such as DISCOVERY!, a circulating media service; "Theatre in the Mind," a pre-performance lecture/discussion series with the Alabama Shakespeare Festival, and the humanities speakers bureau.

Charles Schultz Award for college cartoonists

The Charles M. Schultz Award is sponsored by the Scripps Howard Foundation and funded by United Feature Syndicate to honor outstanding college cartoonists and to encourage them to launch postgraduate professional careers. The award was created in 1980 to honor Charles M. Schultz, on the thirtieth anniversary of his classic comic strip, PEANUTS. A cash prize of $2000 and a plaque to the winner and a citation to the college publication. Finalists will receive special recognition for excellence.

Entries for The Schulz Award will be screened by a three-person committee consisting of the comics editor, art director and editorial director of United Feature Syndicate. The screening committee will forward the 10 semi-finalists to the judging committee, who will select the winner and up to three finalists. Judges for the 1990 Charles M. Schulz Award will be Charles M. Schulz; Roy Paul Nelson, professor of journalism, University of Oregon, and Marty Claus, managing editor, Detroit Free Press.

Address Entries To: The Charles M. Schulz Award, c/o United Media, 200 Anniversary of his classic comic strip, PEANUTS.

National Research Council Announces 1991 Programs

The National Research Council announces the 1991 Resident, Cooperative, and Postdoctoral Associateship Programs for research in the sciences and engineering to be conducted on behalf of 30 federal agencies and research institutions whose 115 participating research laboratories are located throughout the United States. The programs provide opportunities for Ph.D. scientists and engineers of unusual promise and ability to perform research on problems largely of their own choosing yet compatible with the research interests of the sponsoring laboratory.

Announces 1991 Programs

The National Research Council announces the 1991 Resident, Cooperative, and Postdoctoral Associateship Programs for research in the sciences and engineering to be conducted on behalf of 30 federal agencies and research institutions whose 115 participating research laboratories are located throughout the United States. The programs provide opportunities for Ph.D. scientists and engineers of unusual promise and ability to perform research on problems largely of their own choosing yet compatible with the research interests of the sponsoring laboratory.

Approximately 450 new full-time Associateships will be awarded on a competitive basis in 1991 for research in: chemistry; earth and atmospheric sciences; biological, health, and behavioral sciences and biotechnology; mathematics; space and planetary sciences; and physics. Most of the programs are open to both U.S. and foreign scientists.

Many Festivities Planned for Homecoming Week

by Ranjit Pradhan
reporter

It's November once again; time for cooler weather, vividly colored leaves, toned down fashions, midtern blues and, of course, Homecoming! This year's celebration promises to be the most fun filled ever with a host of activities sure toiven your spirits. The Homecoming '90 committee, consisting of Barbara Cook, Dr. Jo Ann Moorman, Ginny Frazier, Linda Davis and Bruce Akins, has planned a week-long celebration of events stretching from Nov 12-17.

This year's celebration honors the Classes of '75 and '85. The Alumni Association wants to take this opportunity to welcome alumni back for a weekend of fun, entertainment and a chance to renew old acquaintances.

The festivities also consist of the traditional tailgate party, pep rally and street parade, hockey games and crowning of the Homecoming King and Queen.

In a major departure from previous years, the Homecoming Dance has been dropped, reportedly due to a lack of student interest in it. "Last year we only had about 30 people," said Toni Morgan, Director of Student Activities. "Most of the students seem to prefer the various Greek parties that are held on the same evening" she added.

There seems to be something for almost everyone, so read on and see what you would like to attend!!

Monday, Nov 12: An Art Gallery Exhibition featuring special works of UAH faculty will be presented at the Church Gallery (beside UC). A Photography Exhibition featuring "Interior Landscapes" by Bart Kasten will also be held in the UC Gallery. Call the Art Dept. for details.

Tuesday, Nov 13: A reception honoring Dr. W. Edwards Deming, recipient of the National Medal of Technology will be held at the Stouffer Hotel in Nashville, TN.

Wednesday Nov 14: Election for the Homecoming King and Queen will be held during halftime of the hockey game on the 16th. Voting will be held only in the UC from 10 am-6 pm on Wednesday.

Thursday Nov 15: The well known Verdi String Quartet Recital will be held at Roberts Auditorium. Admission $12, students $6. The same evening, Mom's will host Donna Coyne, winner of Entertainment Tonight's "funniest actress competition." She is sure to regale visitors with her rip

Friday Nov 16: Positively an action packed day! 8:30 am - A Welcome Center at the Alumni House to greet all visitors to UAH. 4:30 pm - Pre-Game festivities begin with a pep rally floating judging and tailgate party. Spragins Hall followed by a street parade to VBCC. 7 pm - Chargers vs Univ of Alaska-Fairbanks. 8 pm - "Homecoming '90" party at Noonin. Feature film "In the Heat of the Night" with live music, food and some good partying. Admission $5.

Saturday Nov 17: 9 am - High School Visitation Day lasting the whole day, 10 am - 2 pm - College of Administrative Science has an Open House. Come and check out this glittering new building and its facilities. Noon - Kickoff at the Brunn Center at the Bevill, cost $10. Meet all your old classmates and our new students. 10:30 pm - The College of Nursing has an Open House for returning alumni. 7 pm - return game, Chargers vs Alaska - Fairbanks.

So mark your calendars and join us in making this year's Homecoming celebration a truly memorable one!

Alumni Association Plans

Homecoming Activities

The UAH Alumni Association is giving you another chance to win money and other great stuff!!!

On Friday, November 16 at 12:15 PM at University Center, The Homecoming Parade will begin. Prizes will be awarded to the group with the most creative float and decorated cars! Best float will win $100, and best vehicle; $25.

At 4:30 PM at Spragins Hall there will be a PEP Rally!!! Two $25 prizes will be given to those with the most UAH spirit. G000 CHARGERS!!!

At 5:00 FREE FOOD and TAILGATE PARTY. $25 will be awarded to the group with the best tailgate decorations. Use your tablecloths, picnic baskets, or whatever you have!!

Then, at 5:45 HOMECOMING CARAVAN: Decorated vehicles, cheerleaders, homecoming court and dedicated fans will commence from the Spragins Hall parking lot, followed by the International VBCC Breeze. Banners designed by the Students should note that fellowship nominations from the campus Phi Kappa Phi chapters must be received at the National organization no later than March 1, 1991.

Chi Omega, Phi Sigma Sigma, Delta Chi and Phi Omega held a "Circus From Hell" complete with ring leaders, a runway lion, live shooting targets, dead acrobats, a mummified body with exposed organs. Finally, Circle K had witches tainting the passers by with eels and snakes, torture of the face, and a haunted dinner party with bubbling potions, eyeball stew, and dead dogs out- en. It was all wonderful.

After the participants toured the House, they were taken to their favorite room where the winner would receive a prize of $100.

TREC Awarded Grant by Governor Hunt

TREC, Inc., an incubator company at UAH, was awarded a $50,000 grant from the Alabama Innovation Fund by Gov. Guy Hunt Wednesday on Montgomery.

The award from the Alabama Department of Economic and Community Affairs is given annually to companies with innovative technologies. The grant assists in getting the technology through the development stage and to the market place. Incubator companies are businesses that are startup companies needing facilities and expertise to assist them in getting their product beyond the development stage. The university provides these necessities, usually for a year to two years, while the product is developed. TREC is located in Research Institute.

Spookiest and Rocorriest a Major Success

The first ever Spookfest was held closed to the campus of UAH last Friday, October 26. It began around 7:30 p.m. with the Haunted House. Several organizations here at UAH decorated and operated rooms for the Haunted House. Delta Chi and Chi Omega held a "Mad Brain Surgeon complete with a new brain surgeon, toast, and peanuts were served.

Following these rooms, A.C.E. sponsored a Haunted Fishing Hole where the participants fished for five large prizes. A witch read people's fortunes with tarot cards. The Resident's Housing Association had a mad brain surgeon complete with a patient wrapped in a straight jacket, followed by a mutilated body with exposed organs. Finally, Circle K had witches tainting the passers by with eels and snakes, torture of the face, and a haunted dinner party with bubbling potions, eyeball stew, and dead dogs out- en. It was all wonderful.

Special thanks to all the A.C.E. personnel, clubs that decorated rooms, and all of the people who came out to make the Spookfest such a Howling success all the way around.

TREC specializes in advanced image processing and two-dimensional data analysis. The technology is mathematically based and can be applied to the entire field of image sensors and image processing hardware. TREC is owned by Carol Edwards.

In a major departure from previous years, the Homecoming Dance has been dropped, reportedly due to a lack of student interest in it. "Last year we only had about 30 people," said Toni Morgan, Director of Student Activities. "Most of the students seem to prefer the various Greek parties that are held on the same evening" she added.

There seems to be something for almost everyone, so read on and see what you would like to attend!!

Monday, Nov 12: An Art Gallery Exhibition featuring special works of UAH faculty will be presented at the Church Gallery (beside UC). A Photography Exhibition featuring "Interior Landscapes" by Bart Kasten will also be held in the UC Gallery. Call the Art Dept. for details.

Tuesday, Nov 13: A reception honoring Dr. W. Edwards Deming, recipient of the National Medal of Technology will be held at the Stouffer Hotel in Nashville, TN.

Wednesday Nov 14: Election for the Homecoming King and Queen will be held during halftime of the hockey game on the 16th. Voting will be held only in the UC from 10 am-6 pm on Wednesday.

Thursday Nov 15: The well known Verdi String Quartet Recital will be held at Roberts Auditorium. Admission $12, students $6. The same evening, Mom's will host Donna Coyne, winner of Entertainment Tonight's "funniest actress competition." She is sure to regale visitors with her rip

It Never Seems to Fail...

by Cynthia R. Green

This has not been a very successful fall term for The Exponent; everything that can go wrong has gone wrong. I don't know what's worse—our inability to produce a concise and punctual paper or the fact that most of the bureaucracy doesn't seem to actually care.

In case you haven't noticed, this paper was not on the stands last week. This paper, if you are reading it, is a compilation of these past two weeks. In this process, some information that needed to printed last week so you would know about it has been cut from this issue. This was done in an attempt to show those of you who care that we are trying to produce a paper that can be trusted to inform and clarify.

Why these problems, you ask? Well, it seems that

School now taking classes that will allow me to find work as a technical writer. Over the years, editors of both the competent and incompetent variety have had to struggle to insure a paper is published each week. These editors have constantly faced many obstacles that have threatened that basic mission. The lack of a journalism major at UAH has meant we might meet deadlines and have a passable paper. If we had good, dependable equipment we probably wouldn't have a paper at all; we would all be in shock due to the enormity of our astonishment. Some things are just too great (large) to comprehend. We at The Exponent have chosen to work for the Exponent have been, in a way, punished for making an effort since they have been left on their own to do the job with continually failing equipment and an obvious lack of support from the board which claims to govern the publication.

For the Exponent to succeed, it must have greater support. More students need to make their talents available to the Exponent, guiding the newspaper's form and content.

It's your newspaper, UAH.

And it's your choice.

Used Hay

Used Hay

by Cynthia R. Green

This paper is not deemed necessarily important; it is supposed to provide learning experiences for those who might wish to work on a real paper some time in the future. And this is a learning experience for me. But, instead of learning how to produce, we are struggling to learn how to survive.

Our equipment has been broken down for over a week. The repairman is in New Jersey for two weeks so we will send someone out sometime. So, we are using a borrowed Mac and most of us are computer illiterate (I know it's a sin) so we are treading water.

This newspaper business is maddening. Of course this is just another complaint, but it seems to me that the University wants a campus newspaper to be published on a timely and somewhat regular basis, the powers that be wish to invest in dependable equipment.

We are not asleep at the wheel as some of you might feel. In fact, we resemble a bed of ants that has been kicked by a child. But, whereas the ants accomplish things immediately without taking time to wonder why, we must try to reason with others who may not feel this paper is cause enough to get stirred up.

The point is, in order to publish a paper, you must have equipment. It helps a great deal if the equipment is operational. But, if our equipment here worked correctly even on occasion we might meet deadlines and have a passable paper. If we had good, dependable equipment we probably wouldn't have a paper at all; we would all be in shock due to the enormity of our astonishment. Some things are just too great (large) to comprehend. We at The Exponent do not know how to work with anything that is not less than adequate (adequate would even be nice).

Well, enough griping on my part. Just please give us the benefit of the doubt. We really try to create and publish a paper each Wednesday. Creation is just so very difficult in view of the problems we mere mortals must face and conquer while our hands are tied behind our backs and our grade points falling.

My last point: If the University want a REAL paper, get the paper some REAL equipment!

Choices: Ship Without a Harbor

by David Rogers

The central theme of this column is, as its headline suggests, choices. Choices, both of the direct and indirect nature, have affected the shape of the UAH student newspaper. Most of the time, that shape has been one of neglect.

This is not a new concept. In fact it became involved with the Exponent as a writer in late 1983. Since that time, I worked as the paper's managing editor, graduated from UAH with a bachelor's in communications, and worked for a small daily newspaper. I'm back in school now taking classes that will allow me to find work as a technical writer.

And that's a shame. The student body of this university deserves so much more out of its newspaper. Students have the right to expect the Student Publications Board to investigate the paper's shortcomings so that high-quality, rather than stagnant mediocrity, will one day be the paper's identifying characteristic.

Through the years, the paper has been held together by the hard work, creativity and dedication of a select few. The students who presentations from 10:00 a.m. - 11:00 or geology are also encouraged to a.m. and from 1:00 p.m. - 2:00 p.m. attend.

The agency is particularly interested in all students majoring in computer science, mathematics, physics, civil engineering, electrical engineering, mechanical engineering, or Russian. Students with backgrounds in the earth sciences, physical geography,
Sir Crispin
continued from page 1
the units are sent to professionals trained to dispose of them properly. Sir Crispin also called for the use of new and efficient "miracle lightbulbs" that emit 80% light and 20% heat (traditional lightbulbs emit 20% light and 80% heat) as well as double-glazed windows for insulation. "If you live someplace cold, a very instructive thing to do is to take an infrared picture of your house at night. You'll see exactly where the heat is escaping. And there are hundreds more ways to save energy," he said.

Turning to the issue of recycling, Sir Crispin illustrated ways to change the behavior of people who do not comply. "In Huntsville, for example, you could institute some form of local taxation for people who don't sort their trash or who create too much trash," he said. "Fiscal incentives or disincentives really work.

"As trash becomes more and more of a problem, communities are going to have to spend more and more money dealing with it. I forsee a two-pronged approach: 1) Making citizens feel responsible for that trash and for sorting it. It's very important for ordinary people to feel like they are participating in a worthwhile cause. And 2) Having local authorities hire the necessary people to use the correct technological methods to dispose of the trash. The technology exists, but people still think it's cheaper to throw their trash over the wall, so to speak, it's not."

Corporations have also jumped on the environmental bandwagon and for good reason, said Sir Crispin. "Corporations are extremely conscious of environmental dangers and they realize that if they don't research or take account of 'green consumerism,' they are going to suffer commercially," he said.

"I think multi-national corporations have long been looked down on the environmental root of all evil. In fact, they have done a lot of the most important research in putting things right, even if they were instrum-ental in putting things wrong in the first place.

Much of Sir Crispin's lecture revolved around the way that science, public opinion, and politics have converged, from which has sprung a new environmental diplomacy. "The ozone story is illustrative of a danger that, although no one could actually see it or quantify it, got onto the world's agenda.

"If you think about it, it's rather strange. Here were the nations of the world who thought they had a miracle working molecule (CFC) that had marvelous properties, could do no damage, and was a commercial winner. Along came a bunch of scientists who said CFCs are destroying the ozone, the protective shield that makes life on earth possible and may also be damaging the food chain on the surface of the ocean. And what did people do? They believed the scientists!

"People did not even know what the ozone layer was in 1970. Thus, in a very short time in human history, we discovered a problem, made people aware, and instituted an international agreement with very tough regulations regarding the production of CFC molecules."

Sir Crispin also made a plea for people to maintain pressure on governments in order to prevent the production of chemicals destructive to the environment. "Public noise and monitoring are necessary," he stated, "because if the government does what it says it's going to do, the problem with ozone will be solved."

Aside from dealing with the ozone layer, Sir Crispin said, the government must look at and rank all environmental problems. "Unfortunately, there's a tendency to put at the top of the priority list small cuddly animals that have tremendous appeal, such as koala bears. It's the role of the government to figure out what the right priorities are.

Sir Crispin noted that American government typically shys away from taxation and loans toward regulation in order to solve environmental problems. "For ten years, the U.S. Congress has wrestled with the Clean Air Act, a mind-boggling complex piece of regulation. In Europe, they simple slap on or remove taxes from things. For example, Great Britain wanted people to use lead-free gasoline, so the government made leaded gasoline much more expensive. It's a strategy that works."

Verdi Quartet Cologne to Perform November 15

The Verdi Quartet Cologne will perform at UAH on November 15 in the second concert of the Huntsville Chamber Music Guild's 1990-91 season. This young group, formed in 1983, is one of the best of the new generation of German quartets performing today and will be appearing as part of their first U.S. tour.

The concert will begin at 8:15 p.m. in the Frances C. Roberts Recital Hall on the campus of UAH. Dr. David Graves of the UAH Department of Music will introduce the concert and lecture in the recital hall beginning at 7:45 p.m. A reception will be held backstage immediately following the performance, and the audience is invited to enjoy light refreshments with the artists.

In Germany and abroad the Verdi Quartet Cologne has received high marks from both musicians and critics for their performances. The Verdi Quartet Cologne received first prize at the Twentieth International Chamber Music Festival at Castello, Italy and received a prestigious career grant from the Karl Klinger Foundation. Dr. Guenter Kehr of the Amadeus Quartet said of their musicianship, "The Verdi Quartet is a superb ensemble of the highest quality."

Three beautiful pieces comprise the concert's unique program: the performance will begin with Franz Joseph Haydn's "Quartet in D Major," Op. 76, No. 2. Haydn is often called the father of the string quartet, and this delightful piece is an example of his very best work. Next will be Wolfgang Amadeus Mozart's beloved "Eine Kleine Nachtmusik" in G Major, one of the most popular works of this Classical master. This charming serenade, often performed by large string ensembles, is even more intimate when played by the four musicians of a string quartet. The program will close with Giuseppe Verdi's "Quartet in E Minor," the only string quartet composed by this operatic great. After the popular acceptance of their many successful performances of this work, the Verdi Quartet Cologne took Verdi as its namesake and patron.

Applications for Miss Alabama USA 1990 now available

The search is on to find Miss Alabama USA 1991, the most attractive and all-around young woman to represent Alabama in the 40th Annual Miss USA Pageant to be tele­cast live on national television on CBS-TV from Wichita.

In addition to the opportunity to win more than $200,000 in prizes and awards on the national level Miss Alabama USA 1991 will receive a prize package valued near $25,000.

To qualify applicants must be single and never married, at least 18 years of age on or under 25 years of age as of Feb. 1, 1991 and must live, work or attend school anywhere in Alabama. Applicants must be a U.S. citizen and cannot be or have been a parent.

Judging will be based on beauty of face and figure, poise, personality, grooming intelligence, speaking ability, and commercial appeal.

THERE IS NO TALENT COMPETITION.

All contestants will be selected on the basis of qualifications set by the Pageant Selection Committee. Those chosen will advance to the state finals to be held Dec. 1-2, at the Wynfrey Hotel at Riverchase Plaza in Birmingham.

The Alternative...

When students simply can't afford to buy textbooks, the need, independent study, is the alternative.

Delta Zeta

Delta Zeta's celebrated Halloween with a Masquerade Party given by the pledges on Oct. 27 at the Bevill Center. Prizes were awarded for the best costumes. It was a great success. Congratulations to all the Delta Zeta's who were elected Class of 1991 officers. They are: Pattie Unstead-freshman class vice-president, Val Hose-sophomore class president, Christie Dale-junior class president, Lisa Shannon-junior class secretary and Rhonda Allen who will be in a run-off election for sophomore vice-president.

Our Pledge Formal was held Saturday night at Mainstreet Smith. The pledges were presented to the chapter during leadout. All DZ's and their dates had a great time. A candlelighting was held Thursday night to reveal that Leigh Kenneth is lavaliered to Brian Tharp of Pi Kappa Alpha. Congratulations. We are looking forward to a mixer with the Sigma Nu this weekend.

Kappa Delta

The ladies of Kappa Delta would like to thank our alumnae for the wonderful Founders Day celebration that was held at the Office's Club. We really enjoyed it. The Kappa Delta pledges would also like to thank the pledges from Delta Chi for their help with the car wash this past Saturday. It was a huge success and everyone had a great time. Kappa Delta elected its officers last weekend, and we will like to congratulate our new council members: President - Kimbrel Quiles, Vice-President Membership-Margie Leimberger, Vice-President Editor Kristen DeFrez, and Vice-President Standards-Ginger Smith. Secretary-Angie Bryan, Treasurer-Sarah Bush, Assistant Treasurer-Amber Smith and Panheliotic Representative-Betsy Lovorn. We wish you good luck during the upcoming year.

We would also like to extend our congratulations to Molly Seteriquist who was recently selected for Who's Who Among American College students. We are anxiously awaiting our upcoming "K Fall Plung" party which will take place this weekend and we hope everyone has a great time. Meanwhile, we would like to remind everyone that magazine sales will continue throughout November. So, if anyone is interested, please see a Kappa Delta. Your support will be greatly appreciated.

Society of Women Engineers

The Society of Women Engineers is sending representatives to the 1990 Regional Conference in Clemson this past weekend. We met the Clemson representatives at the SWENCA National Convention in New York City this summer. They looked like a really active group and we should pick up some new ideas from them. We wish the best of luck to Vijay Chevan, Felicia Havens, Renee Laney, Delene Lanier, Marchelle Ledford, Vanessa McElveen and Ann Pierce.

Patty Smith spoke at our meeting last week. She is the director of the Displaced Homemaker/Gender Equity Programs at Calhoun. If you are a displaced homemaker or need to return to school for financial reasons, she is an excellent contact for scholarships, grants, and loans for any major, not just engineering. Ms. Smith will be entering UA this winter as a EE junior, so she KNOWS firsthand the needs that non-traditional students have. We still need volunteers to work High School Visit Day, Nov. 17. Call Marcia Sullivan at 724-3370 for detail.

SWE Scholarship applications are in and can be picked up at the SWE display in the first floor lounge of the EB. Paid SWE members will have applications mailed to them.

ATO

The brothers of Alphe Tau Omega would like to especially thank the Chi Omegas for the great mixer on Friday night. The scavenger hunt was lot of fun, and we hope our next mixer will again be a success. Thanks ladies.

We would also like to thank the Pikes for a great football game Sunday. This is obviously the biggest game of the year for both of us, and we're glad the game was so competitive. Don't worry, there's still basketball, volleyball, and softball.

Damn. This term's almost over. Did anyone remember David Tucker to go to class (for the whole quarter)? Honeymay don't play that game, huh Dave? Well anyway, it's still hard to believe there's only three weeks left to go. We hope everyone's doing well, and study hard because the end is near (literally, for some of us).

Pi Kappa Alpha

We didn't have a column last week, but really the only news we have concerns our intramural teams. Last Sunday, the flag football team defeated Cas Run and Shoot 16-6, and our floor hockey team had an exciting come from behind victory over Sigma Nu. This past Sunday we defeated ATO 14 to 13 in flag football to clinch a spot in the playoffs. You guys played a good game. Our floor hockey had a chance to make the playoffs; but Delta Chi defeated us and our chance!

Breakfast with the Vice-President and Bill Cabaniss was a lot of fun, and the rally for future Senator Cabaniss was great also. We hope everyone made it to the polls to vote.

Last, but not least, if you go to "The Lounge" be wary of the waitresses.

Sigma Nu

It's been another fun-filled week around the house, as midterms have left us all virtually brain-dead. The Midterm Mindbender party last weekend was a blast. The cats are probably still wondering what was going on.

We would like to thank Donna Thompson for the free passes to the comedy club. Thank you of us who went continued to page 9.
Free Seminar on Nutrition of Infants and Children

"Babies and toddlers don't all develop at the same rate," Patrice Knight, M.D., observes. "And nutritional requirements change as infants become ready for baby foods and then for table foods. It's important to know what your child needs at different stages of growth and how to choose among what's available in the supermarkets and in your own kitchen."

On Tuesday evening, November 20, at 7:30 p.m., in the UAH Clinical Science Center Lecture Hall, Dr. Knight will give a free public seminar on "Nutrition for Infants and Young Children". Dr. Knight, who is board certified in both pediatrics and perinatal/neonatal medicine, is an associate professor of pediatrics at the UAH School of Primary Medical Care and the mother of two small children. She is also medical director of the school's Perinatal Follow-Thru Program, which monitors the developmental progress and needs of infants born at risk in the thirteen North Alabama counties.

Topics to be covered in the seminar include

- normal growth patterns for infants and young children
- breast feeding and formula feeding
- nutritional and cost comparisons
- preparation of formulas and baby foods
- when to introduce baby foods; ingredients of commercial baby foods
- indications for vitamin supplements for infants and toddlers
- when to introduce table foods
- appropriate feeding schedules at different stages of development
- food allergies

"In the seminar, we'll talk about what you do and don't need to worry about in your child's diet," according to Dr. Knight. "For example, children don't really need much milk after they're a year old, and fat restriction is unnecessary and may be harmful. On the other hand, it is important to offer a variety of foods and to structure eating schedules for toddlers and young children."

Dr. Knight's seminar on "Nutrition for Infants and Young Children" is part of the PRESCRIPTION FOR HEALTH free public lecture series presented monthly by the UAH School of Primary Medical Care. The seminars are held in the UAH Clinical Science Center Lecture Hall, at Governors Drive and Gallatin Street across from Huntsville Hospital. The parking lot is entered from Gallatin Street. Please phone the UAH School of Primary Medical Care Communications Office, 551-4424, for further information.

Pool Tournament Held in UC

The third annual UAH Pool Tournament was held recently at the University Center. Twenty-two students competed in the men's division and four competed in the women's division.

First place in the men's division went to Tim Varano; second place to Bernardo Batong; and third place went to Bradley Harbin.

First place in the women's division was Doris Day; second, Kelli Troupe; and third, Ann Miller.

First and second place winners in each Division will compete in the Association of College Unions-International Games Tournament at Troy State in February.

Last year, Tim, Bernardo and Doris represented UAH at the regional tournament at Georgia Tech. Doris placed second in the region in competition against the ACU-I National Champion.

Contact Your Local Chapter.
November 18th is Big Brothers/Big Sisters Love Bowl. Any CKI member interested in getting into teams of 4, please talk to Karl. We have only 3 teams so we need more bowlers. Let’s get some pledges and support BB/HS.

Also on Nov. 17 is the Skate with the Chargers night. This is your chance to actually be on the ice with the guys and help them raise some money at the same time. Tickets can be purchased from CKI members or any Greek. Come with friend or bring the whole family.

It’s not too late to join. Just come by our weekly meeting on Tuesday night at 8:15 p.m. in UC 126B. If you have any questions, call our preset at 837-8431 (Dai’s). Have a great weekend.

Resident’s Life

We would like to thank all the people that came out last Wednesday to help make our Halloween bonfire and movie a success. We’re sorry some of you didn’t get any pizza, but we still hope you had a great time.

We would also like to thank SEDS and everyone else that helped make Dimensions a success. We all had a really good time working on the haunted house, and it actually turned out to be really nice.

The officers for Resident’s Life are as follows: President-Karl Wacenske, Vice President-Conrad Vaughan, Secretary-Conrado Fitzpatrick, Treasurer-Tara Gray, NCC-Donald Gathier, Publicity-Keith Beals, Activity Chairman-Karen Murphy. We are looking forward to our next big even which is the Housing and International Students Thanksgiving Dinner.

World Issues Society

The November 1st meeting of the World Issues Society’s informal discussion group was an invigorating success. This session’s topic of our way of involuntary commitment, its legal, ethical, social, psychological, and moral significance, and religious implications. Six people attended for a lively discussion. An interesting view point on this issue was presented by a working nurse with real life experience with such patients.

The object of our informal group discussions is not one of formal study or documented information (though such would be welcomed.) In our university classes, we are given formal, structured information with little time or opportunity to explore wide personal ramifications on our area of study. In these informal discussion sessions, our goals are to stimulate and expand ideas on various topics and explore possible courses of action which we may choose to take and address issues as they arise.

The result of the discussion on involuntary commitment was the discovery of the need for information on this area which we hope to share through the Exponent.

Chi Omega

The sisters of Chi Omega would like to congratulate our sisters who received Order of Omega. They are Dena Childress, Rebecca Dalzell, Tolli Grisham, Tammy Scott, Amy Smith, Tammy Weck and Liz Wool. We would also like to congratulate Kaycee Martin on being elected Freshman Class President.

NAVY NURSE CORPS.
WE WANT TO START YOU ON YOUR WAY.

A good foundation is important for a successful career.

That’s where the Navy Nurse Corps can help. The Navy provides financial assistance to meet tuition costs of bachelor and advanced nursing degrees. As you set you on your way to a successful career in the Navy and tomorrow’s high-tech world.

Navy nurses experience the finest professional and financial rewards including comparable pay, 50 days paid vacation earned each year, and worldwide travel.

If your choice is to move up and out in the world, we invite you to consider the Navy Nurse Corps.

Check with the school of Nursing for dates a Navy Representative will be on campus or call 1-800-284-6289.
**HOMECOMING CANDIDATES**

Amy T. Dickson is a senior majoring in marketing and management. She is currently involved in the American Marketing Association, Order of Omega and is a Chi Omega Advisor and has received the following honors: UAH Most Outstanding Student Leader, UAH Most Outstanding Marketing Student, Evelyn Leslie Henry Academic and Leadership Scholarship and Pi Kappa Alpha’s Miss Greek. When asked why she wants to be elected Homecoming Queen, Amy replied, "Being Homecoming Queen would be a tremendous honor. I value the friendships I have made at UAH over the past four years, and I feel due to my involvement within the University, I could represent UAH with a positive image."

Doug McDonald is a junior majoring in electrical engineering. He is currently involved in Varsity Ice Hockey, the Lancers and the American Marketing Association and has received the following honors: Who’s Who Among Students, Varsity Hockey Team’s Most sportsman-like Player 1989 and Varsity Hockey Team’s Most Improved Player 1990. When asked why he wants to be elected Homecoming King, Doug replied, "This is a very difficult question to answer as I feel that being nominated for Homecoming King is a great honor in itself. I would like to thank Chi Omega for their nomination."

Denis Skapski is a senior majoring in biological sciences. He is currently involved in the Lancers and the Medical Careers Club and has received the following honors: Alpha Lambda Delta-Freshman Honors Society, Who’s Who and Hockey Scholar Athlete. When asked why he wanted to be elected Homecoming King, Denis replied, "Why not?"

Matt Iley is a junior majoring in finance. He is currently involved in Alpha Tau Omega Fraternity, Student Government and Lancers and has received the following honors: Academic Achievement Award from the Interfraternity Council, Academic Achievement Award from Alpha Tau Omega Fraternity and Who’s Who Among American College Students. When asked why he should be elected Homecoming King, Matt replied, "I want to be elected Homecoming King so that I could represent the student body of UAH to the alumni and community of Huntsville. I feel the alumni have lost touch with the students and I want to work to bring the two groups closer together."

Sonia Cutts is a junior majoring in electrical engineering. She is currently involved in Alpha Kappa Delta Sorority, Lancers, Eta Kappa Nu and has received the following honors: Who’s Who Among American Colleges and Universities, Eta Kappa Nu, 3M Minority Engineering Student Scholarship and Order of Omega. When asked why she wanted to be elected Homecoming Queen, Sonia replied, "I want to be elected Homecoming Queen for two primary reasons. Firstly, UAH’s Homecoming Queen should serve as a role model and should be a good representative of the University. My academic excellence and school involvement qualifies me for the title. I am the recipient of several academic scholarships, and a member of two honor societies namely - Eta Kappa Nu and Order of Omega. In addition, I am involved in several extra curricular activities and community services which show that I am concerned not only about the University, but the community in which I live.

Secondly, getting involved is what is all about. One of the duties of Homecoming Queen is to do just that. If I can be a part of that force that sparks UAH’s students, then UAH as a whole would have benefited."

American Colleges and Universities, Eta Kappa Nu, 3M Minority Engineering Student Scholarship and Order of Omega. When asked why she wanted to be elected Homecoming Queen, Dai replied, "I want to be elected Homecoming Queen and to the community. I would like the honor of being elected queen in order to contribute more to UAH."

Julie Preston is a junior majoring in history. She is currently involved in Lancers, the SGA legislature, Delta Zeta Sorority and has received the following honors: UAH Leadership scholarship, Who’s Who Among Students in American Universities and Colleges, UAH Scholar list and UAH Representative Alabama Student Volunteer Corps. When asked why she wants to be elected Homecoming Queen, Julie replied, "The years I have spent at UAH have been both exciting and rewarding. I am so thankful for having had the opportunity to earn an education and meet so many interesting and kind people. This university and its people mean so much to me. It would be both a privilege and an honor to represent them as UAH’s Homecoming Queen."

Raymond Hamilton Jr. is a senior majoring in accounting. He is involved in A.C.E. and the Accounting Club and has received the following honors: Who’s Who Among American College and Universities, Achievement recognition for A.C.E. Directorship and Recognition from Governor Hunt for helping with the PTA Health and Fitness Program. When asked why he wants to be Homecoming King, Raymond replied, "I am thankful that seasonal homecoming spirit is alive within UAH everyday of the year. Where else are non-traditional students, like myself, encouraged to become actively involved in campus activities. Encouraged participation helps breed ownership of responsibilities, which in turn helps create a year long ‘Homecoming spirit at UAH’.”

Julie Preston is a junior majoring in elementary education. She is currently involved in Chi Omega Sorority, Student Alabama Education Association and, SGA Commencement Committee and has received the following honors: Who’s Who Among American College Students, Outstanding Young Women of American Universities, Order of Omega and Chi Omega Order of the Owl Scholaristic Award. When asked why she wants to be elected Homecoming Queen, Rebecca replied, "Representing UAH as Homecoming Queen would be a tremendous honor. The title is based on leadership and involvement and my extensive involvement on the UAH campus has given me the knowledge and experience required to represent UAH in a positive way."

Dai T. Chu is a senior majoring in math. She is currently involved in Circle K International, was a peer counselor this past summer and has received the following honors: Who’s Who Among American Colleges and Universities and the CKI David C. Womack Club Administration Award. When asked why she wants to be elected Homecoming Queen, Rai replied, "I have learned that you have to work hard to be heard on campus. Being a part of Circle K International, a campus service organization, has shown me the benefits of getting involved and contributing to UAH and to the community. I would like the honor of being elected queen in order to contribute more to UAH."

Sonia Cutts is a junior majoring in electrical engineering. She is currently involved in Alpha Kappa Alpha Sorority, Lancers, Eta Kappa Nu and has received the following honors: Who’s Who Among American College Students. When asked why he wants to be elected Homecoming King, Matt replied, "I want to be elected Homecoming King so that I could represent the student body of UAH to the alumni and community of Huntsville. I feel the alumni have lost touch with the students and I want to work to bring the two groups closer together."

Legislature:
debate on ethics of being paid

For months the legislature has been debating the ethics of being paid. In an effort to resolve this dispute, your opinion on this matter is requested.

I. Duties of Legislators -
1) To coordinate all SGA student services.
2) To attend all SGA Legislative sessions and committee meetings.
3) To charter and recharter all organizations on campus.
4) To allocate all SGA funds.
5) To create and dissolve committees as necessary.
6) Each Legislator must be actively involved in at least one committee.
7) Each Legislator is required to serve at least 3 office hours a week. Committee Chairpersons are required to serve at least 4.5 office hours each week.

II. Legislative pay -
1) Each Legislator receives $50 per month for the work done during their office hours.
2) Each Committee Chairperson receives $75 per month for the work done during their office hours.
3) There are 15 Legislative positions including the Chairpersons. This equals a total pay of $825 per month or $9900 per year.
4) The current budget of the SGA is $70,940.

III. Pros -
1) Pay would be a good incentive for Legislators to do quality work since their position would become a job instead of volunteer service.
2) Pay would help make the positions more attractive to quality students.
3) Pay would allow for more justifiable removal of Legislators who do not fulfill their obligations.

IV. Cons -
1) Pay would attract students who want the money and are not interested in serving the student body.
2) Legislators have served on a volunteer basis in previous years and quality services are provided.
3) The pay for the Legislators is 13.9% of the total budget and leads to a reduction in student services.
4) SGA Legislator was not a paid position when the current Legislators were elected, therefore, they were willing to volunteer their time at the beginning of their term.

You're smart enough to calculate the size of a Hydrogen atom.

Don't forget to vote for UAH's Homecoming Queen and King on November 14 and November 15 from 8:30 a.m. until 8:30 p.m. in the University Center.

You must present your student picture I.D in order to cast your ballot.

"Jacob's Ladder" a surprise movie with a 'brain'

by Eric Schlegel
reporter

I didn't know what to expect from "Jacob's Ladder." The trailers offered little help; they hinted at possibly a horror movie. All they really said was this was an interesting and different film. The star of the movie, Tim Robbins, offers no help either. The film. The star of the movie, Tim Robbins, offers no help either. The film succeeds best when it is dealing with a horrific atmosphere in a small town. The result of his brief visit is the realization by all that one must live actively think before and after it. This is the philosopher's "Nightmare on Elm Street." (Some ideas to think about, the title and Albet Camus' The Stranger)

"Jacob's Ladder" proves very predictable before the end. However, I don't believe this is unintentional. The twist is not meant to be totally unexpected. Whether this is a mistake or not is up to you. It is as if a gang of friends, ready to cut it up, "Jacob's Ladder" has a brain behind its madness. A weird one, but it makes you think. You cannot passively watch it. You must actively think before and after it. This is the twist. Whether it is a mistake or not is up to you. It is as if a gang of friends, ready to cut it up.

"Jacob's Ladder" has a brain behind its madness. A weird one, but it makes you think. You cannot passively watch it. You must actively think before and after it. This is the twist. Whether it is a mistake or not is up to you. It is as if a gang of friends, ready to cut it up.

The "surprise" ending was fairly predictable before the end. However, I don't believe this is unintentional. The twist is not meant to be totally unexpected. Whether this is a mistake or not is up to you. It is as if a gang of friends, ready to cut it up.

**Undergraduate Scholarships Available**

Twenty-five scholarships are available for undergraduate students majoring in engineering and science disciplines. Sponsored by the U.S. Department of Energy (DOE) and administered by Oak Ridge Associated Universities, the scholarships are designated for those students interested in pursuing careers in environmental restoration or waste management (ER/WM).

Applicants must be U.S. citizens and currently pursuing an Associate of Science or Bachelor of Science degree full time. The Environmental Restoration/Waste Management Scholarship Program includes full payment of tuition and fees at a DOE-approved institution, a $600 per month stipend, and a three month practicum assignment at a DOE facility engaged in environmental restoration and waste management.

Selection is based on academic performance, recommendations, background and a statement of career goals by the applicant. The competition is nationwide although four-year institutions and two-year institutions will compete in separate categories.

Park Avenue, New York, NY 10166-0079.

Additional entry blanks may be obtained by writing Scripps Howard Foundation, 1100 Central Tower, Cincinnati, Ohio 45202, or you may reproduce entry blanks received with this fact sheet.

Any student cartoonist at a college newspaper or college magazine in the United States or its territories is eligible.

Submit 5 to 15 representative samples (1 per page) on 8 1/2 x 11" paper. Type or print your name, and the name of the college publication in which the work appeared, on the front of each page. Place the samples in a folder. Material must have been published in a college newspaper or college magazine during 1990. Tear sheets (8 1/2 x 11") are acceptable, but we recommend simple, clear photocopies. DO NOT SEND ORIGINALS. NO ENTRIES WILL BE RETURNED.

Cartoons may be panels, strips and/or editorial illustrations. The entry must include a written statement (250 words or less) by the cartoonist outlining his or her goals in cartooning.

The entire package of 5-15 samples with statement will be judged as one entry.

Include two completed entry blanks with the entry. One should be attached to the front of the entry folder, the other should be clipped on for easy removal. Photocopied entry blanks are acceptable.

Enclose a business (no. 10) self-addressed, stamped envelope to receive a list of the winners.

Entries become the property of the Scripps Howard Foundation.

Entries must be received no later than January 7, 1991.

The Scripps Howard Foundation, incorporated under the laws of the State of Ohio as a charitable corporation on August 15, 1962, was organized to accept and administer gifts to advance journalism through education, competition and research.

Huntsville Fifth in Eating Junk Food
by Jennifer Grace

Do you find yourself eating "on the run" often? Fond of those late night "junk food sprees", are you? You are not a minority according to a recent Newsweek magazine statistic. According to the statistics posted in the November 5 issue of Newsweek, medium-size cities lead the nation in fast food consumption. The list of the ten biggest "junktowns" includes THREE cities in Alabama. No other state had more than one city in the top ten.

Our own Huntsville was number five on the list. The average Huntsville citizen is said to be spend approximately $443.00 of his/her annual earnings on fast foods. Decatur, Alabama was number six, the average person spending $438.00 dollars per year, and Dothan, Alabama rounded out the number ten spot. Wilmington, North Carolina topped the list, spending about $511.00 a person per year on those greasy delectables.

What does this tell us about our medium-sized cities? One can only speculate. In Huntsville's case, it is probably the result of the fast-paced, time-demanding lifestyle. Students and young career individuals make up the population near the highest concentration of fast food restaurants in Huntsville, namely on University Drive. There are also a lot of commuters who may come into Huntsville for the day, buying their lunch here in town since it's easier than driving all the way back to "Timbuc Wherever".

Regardless of the causes or results, Huntsville has once again distinguished itself from the masses even if its only to be know as a "Fat City".

Research Council Awards Announced
continued from page 3

and non-U.S. nationals, and to both recent Ph.D. degree recipients and senior investigators. Awards are made for one or two years, renewable to a maximum of three years; senior applicants who have held the doctorate at least five years may request a shorter period. Annual stipends for recent Ph.D.'s for the 1991 program year range from $27,750 to $42,000 depending upon the sponsoring laboratory, and will be appropriately higher for senior Associates. Financial support is provided for allowable relocation expenses and for limited professional travel during duration of the award. The host laboratory provides the Associate with programmatic assistance including facilities, support services, necessary equipment, and travel necessary for the conduct of the approved research program.

It took Galileo 16 years to master the universe. You have one night.

It seems unfair. The genius had all that time. While you have a few short hours to learn your sun spots from your satellites before the dreaded astronomy exam. On the other hand, Vivarin gives you the definite advantage. It helps keep you awake and mentally alert for hours. Safely and conveniently. So even when the subject matter's dull, your mind will stay razor sharp. If Galileo had used Vivarin, maybe he could have mastered the solar system faster, too.

Revive with Vivarin!
Facts of Life Line

Do you have a question about sexuality or reproduction, and are too embarrassed to ask? The "Facts of Life Line" can help. The Facts of Life Line contains 69 phone accessible recorded messages about sexuality, reproduction and related concerns.

It isn’t meant to take the place of personal phone caller healthcare, but it gives general information and helps you in finding out where to go for more help.

The "Facts of Life Line" provides immediate access to confidential reproductive health information.

The service has proved extremely popular. Since it began in Mobile in 1987, the line has received an average of more than 700 calls per month. The most frequently called messages have been "Aids," "Saying No, to Sex," "Female Sexual Problems," "Male Sexual Problems," "Teenage Sexual Concerns," and "Condoms, Contraceptives, Foam and Suppositories."

The phone line is available to touch-tone phone users 24 hours a day by dialing 322-3228 in Birmingham, 476-3228 in Mobile, 536-3228 in Huntsville and 521-3228 in Montgomery, and entering the code number of the desired message.

The "Facts of Life Line" is available to those with rotary dial telephones from 9 a.m. to 5 p.m. Monday through Friday. Callers should stay on the line and tell the operator of the message they wish to hear.

Chargers Slash Windsor

by Joseph Larney reporter

The UAH hockey team opened its home season the weekend of November 3-4m in impressive fashion as they won the Fifth Annual United Technologies International Cup Tournament by defeating the University of Windsor both Friday and Saturday night at the Von Braun Civic Center.

Coming into the tournament, the Chargers were 0-4 lifetime against Windsor.

The Chargers amassed a total of 13 points in their 5-1 victory Friday night and their 8-5 shoot-out Saturday night.

Leading the Chargers in game one was Jim Goonan and Logan Lampert with two goals a piece.

UAH's Logan Lampert opened the games scoring at 2:56 in the first period when he powered in an unassisted goal. Junior right wing Goonan made the score 2-0 at the 9:47 mark.

Windsor's J.D. Urbanic cut the lead to 2-1 when he scored at 15:21 in the second period. Also scoring for the Chargers was senior right wing Stu Vitue.

Coach Doug Ross praised the play of Lambert and Darryl Bosence and also senior goalie Randy Resek who had a total of 27 saves throughout game one.

Game two was started in similar fashion as game one when sophomore Logan Lambert pulled a deja vu and put the Chargers on the board first with 2:56 in the first period. He was assisted by Graham Fair. UAH went up 2-0 with 9:47 when Jim Goonan scored a goal with an assist from center Bryan Moller. UAH turned up the heat in the second period scoring two goals: the first from Goonan from Denis Skapski shot at 14:42 and the second another Stu Vitue from Doug McDonald and Don Erbach at 16:04. Windsor had one goal in the period scored by J.D. Urbanic. He was assisted by Brad Belland.

The third period also had three goals scored in it, two by Windsor and two by UAH. Windsor's Dan Mahon scored both of his teams goals, the first was unassisted and the second was with the help of teammates Mark and Anthony Gennett. Curt Krolak scored the Chargers last goal in the final period on an unassisted shot.

UAH's Bryan Moller and Windsor's Dan Mahon both scored hat tricks during game two. Moller was named the tournaments Most Valuable Player while Mahon was named to the all-tournament team. Also named to all-tournament team for UAH were Randy Resek, Denis Skapski and Jim Goonan.

Junior defense man Howie McEchern said "This weekend was a good confidence builder for the team. Any time you can score 13 points against a team like Windsor, you know things are coming together."

Teammate Don Erbach said he looks for this coming weekend to be very challenging for the Chargers. "New Hampshire is a quality team and with the death of their coach last week we look for them to be pretty fired up. We will need a total team effort to get two victories."

New Hampshire Ices Charger

by Joseph Larney reporter

Unfortunately for the UAH hockey team, the University of New Hampshire is off to their best start in 64 years. UAH lost two games this past weekend to drop their record 2-3-1 while the Wildcats improve to 5-0.

The Chargers were defeated 6-3 Friday night and suffed up 8-2 Saturday night. Game 1 was closer than the score indicated but none the less the Chargers came up short.

Senior Denis Skapski led the Chargers with two goals in game one. Left wing Sean Kelly scored UAH's third goal. Kelly also had two assists along with center Bryan Moller who had one.

UAH outshot New Hampshire 39-24 in game one. Goalie Randy Resek finished the game with 18 saves.

Game two however was not as close with the Chargers losing 8-2. UAH looked as if they would make a game of it when Denis Skapski scored on a power play six minutes into the game to take the score 1-0. This is when all hell broke loose. New Hampshire out scored UAH seven to one over the next two quarters to cruise to a convincing 8-2 victory. Shane Prestegard scored the Chargers last goal with 7:28 remaining in the second period. He was assisted by Skapski.

UAH's Logan Lampert was Most Valuable Player this past weekend.

The final Charger hockey game was held Saturday night at the Von Braun Civic Center. UAH defeated Windsor College 8 to 5 to win the International Cup Weekend Tournament.

Also, the Chargers' skated to a 3-1 victory Friday night. The Chargers' took a 3-0 first period lead and never relinquished it.

The Chargers' played tough throughout the night. Bryan Moller lead the scoring attack with three goals.

Denis Skapski, Jim Goonan, Don Rugg, Stuart Vitue, and Curt Krolak added one goal respectively. The level of play escalated each period.

After the game, the awards ceremony consisted of an All Tournament Team, Most Valuable Player, and the Humana Hospital Stars of the Series. The All Tournament Team included Randy Resek (UAH), Luke Ducharme (Windsor), Denis Skapski (UAH), Rod Anthony (Windsor), Dan Mahon (Windsor), Jim Goonan (UAH), and Bryan Moller (UAH). The Most Valuable Player was Bryan Moller of UAH. Finally, the Humana Hospital Stars of the Series were Bryan Moller of UAH and Luke Ducharme of Windsor.

Wizards Win and Entertain
by Joseph Larney
sports writer

The world famous Harlem Wizards were on hand at Spragins Hall this Sunday when they defeated The Huntsville All-Stars 101-100 with some fancy trick shots and some high flying dunks. The Huntsville All-Star Team was made up of former UAH and Alabama A&M players and several Huntsville television, radio and newspaper personalities.

The Wizards were led by former New York Knicks player, Hollis Copeland who burned the nets for a game high 30 points. Next to Copeland in scoring for the Wizards was Rainbow Muntagim with 28 points. Former Chicago Bull Sam Walton was next with 17 points.

UAH/Coca Cola Player of the Week

New Hampshire

of the opportunities and won," said assistant coach Dino Ferrante.

"Skapski gave a strong performance and so did sophomore defenseeman Don Burke," continued Ferrante. "We also had good goaltending."

UAH/Coca Cola Player of the Week

Dennis Skapski, right defender on the UAH hockey team, was voted UAH/Coca Cola Player of the Week for the week of November 6 through November 12. "Dennis really played with a lot of spirit, intensity, and emotion in the University of New Hampshire games," said coach Doug Ross. "He played hurt and still gave it all he had. Dennis scored three goals over the weekend and blocked a lot of shots. He was also a good leader on the ice."

UAH Student Runs Past the Competition

by Joseph Larney
reporter

The University of Alabama in Huntsville men's basketball team had a Blue-White game at Grissom High School this past weekend with the White team winning 72-70 on Eric Edward's last second jumper.

"The Blue team boat the White team by 30 points in our first scrimmage," Baker said. "The difference is that there are better athletes on the White team. After the first week of practice, the knowledge level has crept up and now the White team knows what they're doing."

UAH graduate student Greg Foreman won the UAH Student Runs Past the Competition.

RULES
1) Select one winning team or a tie for each game listed. Two or no
marks will result in a disqualification of the entry.
2) Estimate the combined points scored by both teams in the tie-
breaker game.
3) Weekly winners will be determined by the most correct games
selected. In case of a tie, the tie-breaker will be used to determine which
contestant is closer to the combined scores of the two teams.
4) The decision of the judges is final.
5) Entries must be received at the UAH University Bookstore, ground
floor of the University Center, by 5 p.m. Friday preceding the game
day.
6) Only three (3) entries per contestant per week are permitted.
as well as
7) Employees of the University Bookstore and the University Center
clothing and gifts from the University Bookstore, have their name
announced as the weekly winner in
8) Only weekly winners will be eligible for the Grand Prize drawing at
the end of the season.
9) Only students, faculty and staff of UAH are eligible.
10) Only students, faculty and staff of UAH are eligible.
