MOVING TO A SEMESTER SYSTEM

The University of Alabama in Huntsville is preparing for the transition from an accelerated term to the semester system. This schedule of classes provides information you need to plan your classes for Summer term, 1994, Fall semester, 1994, and Spring semester, 1995.

With the semester transition in mind, use this schedule to help plan your courses for the upcoming '94 winter, spring, and summer terms. There is some flexibility to incorporate changes in your '94 winter class selections if you act now. Open registration for winter term is December 6 through December 17, 1993. Final registration is January 4, 1994.

In producing this schedule of classes at this time it is hoped that you will work out your class needs to arrive at your currently planned graduation date. Flexibility exists to create more course offerings in the Fall of 1994 and Spring of 1995; however, we must be aware of your class needs. The class schedules printed here are subject to change. Updated timetables will be produced prior to early registration for the summer and the 1994-1995 semesters. If it appears that there are bottlenecks that could delay your graduation, let your advisor know or call the Semester Transition Hotline (895-6686).

The faculty, staff, and administration have worked to smooth the transition to the semester system, but we may not have anticipated every problem. You may have questions that no one seems able to answer or you may receive conflicting opinions. We hope to be able to provide clear and helpful answers to your particular questions. If you have uncertainties, the first thing to do is to consult your advisor or the chair of your department. If you cannot do this or think that you have received inadequate responses, call the **Semester Transition Hotline (895-6686)**. A multi-disciplinary advisement group will be working together to provide information and to help students through the transition.

WHAT IS THE NEW SEMESTER SYSTEM

In the Fall of 1994, UAH will change its calendar. Instead of three terms in the academic year, there will be two semesters in the fall and spring. Instead of summer sessions of eight and ten weeks, there will be 2 six-week terms and one ten-week term, beginning in the Summer of 1995. These academic calendars are described below.

The new semester will be 14 weeks plus an additional week for final exams. Thus the semester will be four weeks longer than the present term. Besides shorter classes and longer semesters, one of the main differences will be an increase in the number of courses taken each semester, although the number of courses taken for the entire academic year should be about the same as now.

All course credits are semester-hour credits whether on the term or semester system.

COURSE LOADS

On the new semester system, the typical full-time undergraduate course load is 15-18 semester hours or 5 to 6 courses. Remember that the minimum number of hours to graduate is 128. This means that a full-time student should take between 30 and 33 hours a year in order to graduate in 4 years. The minimum full-time load for undergraduates will be 12 hours. Special permission from a dean will be needed to take 21 hours or more.

Part-time students should discuss course loads with their advisors. If you have been taking one course a term, you may be able to take two on the longer semester because of the shorter classes and the additional weeks on the new system. More class periods are available in which to schedule in the afternoon and evening. Also early morning and lunch-time classes should be considered.

For graduate students, the minimum full-time load will be 9 hours or 3 courses, with the permission of the graduate dean needed to enroll in 14 hours or more.

CHANGES IN THE CALCULUS SEQUENCE

The Mathematical Sciences Department has completed restructuring calculus courses to accommodate the semester plan which begins Fall of 1994.

Beginning Summer of 1994, the four current calculus courses (MA 153, 154, 233 and 251), which are three credit hours each, will be changed to three calculus courses (MA 171, 172, and 201), which are four credit hours each.

Students who have taken MA 153 and want to take MA 172 in the Fall of 1994 may do so if they take the supplementary course (MA 159) in the summer of 1994. This four week (three weeks of instruction and final examination), one credit hour course will cover material not included in MA 153 but is included in MA 171.

Calculus courses will be available as follows:

Summer 1994	8 weeks	MA 233, 251 and 171
	1st 4 weeks	MA 159
	2nd 4 weeks	MA 159
Fall 1994	MA 171, 172, 201, 154, 233 and 251	
Spring 1995	MA 171, 172, 201, 233, and 251	
Summer 1995	MA 171, 172, 201, and 251

OTHER CURRICULAR CHANGES

In some departments, adjustments have been made in the curriculum in order to accommodate the semester transition, or changes have been made to be included in the forthcoming 1994-1996 catalog:

Accounting:

The Accounting Department has developed a semester transition plan denoting which courses need to be taken depending on what the student has already taken. For more information, call the ADSC Office of Academic Assistance, 895-6024.

Biological Sciences:

The three-course introductory sequence in biological sciences has been reduced to two 4-hour courses, BYS 119 and BYS 120.

Computer Science:

The new introductory sequence for students majoring in computer science is CS 107 and 207.

Chemistry:

CH 223 will carry three hours credit, with a one-hour lab each week. Organic Chemistry will be a two-semester, 8-hour sequence: CH 331 (3 hours) and CH 335 (1 hour) laboratory are offered in the fall semester; CH 332 (3 hours) and CH 336 (1 hour) laboratory are offered in the spring semester. CH 333 will no longer be taught. Some adjustments have also been made in the physical chemistry sequence (CH 341, CH 342, CH 343, CH 345, CH 346).

Engineering:

Mechanical engineering courses and aerospace engineering courses are listed under a new prefix MAE. Other changes in engineering include minor changes in upper division prerequisites and course credits in some departments.

Music:

Music courses have been re-numbered. Studio and ensemble courses are listed under the new prefix MUA (for applied).

Nursing:

The College of Nursing will initiate a new curriculum in the Fall of 1994, beginning with the junior class. Rising seniors in Nursing will complete the current curriculum.

Physics:

Some adjustments have been made in laboratory sequences for PH 111, 112, and 113. The corresponding one-credit hour laboratories (PH 114, 115, and 116) will be offered as 12 two-hour sessions, plus a final exam, replacing the current 8 three-hour sessions. Intermediate undergraduate laboratories in physics have also been adjusted slightly (PH 310, 311, 312, 416).

COOPERATIVE EDUCATION ON THE SEMESTER CALENDAR

The rotation of work and school will still be in place as we follow the semester calendar; a period of work will always precede a period of school. Each work term will be approximately 17 weeks.

The Co-op Office will offer students as many reasonable alternatives as possible to ensure that graduation dates are not delayed. The Co-op Staff will meet with each co-op individually to set up new alternation schedules. These will be provided to your employer for their review to ensure a smooth transition.

Alternating co-ops:

Students who co-op on a rotating basis will continue to do so. With the new system, however, a student will work three times during a two-year period. That means you won't be on the same two work terms every year.

Parallel co-ops:

Your work schedule should remain essentially the same: 20-25 hours per week. The big change will be in the number of hours you can take when at school—nine hours will probably be a reasonable load.

HOW TO MINIMIZE POTENTIAL PROBLEMS

Before the Fall of 1994, try to complete any classes taught in a sequence such as foreign languages classes, science, or mathematics classes.

Anticipate prerequisites that might hinder enrollment on the new semester system and try to take these prerequisite courses before the Fall of 1994.

Devise a tentative schedule for each term/semester until graduation so you can see when you need to take courses. Include all required and elective courses.

If you do not have an advisor, call the appropriate advising office or academic department. See "Where To Get Help Section."

If problems develop in spite of good planning and attention to your program, don't panic. We will help students individually to solve their problems. Just let us know about them, 895-6686.

TUITION AND FEES

Tuition for 1994 & 1995 has not yet been set. A tuition payment plan, in which each semesters tuition can be paid in two installments, is being developed.
